- No. 27... Return of the Municipal Council of the Township of Yarmouth, of money borrowed during the year 1886, under the Act respecting the investments in Tile Drainage. (Not printed.)
- No. 28... Copies of Advertisements, Tenders, Specifications, Contracts, etc., in connection with the erection of the proposed Legislative and Departmental Buildings of Ontario. (Printed.)

- No. 29... Return to an Address to His Honour the Lieutenant-Governor, praying that he will, in his capacity as visitor of the Western University of London, Ontario, call upon the Senate of said University to furnish a full and accurate account of the property of the University, and the income received therefrom, in order that the same may be laid before the Legislature, as directed by section 5, of 41 Vic., cap. 20. (Not printed.)
- No. 30.. Return shewing the total number of Students in University College at the date of the Order; the number of female students at the same date, and also, the number of students attending lectures in each of the following subjects:—Greek, Latin, Mathematics, Pyhsics, History, Ethnology, English, French, German, Italian, Spanish, Hebrew, Chaldic, Syriac, Logic, Mental and Moral Science, Biology, Chemistry, Mineralogy and Geology. (Not printed.)
- No. 31... Return shewing on a map or plan each timber limit or berth now under license, and each timber limit or berth disposed of at the sale in October last, whether yet under license or not, with the names of the present licensees or owners thereof marked thereon, and the area thercof, and the bonus per square mile paid in respect thereof, and the dates when the same were respectively first placed under license. (Not printed.)
- No. 32.. Return shewing the names of the persons, firms and companies, indebted to the Province on the first day of January, 1886, on account of Timber Dues, Ground Rent, or Bonuses for Timber Limits, the amount of indebtedness in each case, the balance, if any, due by such persons, firms and companies, on the first day of January in each year since 1880. The total amount of such indebtedness on the 1st day of January, 1886. (Not printed.)
- No. 33.. Return shewing the persons by whom, and the limits or births in respect of which, the bonuses appearing as accruals from Woods and Forests, were payable in each year since 1871, the balances which remain unpaid on account of bonuses on the 31st December, in each year since 1871, with the names of the persons by whom the same were respectively owing, and the amount owed by each of them, and in respect of what limit or berth it was due, and the period during which it had remained unpaid after it became due, the amounts which in each of the said years were allowed to licensees in reduction of the sums owing by them, with the names of the persons to whom the allowances were made, the amount of each allowance and the reasons for making them. (Not printed.)
- No. 34.. Return of copies of all Orders in Council relating to the sale of timber limits, which took place in October last. The names of the purchasers at the sale, the several limits bought by each purchaser, with the area of each of them, and the bonus per square mile agreed to be paid for each such limit. The deposit paid by each purchaser, the amount since paid on each purchase, and the nature of the security, if any, given for the residue of the price. The several limits which had been bid off at the sale which took place in October, 1872, and the price per square mile at which they were severally bid off at that sale. The names of all purchasers who have failed to comply with the conditions of sale. The names of all purchasers who have transferred their claims to other persons with the names of the transferees and dates of transfers to them respectively. The several limits, if any, put up for sale and not sold and the disposition since made of them and the authority under which such disposition was made. (Printed.)
- No. 35.. Report of the Commissioners appointed to revise and consolidate the Public Statutes of the Province. (Printed.)

- No. 36. Report of the Commissioners for Niagara Falls Park. (Printed.)
- No. 37. Analysis of Reports of County and Township Agricultural Societies and of Horticultural Societies for the year 1885, in accordance with the provisions of sections 47 and 48, chapter 35, R. S. O. (Not printed.)
- No. 38. | Regulations respecting Mechanics' Institutes and Art Schools. (Not printed.)
- No. 39.. Correspondence respecting the land and timber in the recently Disputed Territory of the Province. (Printed.)
- No. 40. Copies of all regulations made by the Lieutenant-Governor in Council, under the Act to amend the Free Grants and Homesteads Act, 43 Vic., cap. 4. (Not printed.)
- No. 41. Return from the Queen's Printer as to the disposal of the Revised Statutes of Ontario for the year 1886. (Not printed.)
- No. 42.. Return from the Queen's Printer as to the disposal of the Statutes of Ontario for the year 1886. (Not printed.)
- Return shewing what application has been made for payments out of the No. 43. Consolidated Revenue, under the provisions of Sec. 4, cap. 4, 43 Vic., in respect of the dues on pine trees. Also, shewing what is the aggregate sum which, up to the first day of March last, the patentees of lands subject to the provisions of the Act, are entitled to receive out of the dues collected on pine trees cut after date of their Patents. (Not printed.)
- No. 44. Return giving copies of all correspondence with the Architect, Mr. Waite, concerning the plans prepared by him for the proposed new Parliament and Departmental Buildings, and any agreement made with him concerning his remuneration as such Architect. (Printed.)
- No. 45.. Statement of the Returns forwarded to the office of the Provincial Secretary of all the Fees and Emoluments received by the Registrars of Ontario for the year 1886, made in accordance with the provisions of the R. S. O. Cap. 111, Sec. 97 and 43 Vic., Cap. 3, Sec. 2, with which are contrasted receipts of same nature in 1884 and 1885. (Printed.)
- No. 46. Statement in detail of receipts and expenditures on account of the Mercer Estate for the year 1885. (Not printed.)
- No. 47.. |Statement in detail of receipts and expenditures on account of the Mercer Estate for the year 1886. (Not printed)
- No. 48.. Copies of all correspondence, papers and reports, between the Department of Education and William S. Summerby and O. Dufort, Inspectors of Public Schools, in the United Counties of Prescott and Russell, during the last year, on the subject of Public Schools in the French Settlements of these Counties. Also, copies of all reports respecting the alleged difficulties between the English and French ratepayers of the town of L'Orignal, or, upon the propriety of establishing a Separate School for Protestant children in that town. (Printed in part.)
- No. 49. Return of copics of all correspondence subsequent to the year 1882, between the Department of Public Works and any person or persons with reference to the regulation of the waters of Lakes Simcoc and Couchiching, together

with the reports of the Engineer, shewing the amount expended in removing obstructions from the outlets of the lakes and also the condition in which the outlets are at the present time. (Not printed.)

No. 50.. Annual Reports of the Dairy Associations of Ontario for the year 1886. (Printed.)

CONTENTS OF PART VI.

PUBLIC ACCOUNTS

OF THE

PROVINCE OF ONTARIO

FOR THE

YEAR ENDED 31ST DECEMBER,

1886.

Brinted by Order of the Begislative Assembly.

Toronto:

PRINTED BY WARWICK & SONS, 26 AND 28 FRONT STREET WEST. 1887.

To His Honour the Honourable John Beverley Robinson, Lieutenant-Governor of Ontario.

MAY IT PLEASE YOUR HONOUR:

The undersigned has the honour to present to your Honour the Public Accounts of the Province of Ontario for the year ended 31st December, 1886.

Respectfully submitted.

A. M. ROSS,

Treasurer.

Treasury Department, Ontario,
Toronto, 10th February, 1887.

PROVINCIAL AUDITOR'S REPORT.

Provincial Auditor's Office, Toronto, February 17th, 1887.

To Hon. A. M. Ross,

Treasurer of Ontario:

I have the honour to present to you the Public Accounts for the year 1886.

For the information of the Legislative Assembly, I beg to report, with reference to over-expenditures of appropriations as granted by the Supply Bill, as follows:—

Superannuated Teachers \$3,788 58

MINISTER'S REPORT, ORDER OF TREASURY BOARD, ETC.

Education Department, Toronto, 30th August, 1886.

The undersigned respectfully reports to His Honour the Lieutenant-Governor in Council that the sum appropriated for the payment of superannuated teachers this year has been exhausted, owing to the claims being larger than was expected, and that there are several superannuated teachers who have been in receipt of annual allowances under the statute in that behalf who have not yet been paid for this year, and who will suffer hardship if their usual payments are withheld.

The undersigned accordingly recommends that authority be given under the Act 49 Victoria, chapter 4, section 20, for the payment of the amounts specified opposite the names in the annexed schedule.

(Signed), G. W. ROSS,
Minister of Education.

Provincial Auditor's Office, Toronto, September 2nd, 1886.

SIR,—The appropriation under the Supply Bill for Superannuated Teachers having been exhausted, further payments on account of this service, amounting to \$1,484.08, are recommended by the Education Department.

From the report of the honourable the Minister of Education attached to the accounts, it appears to be necessary that they should be paid.

Your obedient servant,

(Sd.) C. H. SPROULE,

Provincial Auditor.

THE SECRETARY,
Treasury Board.

MINUTE OF THE TREASURY BOARD ON MATTERS REFERRED TO THEM FOR CONSIDERATION.

The Treasury Board approve of the payment of \$1,484.08 for superannuated teachers' claims, in pursuance of the report of the Honourable the Minister of Educution, dated 30th August, 1886, and the memorandum of the Provincial Auditor with reference thereto, and authorize the issue of cheques for the amounts mentioned in the schedules annexed to said report.

September, 1886.

Education Department, Toronto, October 19th, 1886.

The undersigned respectfully reports to His Honour the Lieutenant-Governor, that there are certain superannuated teachers in addition to those who have not been paid for this year, mentioned in the schedule to the Order in Council, approved 17th September, 1886, and who will suffer hardship if their usual payments are withheld.

The undersigned accordingly recommends that authority be given, under the Act 49 Victoria, cap. 4, sec. 20, for the payment of the amount specified opposite the names in the annexed schedules.

(Sd.) G. W. ROSS, Minister of Education. PROVINCIAL AUDITOR'S OFFICE,
TORONTO, October 19th, 1886.

SIR,—In addition to the payments to superannuated teachers approved by the Treasury Board on the 17th ult., further payments amounting to \$2,304.50, have been recommended by the Education Department. Certificates, showing the proposed payments, are attached, together with the report of the Honourable the Minister of Education, in connection therewith.

It appears to be necessary that the payments asked for should be made.

Your obedient servant,

(Sd.) C. H. SPROULE,

Provincial Auditor.

THE SECRETARY,

Treasury Board.

MINUTE OF THE TREASURY BOARD ON MATTERS REFERRED TO THEM FOR CONSIDERATION.

The Treasury Board approve of the payment of \$2,304.50 for superannuated teachers' pensions, in pursuance of the report of the Honourable the Minister of Education, dated 19th October last, and the memorandum of the Provincial Auditor with reference thereto, and authorize the issue of cheques for the amounts mentioned in the schedules annexed to said report.

> (Sd.) T. B. PARDEE, Chairman.

Dated this 21st day of October, A.D. 1886.

> Department of Public Works, Ontario, Toronto, November 26th, 1886.

The undersigned respectfully reports to His Honour the Lieutenant-Governor in Council:—

(1) That the appropriation for maintenance and repairs of the School of Science is exhausted, while approved accounts, principally for fuel sup-

plied under contract, have not been paid; and that as the appropriation has not all been used in payment of accounts certified by this Department, enquiry made has resulted in a report by the Provincial Auditor, "that accounts amounting to about \$900.00 have been paid on certificates from the Education Department."

- (2) That the appropriation for maintenance and repairs of the Main Building (Parliament, Buildings) is nearly exhausted, while approved accounts, principally for fuel supplied under contract, have not been paid; and that as some thousands of dollars of such appropriation have not been used in payment of accounts certified by this Department, enquiry made has resulted in a report by the Provincial Auditor, that accounts amounting to about \$4,300.00, have been paid on orders from Colonel Gillmor, as Clerk of the House.
- (3) That the appropriation for Public Buildings in the Parry Sound District shows a balance to credit of but \$346.00, while accounts for work done in the erection of lock-ups, etc., have been approved for about \$700, the deficiency having arisen from under-estimates of the cost of the buildings to be erected.

The several accounts for the above-named services being for work done, or fuel supplied under specific contracts, it is highly desirable that they should be paid. The undersigned therefore recommends that authority be given under the Act 49 Vic., chapter 4, section 20, for the payment of the amounts specified opposite the names on the Schedule hereto annexed.

(Signed), C. F. FRASER, Commissioner, etc.

Provincial Auditor's Office, Toronto, November 27th, 1886.

Sir,—The appropriations for the respective services having been exhausted, the Public Works Department recommends further payment as follows:—

- 1. School of Science, maintenance and repairs . . . \$ 459 48

The report of the Honourable the Commissioner of Public Works explaining the necessity of proposed overdrafts is enclosed.

Your obedient servant,

(Signed), C. H. SPROULE,
Provincial Auditor.

THE SECRETARY,

Treasury Board.

MINUTE OF THE TREASURY BOARD ON MATTERS REFERRED TO THEM FOR CONSIDERATION.

Upon consideration of the report of the Honourable the Commissioner of Public Works, dated 26th November, 1886, and the memorandum of the Provincial Auditor with reference thereto, the Treasury Board approve of the payment of the following accounts, the appropriations for the services in respect of which they have been rendered, being exhausted, and recommend that warrants for the payment of such accounts be issued in favour of the Honourable the Treasurer:—

Main Building (Parliament Buildings), Maintenance and	Repair	8:
Elias Rogers & Co., contract-fuel \$	1,381	14

School of Practical Science, Maintenance and Repairs:

Elias Rogers & Co., contract fuel §	427	l 4
Joseph Murphy, repairs	9	00
J. Ritchie & Co, repairs	6	00
T. McConnell & Co., fuel	17	34

Parry Sound District, Public Buildings:

(Signed), T. B. PARDEE, Chairman.

December, 1886.

Education Department, Toronto, 12th October, 1886.

The undersigned respectfully reports to His Honour the Lieutenant Governor in Council, that the sum appropriated for the payment of maintenance of the School of Practical Science this year has been exhausted owing to the claims being larger than was expected, and there are several accounts which have not been paid, and the parties concerned will suffer hardship, and the school itself loss if payment is withheld.

The undersigned accordingly recommends that authority be given under the Act 49, Cap. 4, Sec. 20, for the payment of the amounts specified opposite the names in the annexed Schedule.

(Signed), G. W. ROSS,
Minister of Education.

Provincial Auditor's Office, Toronto, October 20th, 1886.

Sir,—The appropriation under the Supply Bill for maintenance and repairs of the School of Practical Science having been exhausted, further payments on account of this service, amounting to \$100.33, are recommended by the Education Department.

From the report of the Honourable the Minister of Education, attached to the accounts, it appears to be necessary that they should be paid.

Your obedient servant,

(Signed),

C. H. SPROULE,
Provincial Auditor.

THE SECRETARY,
Treasury Board.

MINUTE OF THE TREASURY BOARD ON MATTERS REFERRED TO THEM FOR CONSIDERATION.

The Treasury Board, in pursuance of the report of the Honourable the Minister of Education, dated 12th October, 1886, and the memorandum of the Provincial Auditor with reference thereto, approve of the payment of \$100.33, the amount of certain accounts rendered in connection with the maintenance of the School of Practical Science, and authorize the issue of cheques for the amounts mentioned in the Schedule annexed to said report.

(Signed),

T. B. PARDEE,

Chairman.

Dated the 21st day of October A.D., 1886.

Central Prison, Capital Account.....

\$2,530 54

Provincial Secretary's Department, Toronto, September 24th, 1886.

Re Capital Appropriation Central Prison.

Referring to the within report of the Inspector of Prisons, Christie, in which he states that works estimated to cost \$3,200, over and above the appropriation have been authorized and are in progress at the Central Prison, and that it is in the public interest that the accounts transmitted and those to be rendered for the works in question should be paid, and by

which he requests that his report be submitted to the Treasury Board, with a view to obtaining authority to pay the list of accounts, and those which will follow as works on capital account at the Central Prison.

The undersigned approves of the said report and respectfully recommends that it be adopted.

(Signed), G. E. LUMSDEN,
Assistant Provincial Secretary.

Office of Inspector of Prisons, Etc., Toronto, 20th August, 1886.

Re Capital Appropriation.

SIR,—I beg to transmit herewith accounts as per schedule enclosed, amounting in all to \$474.41. This expenditure has been incurred in capital work connected with the Central Prison for which an appropriation of \$6,100 was voted by the Legislature during last session, but I am informed that accounts amounting to \$3,238 for repairing the damage done to the Central Prison by the fire on the 28th March last, have been charged to the capital appropriation. As I have already sent in bills for close upon \$2,900 for works named in the Estimates for 1886, the appropriation is thus exhausted whilst works estimated to cost \$3,200 have been authorized by the Minister in charge of this Department, and are now in progress. I beg to report that it is in the public interest that the accounts now transmitted and those which will be rendered as the works in question progress should be paid, and I have to request that you will submit this report to the Treasury Board with a view to obtaining authority to pay these accounts and those that will follow them for capital work at the Central Prison.

> I have the honour to be, Sir, Your obedient servant,

> > (Sd.) R. CHRISTIE, Inspector.

C. H. Sproule, Esq.,

Provincial Auditor, Toronto.

Provincial Auditor's Office,

Toronto, 2nd September, 1886.

SIR,—The appropriation re Central Prison Capital Account, (Inspector's Branch) having been exhausted, further payments have been recom-

mended amounting to \$474.41, in addition to which the Inspector reports that works are in progress for which accounts will presently be sent in. As these over-drafts have resulted from charges having been made against the appropriation for expenditures incurred in consequence of the late fire at the Central Prison, it would seem to be expedient that an overdraft of the appropriation should be allowed to the extent of these special charges upon it.

Your obedient servant,

(Sd.) C. H. SPROULE,

Provincial Anditor.

THE SECRETARY,

Treasury Board.

Memorandum.—The sum of \$5,604.04 has been deposited to the credit of the Honourable the Treasurer, being receipts from Insurance Companies relate fire.

Minute of the Treasury Board on matters referred to them for consideration.

Upon consideration of the report of the Honourable the Provincial Secretary, dated 24th September, 1886, and the memorandum of the Provincial Auditor with reference thereto, the Treasury Board approve of the payment of \$3,200 in full of accounts rendered, and to be hereafter rendered in connection with certain authorized works now in progress at the Central Prison, and authorize the issue of cheques for the payment of such accounts accordingly.

(Sd.)

T. B. PARDEE,

Chairman.

Dated 21st day of October, A.D. 1886.

Colonization Roads

.....\$15,263 80

Crown Lands Department, Toronto, 17th November, 1886.

The undersigned respectfully reports to His Honour the Lieutenant-Governor in Council, that the appropriation under the Supply Bill for xii.

Colonization Roads has been exhausted owing to unforeseen expenditures rendered necessary in consequence of fire, flood, and otherwise, and that it is urgently desirable in the public interest that certain works now in process of construction should be carried to completion.

The undersigned accordingly recommends that authority be given under 49 Vietoria, Cap. 4, Sec. 20, for an accountable warrant for \$5,000 to be issued in favour of the Honourable the Provincial Treasurer, to pay accounts connected with this service as they become due.

(Sd.) THOS. H. JOHNSON,

Assistant Commissioner.

Provincial Auditor's Office, Toronto, November 17th, 1886.

Sir,—The appropriation under the Supply Bill for Colonization Roads having been exhausted, a further advance of \$5,000 is applied for by the Crown Lands Department.

The Assistant Commissioner's report, herewith enclosed, shows necessity for further payments.

As payments will be falling due from day to day, and in order to avoid troublesome delay, it has been considered necessary to ask that an accountable warrant for the above amount shall be issued in favour of the Honourable the Treasurer. Cheques to be issued on presentation of proper vouchers by the Crown Lands Department.

Your obedient servant.

(Sd.) C. H. SPROULE.

Provincial Auditor.

THE SECRETARY,

Treasury Board.

MINUTE OF THE TREASURY BOARD ON MATTERS REFERRED 10 THEM FOR CONSIDERATION.

The Treasury Board approve of the payment of \$5,000 to meet expenses incurred in connection with construction of certain public works, in pursuance of the report of Mr. Thomas H. Johnson, Assistant Commissioner of Crown Lands, and the memorandum of the Provincial Auditor with reference thereto, and authorize the issue of an accountable warrant in

1 (P. A.) xiii.

favour of the Honourable the Treasurer, in order to enable him to pay accounts in connection with the above service, as they may become due, the appropriation "Colonization Roads" being exhausted.

(Sd.) T. B. PARDEE, Chairman.

November 19th, 1886.

Crown Lands Department, Toronto, 25th November, 1886.

Having reference to his report re Colonization Roads, dated the 17th inst., the undersigned respectfully represents to His Honour the Lieutenant-Governor in Council, that an additional sum of \$5,000 will be required to complete the works referred to.

The undersigned would therefore recommend that authority be given under 49 Vic., Cap. 4, Sec. 20, for an accountable warrant to be issued in favour of the Honourable the Treasurer of Ontario for the above amount.

(Sd.) THOS. H. JOHNSON,
Assistant Commissioner.

Provincial Auditor's Office, Toronto, November 25th, 1886.

SIR,—I beg to enclose herewith an application from the Crown Lands Department, for a warrant for five thousand dollars on account of Colonization Roads, in addition to the amount sanctioned by the Treasury Board on the 19th inst.

Your obedient servant,

C. H. SPROULE,

Provincial Auditor.

THE SECRETARY,

Treasury Board.

MINUTE OF THE TREASURY BOARD ON MATTERS REFERRED TO THEM FOR CONSIDERATION.

The Treasury Board approve of the payment of an additional sum of \$\partial 5,000.00\$ to complete the works now in course of construction re Colonization Roads, in pursuance of the report of Mr. Thos. H. Johnson, Assistant Commissioner of Crown Lands, and the memorandum of the Provincial Auditor with reference thereto, and authorize the issue of an accountable xiv.

warrant in favour of the Honourable the Treasurer for the said sum of \$5,000.00 to enable him to pay accounts in connection with the above service, as they may become due, the appropriation "Colonization Roads" being exhausted.

(Signed), T. B. PARDEE,

25th November, 1886.

Crown Lands Department, Toronto, 7th December, 1886.

SIR,—Referring to his report on Colonization Roads, dated the 17th November last, the undersigned desires respectfully to inform His Honour the Lieutenant-Governor in Council, that an additional sum of six thousand dollars, approximately, will be required to pay balances of accounts and to complete the works referred to.

The undersigned accordingly recommends that a warrant be issued in favour of the Treasurer of Ontario for the above amount.

THOS. H. JOHNSON,
Assistant Commissioner.

Provincial Auditor's Office, Toronto, 8th December, 1886.

Sir,—I beg to enclose herewith an application from the Crown Lands Department for a further warrant for six thousand dollars on account of Colonization Roads.

The advances for this service, sanctioned by the Treasury Board on the 19th ult. and 26th ult., respectively, have already been exhausted, and additional accounts forwarded to the Treasury Department for payment are held awaiting action by the Treasury Board on enclosed application.

Your obedient servant,

C. H. SPROULE,

Provincial Auditor.

The Secretary,
Treasury Board.

MINUTE OF THE TREASURY BOARD ON MATTERS REFERRED TO THEM FOR CONSIDERATION.

The Treasury Board approve of the payment of a further additional sum of \$6,000.00 to complete the works now in course of construction re "Colonization Roads," in pursuance of the report of Mr. Thos. H. Johnson, Assistant Commissioner of Crown Lands, and the memorandum of the Provincial Auditor with reference thereto, and authorize the issue of an accountable warrant in favour of the Honourable the Treasurer for the said sum of six thousand dollars, to enable him to pay balances of accounts rendered in connection with the above service, the appropriation therefor being exhausted.

(Signed),

T. B. PARDEE,

Chairman.

9th, December, 1886.

The above overdrafts of appropriations were incurred through payments madé under accountable warrants. As it is necessary in the public interest, to issue accountable warrants, and as under existing regulations different Departments in some cases, have each an interest in the same appropriation, it is difficult to avoid occasional small unauthorized overdrafts.

Respectfully submitted,

C. H. SPROULE,

Provincial Auditor.

REPORT

Of the Librarian of the Legislative Assembly of the Province of Ontario, for the year ending 31st December, 1886.

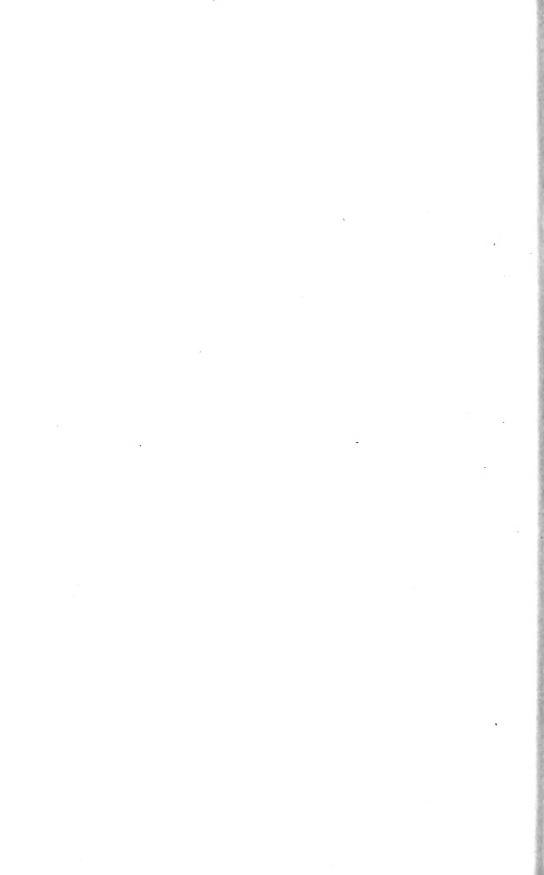

By Command,

A. S. HARDY, Secretary.

Provincial Secretary's Office,

Тоголто, Мау, 1887.

(16)

REPORT OF THE LIBRARIAN OF THE LEGISLATIVE ASSEMBLY OF THE PROVINCE OF ONTARIO.

To the Honourable the Legislative Assembly of the Province of Ontario:

The report of the Librarian respectfully sheweth:-

There is very little change to note in the condition of the Library since the date of last annual report, beyond the addition of the usual number of books, periodicals and exchanges. The main object kept steadily in view in procuring books and periodicals has been, as in the past, to make the Library as perfect for political reference purposes as possible, but some attention has been paid also to current literature. The list of exchanges might be greatly improved by arranging to get the public documents of neighboring States, and to obtain also a more complete set of sessional papers and departmental reports from other Provinces of the Dominion.

Last year I called attention to the lack of room for books on the library shelves. The demand for accommodation has, of course, become more urgent in the interval, and is now so pressing that if more shelving is not provided new purchases can be accommodated only by removing books already on the shelves. The cost of the improvement would be so trilling that no hesitation about providing it need be felt on that ground.

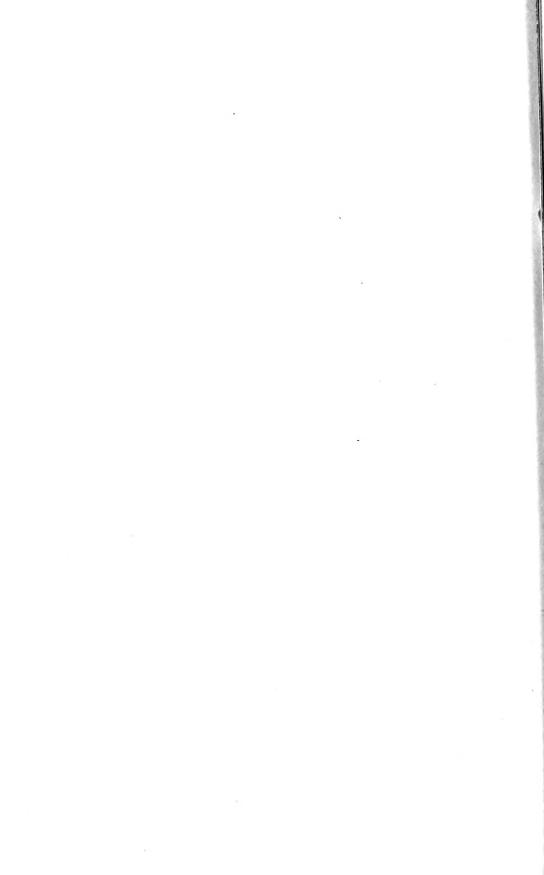

As the catalogue of the library is now out of print, and as the edition is almost exhausted, the time seems to have arrived for considering the expediency of preparing and printing a new one. The card catalogue in course of preparation will be classified differently from the printed one, and it would be advisable to prepare the new catalogue, if one is prepared, on the lines of the card classification. The most convenient form is that of a classified finding list, omitting the bibliographical information which adds too much to the bulk and expense of an ordinary printed catalogue. Those who require fuller references can consult the cards, and the one catalogue could be used in close connection with the other. The preparation of such a finding list and the correction of the printer's proofs will entail an amount of labor so large as to make it impossible to overtake it all during the coming recess without additional clerical assistance in the Library. If time is not a matter of importance this aid will of course not be necessary.

During the past recess a considerable proportion of the copying of the manuscript journals of the Old Canadian Parliament, now in the Dominion Parliamentary Library, has been done by Mr. H. J. Emerson. The total amount of work is greater than it was estimated to be, and as the work was stopped when the appropriation was exhausted, there still remains some to be done. For this, if the Legislative Council's journals are deemed worth copying, a new appropriation of over \$300 will be necessary. Six copies, fairly good, have been made, and as these are of great value it would be a wise precaution to distribute them. One set might be kept in the Law Society's Library at Osgoode Hall, one at the Library of the Education Department, one at the Provincial University Library, and one in the Legislative Library, leaving two to be used as exchanges or kept as duplicates. Mr. Douglas Brymner has asked for a set for the Dominion archives, and as the copies have been obtained through the courtesy of the Dominion authorities, placing one set in the archives would be no more than a fitting acknowledgment of the kindness shown.

All of which is respectfully submitted.

WM. HOUSTON,

Librarian.

REPORT

OF THE

COMMISSIONER OF CROWN LANDS

OF THE

PROVINCE OF ONTARIO

FOR THE YEAR 1886.

To His Honour the Honourable John Beverley Robinson, Lieutenant-Governor of the Province of Ontario:

MAY IT PLEASE YOUR HONOUR:

In accordance with the provisions of the Act for the Sale and Management of the Public Lands, I have the honour to submit the following report of the proceedings, transactions and affairs of this Department for the year ending on the 31st December, 1886.

CROWN LANDS.

There were sold during the year, 55,641 acres of Crown Lands. The sales amount to \$50,169.65. The collections amounted \$55,452.15. (See Appendix No. 3, page 4.

CLERGY LANDS.

The sales of Clergy Lands during the year aggregated a total of 1,788 acres. The sales amounted to \$2,087.17. The collections amounted to \$8,129.89. (See Appendix No. 3, page 4.)

COMMOM SCHOOL LANDS.

There were sold during the year 1574 acres of the Common School Lands. The sales aggregate \$685. The collections were \$17,997.26. (See Appendix No. 3, page 4.)

GRAMMAR SCHOOL LANDS.

There were sold during the year 783 acres of these lands, The sales equalled \$765,50. The collections on account of these lands amounted to \$3,235.76. (See Appendix No. 3, page 4.)

REVENUE FROM WOODS AND FORESTS.

The accruals for timber dues, bonus, ground rents, etc., for the year 1886 amount to \$742,029.64, and the total collections under same heads amount to \$715,804.61.

TOTAL REVENUE.

The total collected from all sources during the year was \$820,895.68.

EXPENDITURE.

The total expenditure of the Department for the year 1886, amounts to \$259,564.51.

WOODS AND FORESTS.

The total collection during the year from Woods and Forests is \$715,804.61, which includes \$147,471.00 payment of bonuses on sale of timber berths of 22nd October, 1885, which became due in 1886. This sum being deducted leaves \$568,333.61 as revenue proper from timber dues, ground rents, etc.

receipts for the year, and may fairly be taken as indicating that transactions in sawn lumber in 1886 have been of increased volume; that sales have been more readily effected, and on improved terms, as compared with the previous year.

The market for Square and Waney Pine has been dull during the season, sales of any importance being confined solely to the largest and finest timber, small sized and inferior pine being almost unsaleable except at greatly reduced prices; the opinion prevails that it would be in the interest of the country were operations in square timber for exportation abandoned.

For the year 1887, the forecast is an increase in the cut of saw-logs, and a diminution in the manufacture of Square and Waney Pine.

FIRE RANGING.

In my last report I referred to the anxiety the Department had had for some years to devise a means for preventing and suppressing bush fires, and for enforcing the provisions of the Fire Act. I pointed out that it had been determined to try the effect of placing a number of men, during the summer months, on the areas most exposed to fire, and with a view of giving the Licensees an interest, and some practical control, they had been invited to select the men who were to be so placed, in consideration of which, and the protection afforded their limits, it was arranged they should bear half the expenses of this scheme.

Last year, 1885, was the first year of the experiment which was found to work in a manner satisfactory to the Department as well as to the Licensees. Thirty-seven men were clothed with authority, instructed by the Department, and kept in the field during the summer months. Their presence was found to inculcate care on the part of the settlers and others, and a strong interest in the prevention of forest fires was kept alive, whilst the net expenses to the Province was under \$4,000, a very small expenditure for

such important results. At the close of the season the Licensees and others were invited to express their views on the benefits derived, the advisability of continuing the service, and to suggest any way in which they thought it could be improved. From all came expressions of satisfaction at the results achieved, requests that the service should be continued, and the only suggestions made were in the direction of increasing the number of men and extending the service over a wider area. The experiment having proved such a success, it was thought right to continue and extend it, and accordingly an additional sum was asked for, \$8,000 being voted for 1886, as against \$5,000 for 1885.

When the Licensees were invited to nominate their men for the season of 1886, it was found that the increased appropriation would not be sufficient to meet the pay of the number asked for; experience having shewn that suitable men could be procured at a lower rate of wages than had been paid, a slight reduction was made, notwithstanding which, the number asked for could not be supplied. Forty-five men were instructed and placed in the field this year at a total cost of \$9,847.75, of which one-half has been refunded by the Licensees, leaving the net cost of the service to the Department to be \$4,923.87. In addition to those under pay, the experiment was tried of clothing with authority some of the Forest Rangers of the Licensees, so as to make them ex-officio officers under the Fire Act, ready to act in an emergency or to bring offenders to justice.

The experience of last year has been repeated this; from all quarters come words of encouragement, satisfaction and commendation, together with requests for the continuance and extension of the service; the moral effect of the presence of Government officers in the bush has proved a check on carelessness, and the men having been selected with care, not a single instance of friction between them and the settlers has reached the ears of the Department.

There was a heavy fire on the Bonnechere River in the Ottawa country, and a number of incipient fires at other points; the Rangers were promptly on hand, secured help, and by strong organized efforts, fires which might have done great damage were checked and loss avoided. The Bonnechere fire was the most extensive in Eastern Ontario, but the statements made about its magnitude were greatly exaggerated, as the Fire Ranger on the limit reported the loss to be much smaller than it was stated to be. A serious fire was also reported in the Lake Superior country, which region is peculiarly exposed to fire, owing to the large number of mining prospectors who traverse it in every direction during the summer months, some of whom wantonly start fire prior to setting out to explore, so that the debris may be cleared off the surface of the rock and the veins exposed.

When the first fire district was proclaimed, settlement in the Lake Superior country was so sparse that no need for including it was seen, but recent experience has shewn the necessity for putting the Act in force there; accordingly, a new Fire District has been proclaimed, extending to the Western Boundary of the Province, and the Wood Rangers, Crown Lands Agents and other officials, supplied with Proclamations and copies of the Fire Act to be distributed and posted up, and instructed to prosecute all offenders to the utmost rigour of the law.

Owing to the immense extent of that country and the small number of Crown Land officials there, it was found quite impossible to cover the ground; the Department is pleased, however, to know that the amount of timber destroyed or damaged is nothing approaching what it was reported to be, and it is hoped that the Fire Ranging Service next year will be much more efficient in that region.

In view of the success of the experiment made in the direction of preventing such immense losses of timber by fires as have occurred in past years and the strong pressure to continue the service and make it more effective, the Department has determined to do so and extend it, which will necessitate an increased vote. It is confidently assumed, however, that any judicious expenditure in this direction will meet the approval of the Province at large.

FREE GRANTS.

There are 129 townships open for settlement under "The Free Grants and Homestead Act," no new townships having been added since my last report.

During the year just closed 1,149 locations were made on 162,734 acres of land, and 133 locatees purchased 5,474 acres. Owing to non-performance of the settlement duties 607 lots, located in former years, were resumed, and 706 patents were issued to locatees. (See Appendix No. 10, pages 14 to 17.)

Considerable settlement having taken place along the line of the Canadian Pacific Railway, west of Lake Nipissing, it was considered necessary for the convenience of the people to open a Crown Land Agency at Sudbury.

The Northern and Pacific Junction Railway, having recently been completed and opened for traffic from Gravenhurst to its junction with the Canadian Pacific at Thorncliffe; a considerable influx of settlers may be looked for during the coming year.

CROWN SURVEYS.

The undermentioned surveys have been performed during the year, that is to say, the residue of the Townships of Head and Maria, in the County of Renfrew, have been sub-divided into farm lots of 100 acres each; the Townships of Deacon and Fitzgerald, in the District of Nipissing, into farm lots of 100 acres each; the Townships of Broder, Dill and French into lots of 320 acres each; the Townships of Ermatinger, Grassett, Montgomery, Morgan and Otter, in the District of Algoma, into lots of 320 acres each; the Townships of Conmee, Marks and Strange, in the District of Thunder Bay, into lots of 320 acres each.

A base and meridian line extending eastwards from the Township of Pic, in the District of Thunder Bay, has also been laid down. The outlines of seven Townships at the head of Lake Temiscamingue, in the District of Nipissing, have also been run, the whole of which are reported to be good farming land, with a clay soil, level and free from stone throughout.

An exploration of the land lying north of Rainy River and Rainy Lake, in the District of Rainy River, has resulted in the discovery of at least 600,000 acres of a soil which cannot be excelled in any part of the Province.

The outlines of a number of timber berths, in the Districts of Algoma and Nipissing have been run.

Several minor surveys have been executed.

The returns of the above-named surveys have, so far as received, been examined and closed.

The particulars in relation to these surveys will be found in Appendices Nos. 14 and 15, pages 22, 23 and 24.

The Surveyors' Reports in relation to the surveys will be found in Appendices Nos. 19 to 34, pages 29 to 51, inclusive.

MUNICIPAL SURVEYS.

Four municipal surveys have been confirmed, and five instructions for same issued during the year, consisting of survey of town line between Pelham and Gainsborough; part of Second Concession line in Delaware, and the planting of monuments at the angles of certain lots in the Townships of Enniskillen, Moore, Osprey, Otonabee and East Whitby.

The particulars relating to these surveys will be found in Appendices Nos. 12 and 13, pages 19, 20 and 21.

MINERAL SURVEYS.

Patents have been issued during the year for 8,277 acres of land for mining purposes, principally near White Fish Lake and Rabbit Mountain, in the District of Thunder Bay, the purchasers having furnished to the Department Surveyor's plans, field notes and descriptions of the survey of the locations, as required by the "General Mining Act." (See Appendix No. 16, pages 25 and 26.

A report on mining operations will appear in the Annual Report of the Bureau of Industries.

COLONIZATION ROADS.

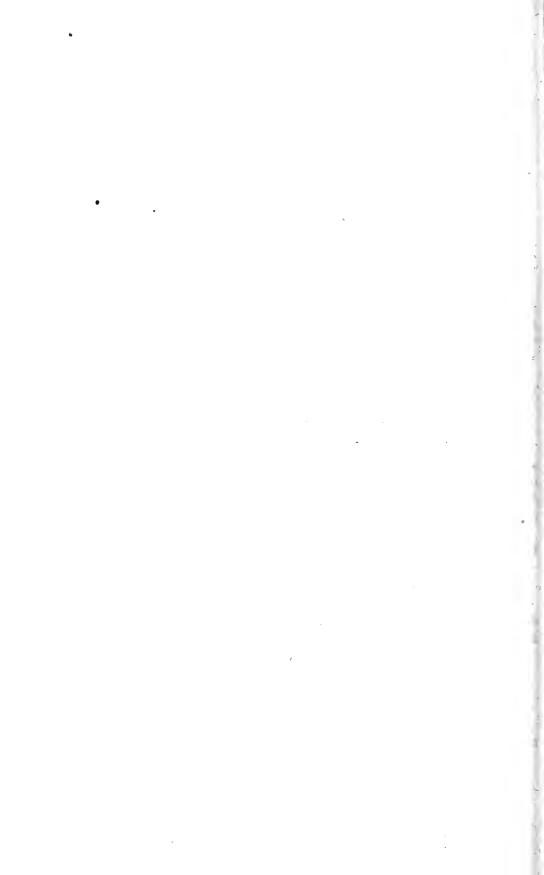

The total expenditure upon the construction and repairs of Colonization Roads for the past year was \$145,213.80. For details see Superintendent's Report, Appendix No. 35, pages 52 to 78.

Respectfully submitted,

T. B. PARDEE,

Commissioner of Crown Lands.

DEPARTMENT OF CROWN LANDS, TORONTO, 31st December, 1886.

Charles Joseph Murphy.

James Francis Whitson.
Bruce Allin Ludgate, Graduate
School Practical Science.
James Morley Mouat-Biggs, D.L.S.
James Lewis Morris, Graduate
School Practical Science.
Herbert Mahlon Burwell.

The Board of Examiners of Land Surveyors, for Ontario, meets at the office of the Commissioner of Crown Lands, on the first Monday in each of the months of January, April, July and October, in every year, unless such Monday be a holiday (in which case it meets on the day next thereafter, not being a holiday.) Section 6, Chapter 146, Revised Statutes of Ontario.

PRELIMINARY EXAMINATION.

All persons, before they can be apprenticed to a Provincial Land Surveyor, must pass a satisfactory examination before the Board of Examiners in the following subjects, viz.: Vulgar and Decimal Fractions, Extraction of Square and Cube Root, Practical Geometry, Euclid, Plane and Spherical Trigonometry, Mensuration of Superficies, and the use of Logarithms; correct Spelling and good Writing required.

FINAL EXAMINATION.

Final Candidates, before obtaining a License to practise, undergo a strict and searching examination before the Board of Examiners as to their proficiency in Euclid; Plane and Spherical Trigonometry; Calculations of Areas by means of the Traverse Tables, etc. Laying out and dividing up of Land; the adjustment and use of the Transit or Theodolite. Astronomy, including the calculations necessary to determine the latitude by meridian altitude of the sun, moon or stars, or by double altitudes; Method of determining Time; of finding the time when any star passes the Meridian, with the time of its Elongation, Azimuth Angle, and Variation of the Compass; the Method of Keeping Field Notes; Drawing up Descriptions by Metes and Bounds for insertion in Deeds; taking Affidavits in the matter of Disputed Boundaries; the Law regulating Surveys; Geology; and also as to their proficiency as Draughtsmen.

SURVEYORS' REPORTS.

(Appendix No. 19.)

COUNTY OF RENFREW.

RESIDUE OF THE TOWNSHIP OF HEAD.

Pembroke, Ontario, December 18th, 1886.

SIR,—I have the honour in accordance with your instructions, dated May 29th, of this year to submit the following report of the survey of the residue of the Township of Head.

I commenced the survey as directed by retracing the line between the seventh and eighth concessions run by Mr. Sinclair, from its intersection with the west boundary of the township of Rolph, westerly to the line between lots twenty and twenty-one; only two posts were found on this line, one between lots twelve and thirteen, and one between lots fifteen and sixteen, both marked on trees standing on the line. I planted new posts at the corners of the lots on both sides of the line, thence I retraced the line between concessions nine and ten, and thence the line between those concessions to the west boundary of the township of Head; all the posts on this line had been destroyed by fire and I replaced them by new ones; all the side road lines of Mr. Sinclair's survey intersected both these concession lines at unequal distances, which obliged me to make an irregular lot at each intersection, from the west boundary of the township of Rolph, to side road line five and six; the distance was 104.55 chains. I gave the overplus to lot number one, the other irregular lots are, numbers ten, fifteen, twenty, twenty-five, and so on to lot number forty. I was obliged to make these lots the same width in every concession in the survey, in order to avoid jogs in the side roads where I connected with Mr. Sinclair's survey.

In the survey of the upper portion of the township, the west boundary was continued about thirty chains into the ninth concession. I re-opened it to that point, and having obtained an observation of Polaris, I thence ran the west boundary on the course S. 20° 51' 40" E., planting posts at distances of one hundred chains for the alternate concessions to the south boundary of the township. From the west boundary I then ran the concession lines on the course N. 69° 08' 20" E., in regular order from the line between concessions seven and eight, until I reached the south boundary, and the side road lines on the course N. 20° 51' 40" W., and S. 20° 51' 40" E., from there intersections with the concession lines as the surveys was carried eastward, closing on the west boundary of the township of Rolph.

A few settlers are located in the sixth and seventh concessions, where there is a tract of pretty good land extending from the rear of the third to the front of the seventh concessions, and from lot number twenty-nine to lot thirty-six. Most of these settlers have resided on their claims for the last six years, and have erected barns and dwellings, and have cleared from eighteen to twenty-five acres each—their crops this year were very

good.

The timber on this tract is chiefly composed of birch, maple and beech, some large pine had been cut there years ago by lumbermen, but what now remains is of little value; originally the principal timber on the remainder of that part of the township over

which my survey extended was pine, generally of fair size and quantity, but the destructive fires which have visited the country, have left but few green trees. A thick growth of poplar and birch now covers the country where extensive lumbering operations were formerly carried on. A few years ago Mr. James Findlay erected a portable steam saw mill on lot number fourteen in the fourth concession, in the vicinity of which there was some pine which had escaped the fire, and built a tramway over which he conveyed his sawn lumber about two miles to the Canadian Pacific Railway, where it was shipped to market. But all the pine of any commercial value, within a radius of two or three miles of the mill, has been sawn into lumber, and I was informed that he intended to remove the mill into the township of Rolph this winter.

Besides the hardwood tract above alluded to there is but little land suitable for agriculture, the soil is generally sandy or gravelly, and is seldom free from stone; the surface of the country is rough, uneven and broken by bare rocky hills. Mackey's creek, the only stream of importance, enters the township where the ninth and tenth concession line intersects the west boundary and flows easterly, entering the upper portion of the township on lot number sixteen in the eighth concession, and finally empties into the Ottawa river near Mackey's station on the railway; it has been much used by lumbermen for

floating logs and squared timber to the Ottawa River.

On the plan I have shown the position of the Canadian Pacific Railway, where it enters and passes through the eastern portion of the fifth, sixth and seventh concessions.

There are three roads leading from this part of the township to Mackey's station, on which waggons can be used. The principal one enters the township near the southwest angle, a short distance from the Petewawa River, and passes north-easterly through the settlement on the tract of hardwood land before described and enters the tenth concession on lot twenty-three; it passes over no high hills, and could be made a good road at a small expense. Another road starts from one of Mr. Booth's old shanties on lot twenty-nine in the fourth concession; this road is not now used and does not pass through any land fit for settlement; the third road leads from Mr. James Findlay's mill, from the fourth to the seventh concession, and thence to Mackey's station, the road is in fair condition and is used by settlers taking lumber from the mill.

No minerals worthy of notice were observed, the rock formation is gneiss and

granite, the rock common to the Ottawa country,

Owing to the destruction of the timber by fires, I found it impossible to pick up any of the outlines of timber licenses in the course of the survey as directed by your instructions, except the line run by myself for William Taylor, in 1882; that part of the country was burnt before that date and no fire has occurred there since then.

I have the honour to be, Sir, Your obedient servant,

(Signed),

WILLIAM BELL, Provincial Land Surveyor.

The Honorable T. B. PARDEE, Commissioner of Crown Lands, Toronto.

(Appendix No. 20.)

COUNTY OF RENFREW.

RESIDUE OF THE TOWNSHIP OF MARIA.

Collingwood, Ontario, December 20th, 1886.

SIR,—I have the honour in accordance with instructions, dated May 29th, of this year, to submit the following report on the survey of the residue of the township of Maria, in the county of Renfrew.

I commenced the survey by retracing the line between concessions ten and eleven of this township as surveyed by Provincial Land Surveyor Duncan Sinclair, in 1859. I also retraced the west boundary of the township of Head, from its intersection with said concession line southerly as the east boundary of my work. Owing to fires having swept over this whole district since the former survey, nearly all the original marks at the corners of the lots have disappeared. I found, however, sufficient blazes to locate the lines, and in a few instances was able to find the positions of the original corners of the lots fronting on said concession line, and in such cases, I adhered to these as bases for my work. These original points are shown in the "notes" herewith, and account for the irregular widths of certain lots adjacent thereto. I then worked southerly to the south boundary of the township.

The whole township, with very few exceptions, is a brulé; fires at different times have swept over the whole of this and the adjoining townships to the east and west, leaving only standing dead pines and small, second growth poplar, birch, etc., where formerly

a vast quantity of valuable pine timber existed.

The general character of the country is rocky, and in some cases very broken, with hills of considerable height. The western part of the township, however, contains a fair per centage of moderately level land, but the soil is for the most part a light sand.

A number of small lakes are met with, but these are generally merely expansions of streams, the principal of which are Bissett's creek in the north-west part of the township, and Grant's creek in the eastern part. Both streams have been utilized by lumbermen for floating down their timber to the Ottawa River. No economic minerals were met with throughout the survey and no settlers have yet located within the limits of the work on which I was engaged.

A fair portage road runs south-westerly through the township, as shown on the plan. This road leads from Bissett station on the Canadian Pacific Railway to the Petewawa

River.

I could find no trace of the line between timber berths numbers two hundred and seventy-six and three hundred and sixty-four, owing, I presume, to my work not extending far enough south to reach it.

I have the honour to be, Sir, Your obedient servant,

(Signed),

E. STEWART, Provincial Land Surveyor.

The Honourable T. B. Pardee, Commissioner of Crown Lands, Toronto.

(Appendix No. 21.)

DISTRICT OF NIPISSING.

TOWNSHIP OF BRODER.

Ingersoll, Ontario, November 1st, 1886.

SIR,—I have the honour to submit to you my report of the township of Broder, in the District of Nipissing, surveyed according to your instructions, bearing date the 29th day of May, 1886.

From Ingersoll I proceeded by the Canadian Pacific Railway to Wahnapitae Crossing. Having Indians from White Fish Lake to meet me there with canoes, etc., we proceeded down the Wahnapitae River some miles; leaving the river, we followed a portage route crossing several small lakes into Long Lake, part of this lake being in my township. From here we portaged provisions, etc., into the south-east angle of the township, where I was instructed to commence my survey. With some difficulty I found the post for my

south-east corner, on P. L. S. Salter's base line. The post was burned and only a small portion of it left standing, but some of the Indians who were with me knew it to be the

proper post, as they had seen it before being burned.

From the south-east angle of my township I retraced P. L. S. Saiter's base line for my south boundary, to the south-east corner of Waters, following the old blazes, and cutting the line out wide and reblazing it well. I found Salter's base line not very straight and bending northwards from due west. My concession lines, which run into the east boundary of Waters, make a jog of some chains with the concession lines in the township of Waters. As instructed, I ran my east boundary on such a course as to strike the south-west angle of McKim; the bearing of this line is shown on the plan and field notes. My township being over six miles in width, I made all the lots on my sonth boundary forty chains in width, excepting lots eleven and twelve, which are wider, the overplus being divided between them. My eastern boundary bearing to the eastward, causes lot one to be of a greater width than forty chains, everything being shown fully on the plan and field notes.

I made a careful survey of all the waters within my limits. There being a number of lakes a great deal of time was spent in order to survey them properly. That portion of Long Lake within the township is the largest body of water; it commences at the west boundary, in concession eleven, and extends into the township about four miles, crossing the second, third and part of the fourth concessions. The water in some of the lakes is very clear, and all the lakes abound with fish, especially Long Lake, black bass, pike,

pickerel, etc.

The township, I may say, has been entirely over-run by fire, some of it the second time, and the timber is nearly all destroyed, the second growth being small poplar and birch. There are a good many pine trees standing in some parts which might be utilized for various purposes, but not in sufficient quantities or of such a quality as to be of much consequence commercially. There is very little green timber to be found in the township, and it is of little value, being small and of a scrubby nature. In the sixth concession, green timber, small spruce, is found on lot five; tamarac, on lot one; a few inferior pine in concessions two and three, lots six and seven, also in concessions one and two, lot twelve. In concession two, lots eight and nine, some green timber consisting chiefly of tamarac, birch, poplar and balsam.

On the whole, the township is rough and rocky, and could not be considered a township suitable for farming purposes. The rocks are of a granite formation. Where soil is met with it is of a sandy nature. In concession two the southern part of lot nine has some fair land, likewise in concession three a small portion of the south part of lot twelve has some fair land. In concession five some good land on lots four and five; lot one, same concession, is very level, soil sandy; the northern parts of lots four and five in sixth concession contains some good land, also on the south shore of Kelly Lake there is some fair level land, the remainder of the township is rocky and broken. Throughout the township there are other small flats of land, but being isolated and surrounded by rocky country, can hardly be available for farming purposes. The township, I think, would be more adapted for a grazing country than for farming. I saw no valuable mineral, although slight traces of iron could be seen in some places.

The Algoma branch of the Canadian Pacific Railway will give access to the township, it being about one mile north from the north-west corner. I found no squatters within the limits of the township, or Indians, the nearest settlement of Indians being at

White Fish Lake.

I have the honour to be, Sir, Your obedient servant,

(Signed),

W. R. BURKE,

Provincial Land Surveyor.

The Honourable T. B. PARDEE,
Commissioner of Crown Lands,
Toronto.

(Appendix No. 22.)

DISTRICT OF NIPISSING.

TOWNSHIP OF DEACON.

Sarnia, Ontario, October 23rd, 1886.

Sir,—I have the honour to report that in accordance with your instructions, dated May 29th, 1886, I have completed the survey of the township of Deacon.

In 1884 I surveyed the township of Lister, the eastern boundary of which township forms the western boundary of the township of Deacon, the posts of this line being the

points from which the several concession lines should commence.

I commenced the survey by taking an observation at the posts on the west boundary, concession line numbers twelve and thirteen, and ran a line N. 69° 8′ 20″ E. I then moved eastward, running the various side roads and concession lines in accordance with instructions, to, the east boundary which I ran S. 20° 51′ 40″ E., from the south-west corner of the township of Clara. I then moved to the west boundary, concession line number two and three, and after taking an observation at that point, I carried the work in the southern portion of the township eastward, intersecting the south boundary and the several concession lines with the east boundary.

I found that about one-half of the area of the township had been over-run by a very destructive fire about eighteen or twenty years ago, destroying all the valuable timber; it is now covered in most places with a dense growth of small poplar, white birch, cherry and balsam. The burnt portion extends from one to about four miles north and south of the Petewawa River, as shown on the accompanying timber tracing. The soil on this portion of the township is a very good sandy loam, except a small portion along the shores of the Petewawa River, which is very rocky. The balance of the township is well timbered, principally with hardwood and a large amount of valuable pine. I found some very fine tracts of land in the northern and southern parts of the township, the soil being a good sandy loam.

As will be seen by the plan, this township is well watered by numerous lakes and streams. The principal lakes being Cedar Lake, Trout Lake and North River Lake.

The Petewawa River intersects the township in a south-easterly direction, from Cedar Lake to Trout Lake, finally passing out of the township on the first concession.

All the lakes and streams are well stocked with trout.

About seventy-five per cent. of the land is fit for agricultural purposes.

There is already a fair waggon road from Deux Rivieres, on the Canadian Pacific Railway line to Thistle and Caswell's farm on Cedar Lake, which, with a small expenditure of money, could be made available for colonization purposes. I have marked this road on the p!an.

The geological formation is the usual Laurentian. There are no settlers in this

township.

I have the honour to be, Sir, Your obedient servant,

(Signed),

THOS. BYRNE, Provincial Land Surveyor.

The Honourable T. B. PARDEE,

Commissioner of Crown Lands,

Toronto.

3 (c.L.)

(Appendix No. 23.)

DISTRICT OF NIPISSING.

TOWNSHIP OF DILL.

Berlin, Ontario, November 1st, 1886.

SIR,—I have the honour in accordance with your instructions, dated the 29th day of May, 1886, to submit the following report of my survey of the township of Dill, in the

District of Nipissing.

I proceeded to Wahnapitae, on the Canadian Pacific Railway, by way of Toronto, Carleton Place and Mattawa. From here, with my men and provisions, I went down the Wahnapitae River in bark canoes and camped at a short portage within half a mile of the south boundary of the township of Dill.

Next morning, the 27th of July, I proceeded down the river to the south boundary, retracing it eastward in search of the post, at the south-east angle of the township of

Dill.

I found Provincial Land Surveyor Bell's six-mile post, from which I measured due east nine chains and fifty links, expecting to find Salter's post marked XLII. M, as replaced by Provincial Land Surveyor Bell, but after a diligent search failed to do so. From this point, I measured a distance of eighty chains westward, which is seventy chains and fifty links west of Provincial Land Surveyor Bell's post marked VI, M; took an observation of Polaris, and ran three miles due north (astronomically) between lots numbers two and three. I then worked northward and westward, at the same time retracing the south boundary, but finding no posts until reaching the south-west angle of the township of Dill. Here I found a surplus in the last mile of nineteen chains and tifty-four links, which, according to instructions, I divided equally between lots numbers eleven and twelve. Finding the surplus so much larger than was expected, I wrote to the Department of Crown Lands for further information, and according to instructions then received, made Bell's VI. mile post the south-east angle of the township of Dill. From this point I found that a line had already been run on a course of N. 0°.50' E., and upon retracing and chaining it, I discovered that it struck the south-east angle of the township of Neelon, and consequently made it my east boundary.

Taking the township of Dill as a whole, it is not well fitted for agriculture; yet good

soil, though light, exists in places along the Wahnapitae River.

This river enters the township on the north boundary at lot number three, running in a south-easterly direction, leaving the township at the east end of concession number three, and again entering at concession number two, running in a south-westerly direction and crossing the south boundary at lot number two. Its average width is about three chains, and the sides sink abruptly to a great depth. The current of this river is very slow and its waters have a dark colour, and abound with fish such as pike and bass.

Fire has devastated the whole of the north and west, leaving only a small portion of green timber in the south-east part of the township, and this is principally mixed timber

with a goodly number of red and white pine.

There are no lakes in the eastern part of the township, but they become quite numerous as the western boundary is approached. Their shores are either very rugged or marshy, or both.

I found no minerals worthy of notice or having any economic value, and the rocks

were principally of volcanic origin.

I have the honour to be, Sir, Your obedient servant,

(Signed). ISAAC L. BOWMAN, Provincial Land Surveyor.

The Honourable T. B. PARDEE, Commissioner of Crown Lands, Toronto. (Appendix No. 24.)

DISTRICT OF NIPISSING.

TOWNSHIP OF FRENCH.

Brockville, Ontario, November 1st, 1886.

SIR,—I have the honour to submit the following report on the township of French, in the district of Nipissing, surveyed by me this year in conformity with your instructions of the 29th day of May, 1886.

I proceeded by rail to Rutherglen, by the Canadian Pacific Railway, by canoe across Lake Talon, thence by timber road through the township of Phelps to the south boundary

of French, which is the north boundary of Phelps.

The south boundary was posted for the front of the first concession. I first ran the side line between lots number eight and nine north astronomically, making it a base from which the concession lines were run east and west. The work was then proceeded with easterly to the east boundary, making the line in front of the sixth concession a base from which the side lines were run north and south. I then ran south to the south boundary, making side line between lots numbers two and three a base, the closing errors in latitude and in departure being less than thirty links in each case, which errors were divided between the first and second concessions

The magnetic declinature varied from 7° 50° West, to 8° 05° West. The line between timber berths numbers two hundred and thirty-three and two hundred and thirty-four was traced across the third concession of the township, but the west boundary of berth number two hundred and thirty-three was not found on lot number eleven in the

first concession.

The north half of this township is drained by branches of the Jocko River, which falls into the Ottawa River about the middle of the south-westerly side of Seven League Lake. The south part is drained by the east and west branches of Balsam Creek, which after its junction with North River, empties into the Mattawa River between Turtle Lake and Lake Talon. A few lots in the eastern part of the township are drained by a branch of Antoine Creek, which joins the Ottawa River a short distance above Mattawa.

None of these streams are over fifty links wide and are not large enough for "driv-

ing."

The orly lake of one hundred acres area is situated in the north part of the town-

ship, which we named Lake Koko.

The surface of most of the township is rolling. The tract drained by the west branch of Balsam Creek is generally low, with a few hills. The country north-west of this depression is rolling and apparently much higher.

The south-east quarter of the township is a high, sandy plateau, with comparatively

few hills.

The only broken, rocky country met with was about a square mile, being the north part of lots numbers two and three in the fourth concession, and the south part of the same lots in the fifth concession.

In the south-east quarter of the township is a fair, sandy loam, with few stones, with little rock or swamp. I should estimate that about seventy-five per cent. of this quarter is tillable land. The south-west quarter is more stony, but with few swamps, excepting a narrow one up Balsam Creek. The north-west quarter is stony, with many swamps and marshes. About fifty per cent. of the land in these two quarters is fit for cultivation.

Many years ago, probably about one hundred, judging from size of green timber, most of the north-east quarter was burned over, and the soil that remains is a very light, sandy loam. In some places, however, there is nothing left but rocks, now moss-covered, with scattered and stunted timber. I do not think that over twenty-five per cent. of this quarter of the township is tillable land.

The south part of this township is in timber berth number two hundred and thirty-three, from which most of the good pine has been cut. In the north part of the township

there is some scattered pine of fair quality.

Throughout the township the timber on the hills and high land is chiefly maple, black birch, balsam and cedar, with a few hemlock, ironwood, clm and oak. Poplar and white birch are plentiful in that part of the township which has been burned over. In the low lands the timber is spruce, tamarac, cedar and birch, with a few ash and elm in "swales," that is in wet places on high ground.

Rock exposures were seen in the vicinity of the lakes in the north part of the township, at several points along side line between lots numbers six and seven, and as before mentioned, in the north-east quarter of the township. All these exposures were of

gneiss of the lower Laurentian group.

No economic minerals were met with.

This township is above the average of the district, and would soon become settled by agriculturists if proper steps were taken to open it up for settlement. The farmers of nearly all eastern Ontario, are finding out that it does not pay to raise wheat, and are devoting their attention to stock raising and dairying, and I cannot see why this important branch of farming cannot be carried on successfully in this part of the Nipissing district; the soil, being of a light, sandy loam, is conducive to quick vegetable growth, and can be depended on for raising roots and coarse grains, while the swamp lands, when cleared and drained, will grow grasses for hay. Nearly every farm lot has its creek, pond or lake, and enough pine for building purposes.

A very fair waggon road has been constructed by Messrs. Bronson & Weston, lumbermen from Mattawa, through the first concessions of the township of French, to a shanty situated on either lots number six or seven in the first concession. This road connects with sleigh roads running through the township of Phelps, to the head of Lake

Talon.

With very little improving these roads could be made good settler's roads. By continuing the waggon road westerly across the first concession of the townships of French and Mulock, to the government road now being constructed north-easterly from North Bay, the best parts of the townships of French and Mulock, and the north parts of the townships of Widdifield and Phelps, would be opened up to settlement, while by improving the winter roads through the township of Phelps, a shorter route would be made to the Canadian Pacific Railway.

I have the honour to be, Sir, Your obedient servant,

(Signed),

WILLIS CHIPMAN.
Provincial Land Surveyor.

The Honourable T. B. PARDEE, Commissioner of Crown Lands, Toronto.

(Appendix No. 25.)

DISTRICT OF NIPISSING.

OUTLINES OF TOWNSHIPS.

Haliburton, Ontario, November 29th, 1886.

SIR,—I have the honour to submit the following report on the survey of outlines of townships at the head of Lake Temiscamingue, in the Nipissing district, surveyed under your instructions of 29th May, 1886.

Leaving Haliburton on the 19th July and proceeding to Mattawa by rail, I started up the Ottawa River on the evening of the 20th, a party of twelve all told, with boat

and three canoes taking all my supplies with me. I reached the head of the Long Sault on the 23rd, and as the weather looked threatening, took the steamer Argo at 4 p.m. for Fort Temiscamingue, arriving there the same night. The following day 1 went to West Bay and camped, and stored my supplies at the portage between Lake Temiscamingue and Montreal River, at the mouth of Mill Creek.

On the 26th July, I commenced the outlines from the north-west angle of Lorrain, and carried on and completed the survey in accordance with instructions; the lines being run east and west and north and south, astronomically, and posts planted every mile. The numbers of townships will be seen on the plan of survey herewith, and the lines

were run in the following order :-

Line between twelve and thirteen, township one. South boundary of township one. West boundary of township one. Boundary between townships one and two. West boundary of township two. Boundary between townships two and three. Boundary between townships three and six. Boundary between townships six and seven. Boundary between townships two and seven. West boundary of township three. Boundary between townships three and four. West boundary of township four. North boundary of township four. Boundary between townships five and six. Boundary between townships four and five. North boundary of township five.

The details of survey will be found in the field notes, and on the plan and in the diary.

I am happy to be able to report nearly the whole of the seven townships outline to be good farming land, the soil being clay and the country level and free from stone. There is not, in my opinion, the equal of this tract of land now left in Ontario for settlement.

The timber is generally poplar, spruce, balsam, white birch, tamarac and cedar, the cedar and spruce being in places very large. Here and there some black birch and an occasional hard maple are met with. Along the Blanche River and Wahbee's Creek are to be found a few white oak, elm, soft maple and ash. The lake-shore along the east side of township seven, is fringed with pine, and a belt of this timber runs off to the northwest, as indicated on the plan. There is also a patch of good pine in the south-west corner of township five, and a considerable quantity in township number one. The townships outlined, however, are not pine townships, but farming townships that will one day be the home of a large population.

From a hill two hundred feet high on the west boundary of township one, and near the north-west corner of that township, a magnificent and very extensive few is to be had, overlooking the country for many miles, and away beyond a smoky line indicating the Blanche River. The appearance presented is that of a vast flat of poplar, with spruce and balsam, while away to the west and north-west are a few high hills of sombre green, which, by the aid of the telescope, we discovered to be clad with pine. Descending this hill we ran mile after mile, and township after township, and never got a glimpse of the country again, until we reached two more elevations on the south and north boundaries of township five.

From the hill at the north-west corner of township five, we got a grand view of the country up the Blanche River. It was brulé as far as the eye could see, growing up with poplar, white birch, tamarac, etc., and appears to have been burnt about fifteen years

ago.

From a tour I made up the river about eight miles, I observed that the soil was still clay and free from stone, and the country is dry and more rolling than within the limits of the survey. There is at least one tier of townships west of and two tiers north of the present survey apparently as good as and, I think, better than the country outlined.

The timber generally, on the tract outlined, is small, and I would suppose that nearly the whole country was burnt about fifty or sixty years ago; the largest timber is

probably in township one, along the lake shore.

The portion of territory tinted light green on plan along the Blanche is wet, and may be called at present swamp, but it is not really swamp as the clay was often within reach of a picket, and the opening of a few roads through it as settlement advances will make it dry ground.

Around the mouth of the Blanche River, and for some distance up stream, the land

is subject to overflow during high water.

The Blanche River is as its name implies, a muddy stream with clay banks, and is navigable to a point about eight miles above the limit of survey, where there is a rise of four feet, with some swift water below the fall. It is five and a-half chains wide where our first line crossed it about two miles from the lake, and fifteen miles farther up is two and a-half chains wide and eleven feet deep.

Wahbee's Creek, coming into West Bay, is about one and a-half chains wide for some distance up, and on 6th September was navigable for our row boat and supplies to north boundary of township two. Both this stream and the Blanche assume large proportions

in the spring of the year, rising fifteen or twenty feet above summer level.

There are no lakes within the survey, excepting the two crossed by the line in the

rocky south-west corner of township one.

Otter Creek and Wright's Creek, running through townships four, five and six, are streams about one chain wide and navigable for small boats beyond the limits of the survey.

There are a few clearings around the lake, as shown on plan, and a grist mill with circular saw attached in township one, the property of John Piché, most of the grain

ground coming from the Quebec side of the lake.

The geological formation along the south and west boundaries of township one is the Huronian. After leaving the west boundary of township one we were not troubled with any rock formations, but the clay overlies the limestone which breaks out and forms the shore line of township seven, and forms a prominent land mark at the promontory known as Wahbee's point; this stone will, I think, become valuable both for lime and building purposes. I found no traces of minerals.

The weather was not exceedingly warm at any time during the survey, excepting a few days in September. The first frost was on 15th September, and leaves began to fall a few days afterwards. Four inches of snow fell on 30th September, an unusual occurrence I was told, and lay until the third day thereafter, but weather was afterwards

warm and fine until the day I left the territory, the 11th October.

On the 3rd September I visited the settlement at the head of the lake on the Quebec side, and saw wheat and oats on the farm of Angus McBride, well-filled and nearly ready to cut. Wheat on another farm, sown on 7th May, was standing in the stock, and potatoes and garden stuff looked well. I saw an excellent crop of hay on the farm of Mr. Farr, in township one, on the 25th July, some of it cut and some standing. There was nothing in the climate, this year at all events, to prevent farming being successfully carried on in this section of the country.

Facilities for Settlement.—Hitherto the only means of access to this country, was by way of the Ottawa River, and the ascent of the rapids was a labourious undertaking, to say nothing of the danger attending it. Within the last few years however, steamers have been put on Lake Temiscamingue, and during the present year "The Temiscaming Colonization Co" have put small steamers on the water stretches of the Ottawa, and built tramways around the rapids with a six mile railway of three feet guage, to overcome the Long Sault, they have a small locomotive and passenger car upon it, and the baggage and freight are at present drawn upon a flat car. This is a Quebec enterprise and is wholly in that province, with the exception of seven hundred feet of tramway round the Mountain rapid, which is in Ontario. The line is in a great accommodation, and is

carrying in all the lumbermen's and other supplies, and carries passengers in connection with the steamer Argo, from Mattawa to Fort Temiscamingue for \$3.50 per passenger, and freight for \$1.00 per one hundred pounds. I came down with my party by this line, and made the trip from the Fort to Mattawa in a day and part of a night, the distance being about ninety miles. From Mattawa I returned to Haliburton by rail, on the 14th October.

Herewith are plan and field notes of survey, with accounts, transport vouchers and diary of survey.

> I have the honour to be, Sir, Your obedient servant,

(Signed),

A. NIVEN, Provincial Land Surveyor.

The Honourable T. B. PARDEE, Commissioner of Crown Lands. Toronto.

(Appendix No. 26.)

DISTRICT OF ALGOMA.

Township of Ermatinger.

CLINTON, ONTARIO, November 30th, 1886.

SIR,-I have the honour to submit the following report of the survey of the Township of Ermatinger, in the District of Algoma, in accordance with instructions dated May 29th, A.D., 1886.

The Township of Ermatinger is situated south of the Township of Hart, and west of the Township of Cascaden, both of which townships were surveyed by your Department in 1885. On the south it is bounded by Salter's old base line, surveyed in 1857, and on the west by unsurveyed lands of the Crown.

The north-east angle of the township is about five miles west of the Canadian Pacific

Railway.

The Township of Ermatinger is rough and rocky throughout, and the north-east half thereof has been burned at different times, although there is still quite a quantity of green pine standing.

The south-west half of the township that has not been burned, is timbered chiefly with

birch, some maple, pine, (red, white and pitch), spruce, and balsam.

A creek, from thirty links to one chain wide, traverses the township, entering on the north boundary about one mile west of the east boundary, and pursuing a westerly and slightly southerly direction to lots numbers ten and eleven, concession number five, then turning about due south, leaves the township about half a mile east of the west boundary, receiving also a feeder on lot number eleven, concession number four, of almost the same size as the main creek. There being always a fair supply of water in this creek, I consider that it would be of great advantage in taking out saw-logs and square timber from the adjoining country.

Besides the large lake on the south-east corner, there is another of about the same extent a mile and a quarter to the north-west, and also several smaller lakes to the north-

east of the last mentioned.

The south-west portion of the township is peculiarly free from any large bodies of fresh water.

The westerly three and a-half miles of Salter's old base line were very easily retraced, but the fire has completely obliterated the two and a-half miles to the east, in fact there is nothing left standing but dead pine. The new growth indicates the burn to be between seven or eight years old.

There were no minerals of economic value met with in the prosecution of the survey. I do not consider the Township of Ermatinger to be well adapted for agriculture.

I have made a rough estimate of the standing pine as between twelve and eighteen

million feet.

I was instructed to connect my lines at their intersection with Salter's old meridian, with the posts planted on the survey of the Township of Cascaden, immediately to the east of Ermatinger. It was with some difficulty that I found Salter's old meridian at all in some places, and with one exception I was unable to connect with the corresponding post in the Township of Cascaden, namely, at the line between concessions numbers four and five.

The whole of the season was exceedingly wet, there not being an interval of twenty-

four hours without rain falling.

Hoping that this report and the accompanying plans and field-notes will meet with your approval,

I have the honour to be, Sir, Your obedient servant,

H. B. PROUDFOOT,
Provincial Land Surveyor.

The Honourable T. B. Pardee, Commissioner of Crown Lands, Toronto.

(Appendix No. 27.)

DISTRICT OF ALGOMA.

TOWNSHIP OF GRASSETT.

Leamington, Ontario, December 15th, 1886.

Sir,—I have the honour, in accordance with instructions from your Department, bearing date the 29th day of May, 1886, to submit the following report on the survey of

the Township of Grassett, in the District of Algoma.

Leaving here I proceeded by steamer to Sault Ste. Marie; thence by one of the Collingwood line of steamers to the village of Thessalon, on the north shore of Lake Huron, where I obtained my supplies and most of my men, and from thence we proceeded inland by team to Mr. Ainsley's farm on the Mississaga River, in the Township of Wells. Here taking canoes, we proceeded down the Mississaga River about three miles to the mouth of Little White River.

Thence up the last named river to the north boundary of the Township of Parkinson, which we followed eastward and found the corner post standing that was to

form the south-east angle of my township, and the starting point of my survey.

Commencing at this point I retraced westward the north boundary of the Township of Parkinson, and planted durable posts, as instructed, for the front angles of the lots on the first concession, and having succeeded in obtaining an observation at the south-east angle of lot number four, I ran the line between lots numbers four and five, and the other lines between lots instructed to be run due north, astronomically, to Provincial Land Surveyor Salter's base line.

Retracing out this base line, I was unable, after making diligent search therefor, to find any trace of Provincial Land Surveyor Salter's XCVI. mile post, so I decided to plant a post at the distance of six miles from the post marked CII. (which I found standing at the north-east angle of the Township of Gould), making this the north-east angle of my township, and having found the course by calculation, I ran a line north 3° 37' west, astronomically, from the south-east corner post to connect therewith, thus forming my

east boundary, and from the posts planted therein I ran out the lines in front of the several concessions due west, astronomically, planting durable posts for the front angles of the lots, as instructed.

The east boundary of Gould I also retraced for my west boundary, and ran around

the mineral location which juts into the township, as instructed.

The township is rocky and broken, with small patches fit for settlement or cultivation,

of a light sandy soil and widely separated by rocks.

The timber is principally scrubby, consisting of small balsam, tamarac, cedar, spruce, hemlock, and pine, with small tracts of hard maple and birch. In the north-west portion of the township a few good pines are to be found, but much scattered.

No trace or indication of valuable minerals were seen, the principal rock being gneiss. Little White River flowing through the south-east portion of the township is a very rapid stream, averaging about three chains wide, and forms the outlet for the waters of the greater part of the township, and at time of low water is very difficult to navigate with canoes.

The variation of the magnetic needle was very regular during the survey, being 3° 30' ast

Accompanying this report you will find a plan and field-notes of the survey, which, I trust, will prove satisfactory, and meet with your approval.

I have the honour to be, Sir, Your obedient servant,

> ALEXANDER BAIRD, Provincial Land Surveyor.

The Honourable T. B. PARDEE,
Commissioner of Crown Lands,
Toronto.

(Appendix No. 28.)

DISTRICT OF ALGOMA.

TOWNSHIP OF MONTGOMERY.

Toronto, Ontario, December 8th, 1886.

SIR,—I have the honour, in pursuance of instructions received from your Department, dated at Toronto the 29th day of May, 1886, to submit the following report:

I commenced the survey of this township at the south-east angle thereof, as per instructions, by retracing northerly the easterly boundary, and at the distance of eighty chains ran due west (astronomically) the line between concessions one and two. With this line as a base, I sub-divided the township into blocks of about one mile square each, by running all side lines due north and south and all concession lines due east and west, as shown in red lines on projected plan accompanying instructions.

The existing boundary lines of townships, as already run, were in all cases adhered

to, eausing the adjacent lots to be of irregular dimensions.

The township is very much broken by rocky bluffs and ridges and numerous lakes,

the percentage of level land being very small.

The lakes are all sizes, from mere ponds to others of two miles in length; they are generally irregular in shape, with rough rocky shores, and water of good quality, but few fish found in them. Twenty of these lakes were met with in this one small township, and a trigonometrical survey made of each.

Owing to the broken face of the township as a whole, but a small portion of it is

suitable for agricultural purposes.

Between Lake Williamson and the western boundary there is a small tract of fairly good sandy loam.

The township is well timbered throughout. There is a large belt of merchantable pine on the west end of Lake Chiblow, and extending westward therefrom for a distance of about three-quarters of a mile. To the west of this the pine is more scattered. Around the southerly end of Lake Bernard, and extending about a quarter of a mile back from its shores, there is some pine of fairly good quality.

Swamps occur at intervals, with cedar, tamarac, spruce, etc. We saw no minerals or indications thereof of any value.

At present there are no settlers in the township.

A plan of my survey, and a tracing thereof, showing in colours the prevailing timber, also field notes of the entire survey, are transmitted herewith.

I have the honour to be, Sir, Your obedient servant,

> THOS. B. SPEIGHT, Provincial Land Surveyor.

The Honourable T. B. PARDEE, Commissioner for Crown Lands, Toronto.

(Appendix No. 29.)

DISTRICT OF ALGOMA.

TOWNSHIP OF MORGAN.

-Windsor, Ontario, September 18th, 1886.

SIR.—I have the honour to submit the following report of the survey of the Township of Morgan, in the District of Algoma, surveyed according to your instructions, dated

May 29th, 1886.

I proceeded by way of the Canadian Pacific Railway to the crossing of the Vermillion River, thence up the river in canoes, to the north boundary of the Township of Balfour. I commenced my survey by running the line between lots four and five due north, and made this the base of survey, running the concession lines at right angles to this, or due east and west. Finding my east boundary not very straight north of the second concession, and that it deviated eastward, I planted the posts between lots one and two, forty chains from the line between lots two and three, and left the overplus in lot number one.

I did not plant a post where I was instructed Salter's twelve mile post should stand, as I found the distance less than six miles from the north-east angle of the Township of Balfour; and as I found no trace of any bearing tree at this point, I concluded to plant

the post for the north-east angle as shown in field notes.

This township, although mountainous, still contains considerable good land, and will compare favourably with any of the neighbouring townships. The land in the vicinity of Vermillion River being especially good, the soil being sandy loam quite free from stone or rock. Nearly the whole of this township is covered with green bush; excellent pine in large quantities is found in several places throughout the township.

The pine is above medium in size, very straight and sound, and on account of its close proximity to the Canadian Pacific Railway via the Vermillion River, should be of considerable commercial importance. The remaining timber is balsam, spruce, birch,

maple, cedar and tamarac.

There is a small area of burnt country at the south-east and north-east angles of the township, which does not present a very inviting appearance, being rocky and covered with a thick undergrowth of poplar, birch, spruce, etc.

The township is well-watered with numerous small lakes and creeks, the water being remarkably clear and of good quality.

The prevailing rocks are gneiss, no minerals of economic value were met with.

Accompanying you will find field notes, plans and other returns, which I trust will prove satisfactory.

I have the honour to be, Sir, Your obedient servant,

(Signed),

JOSEPH DEGURSE, Provincial Land Surveyor.

The Honourable T. B PARDEE, Commissioner of Crown Lands, Toronto.

(Appendix No. 30.)

DISTRICT OF ALGOMA.

TOWNSHIP OF OTTER.

Orillia, Toronto, October 28th, 1886.

Sir, -As directed by your instructions dated 29th May last, to survey the Township of Otter, in the District of Algoma, into lots of 320 acres each, having a frontage on

concession lines of forty chains and a depth of eighty chains.

I commenced survey on the 30th July, at a balsam post alongside the original post (cedar), being the north-east angle of the Township of Haughton, and the south-east angle of the Township of Otter: from this point I proceeded regularly in accordance with instructions; I traced the northern boundary of the Township of Haughton westerly, planting my posts at regular intervals thereon, until I came to the birch post at the northwest angle of Haughton, leaving lot twelve a frontage of only twenty-seven chains and

Returning to the south-east angle of the Township of Otter, I took an observation of Polaris, then ran the eastern boundary of township on a course due north astronomically,

under a repeated observation at post between the fourth and fifth concessions.

From this eastern boundary, concession lines were started at intervals of eighty chains, and continued on a course due west astronomically, and side lines were run at right angles thereto. Survey was terminated on 18th September.

I now beg to submit the following report on the general features embraced within

the limits of ny survey :--

The surface of township throughout is rough and rolling, broken by rocky ridges varying in height from 100 to 300 feet.

The soil may be classed as sandy loam, generally shallow; a few places were met with where it was a good rich sandy loam, occasionally verging into a clay loam, with deep soil.

The timber of the north-west part of the township has been destroyed by fire, and overgrown with a thick growth of poplar and white birch; occasional clumps of hardwood timber thoughout this area have escaped injury by fire. The timber in the south and south-eastern parts of the township has not been overrun by fire; it is large, being composed chiefly of maple, black birch, cedar, spruce and pine, this latter timber has been called over for board timber; as a rule all classes of timber now on this area are more or less shaky and unsound in heart, consequently of little commercial value, only suitable for fuel or rails; however there are some scattering pine thoughout this area suitable for saw-logs.

The township is well-watered throughout with springs, creeks and numerous lakes; the water of lakes is clear and fresh. The Mississaga River flows in a south-westerly direction across the south-eastern corner of township; this river has an average width of five chains, flows very rapidly and is a continuation of rapids, and rises in spring about ten feet above its ordinary state. The waters were traversed with a Rochon Micrometer. I found no settlers or clearings within the township.

The whole area may be described as being composed chiefly of granite rocks, these, however, have been subjected to violent dislocations and upheavals, which give to the country a very rugged and broken appearance. The geological character of the region is

very favourable for the occurence of various minerals.

Specimens of minerals forwarded to your Department, numbered one and three, were obtained in a vein of quartz rock cropping out on lake shore, underlying the granite formation. Specimen numbered two was obtained on the south-west shore of same lake. For position where specimens were obtained, see field notes, page fifty-eight.

The country to north is much broken by high bluffs and ridges and appears to have been overrun by fire for some distance; that to east is not quite so rugged; timber not

destroyed to any extent by fire.

I have the honour to be, Sir, Your obedient servant,

(Signed),

A. G. CAVANA.
Provincial Land Surveyor.

The Honourable T. B. PARDEE, Commissioneer of Crown Lands, Toronto

(Appendix No. 31.)

DISTRICT OF THUNDER BAY.

BASE AND MERIDIAN LINES.

NAPANEE, ONTARIO, November 8th, 1886.

Sir.—I have the honour to submit the following report on survey of Base and Meridian Lines, in the District of Thunder Bay, performed under instructions from your

Department, dated the 29th day of May, 1886.

I started from Napanee, on Tuesday, June the 22nd, for the purpose of purchasing my supplies in Toronto, intending to proceed to Collingwood on Friday, and sail on that day per steamer City of Owen Sound; and for that purpose I instructed two men to go to Napanee, on Thursday, the 25th day of June. On my arrival in Toronto, I found that the steamer could not leave until the following Tuesday, and as it was impossible to get word to the men, I had to allow them to go to Napanee and wait there until Monday, the 28th day of June. One Monday they, together with another man from Napanee, and Mr. D. A. Ross, of Mount Forest, joined me in Toronto. On Tuesday morning we went to Collingwood and sailed by steamer, City of Owen Sound, on the same day for Heron Bay. While we were at the Sault Ste. Marie, I hired four more men, as I had information from along the Canadian Pacific Railway, that it was not safe to trust to being able to obtain men there, as the contractors were paying higher wages than my instructions allowed me to pay.

Arriving at Heron Bay on Friday, the 2nd day of July, I went down to the Pic Reserve and hired two Indians. On Saturday morning, I left Heron Bay and walked down along the Canadian Pacific Railway line, for the purpose of finding my starting point, which I did, leaving the men to bring up the supplies, a distance of about eight

miles, they arriving on Saturday evening.

On Monday morning I obtained an observation and commenced work along the base line. I continued this base line east astronomically, for a distance of twenty-four miles,

when upon receiving instructions from your Department, I tried a meridian line north for six miles, and as it then fell into White Lake, I returned to the base line and continued it east to the thirty-six mile post; I then returned to the eighteen mile post and ran a meridian line north astronomically for a distance of twelve miles.

I then returned home by the Canadian Pacific Railway to Peninsula Harbour, by the

steamer City of Owen Sound to Collingwood, and then via Toronto to Napanee.

Astronomical observations were taken frequently as the work progressed. The lines were run with transit, and were well cut out and well blazed. All posts planted at six mile points were well protected with stones, when they could be had.

The distances across water were at first measured both by Stadia measurement and by triangulation, and as I could find no difference in the results from the two methods,

after repeated trials, I discarded the triangulation system for short distances.

The base line crosses the Canadian Pacific Railway five times, and at no place for

thirty miles is it more than two miles and a-half from that road.

The land in the swamps and on some of the slopes is of a fair farming quality, but upon the high hills it is rocky and shallow. The land lying north and south of the base line, from the twelth to the twenty-fourth mile and east and west of the meridian line (north of eighteen mile post), is of a good farming quality, being much the best that I found.

The land is principally sandy along the Canadian Pacific Railway, and wherever the horses were fed, and around the shanties, the hay and grain were growing well, and I have rarely, if ever, seen such a good quality of clover. Employees of the Canadian Pacific Railway Company tell me that all garden produce grows well.

The timber along the lines consists of balsam, spruce, tamarac, white birch, etc., with a few Norway pines and poplar. I came across no specimens of rock that I considered would be of any benefit to bring home, the prevailing rock being granite, some of which would work up into very beautiful monuments.

Fish were plentiful in White Lake and White River. Partridges and rabbits were plentiful, and a few bears were seen. I also came across a number of beaver, muskrats, otter and mink, and a few tracks of cariboo.

The weather was all that could be desired.

Accompaning this report, I beg to submit plan, field notes, diary, pay-list, transport, vouchers and account, as per instructions.

I have the honour to be, Sir, Your obedient servant,

(Signed),

F. F. MILLER, Provincial Land Surveyor.

The Honourable T. B. PARDEE, Commissioner of Crown Lands, Toronto.

(Appendix No. 32.)

DISTRICT OF THUNDER BAY.

TOWNSHIP OF CONMEE.

PORT ARTHUR, ONTARIO, November 4th, 1886.

S1R,—I have the honour to report that in accordance with instructions received from your Department, dated 29th May last, I have made a sub-division survey of the southern

portion of the township of Connee. This township lies immediately west of the township of Oliver, in the district of Thunder Bay, and the sub-divided portion contains a total area of 25,634 acres.

As will be seen from an inspection of the accompanying topographical and timber plans, the land is rolling, with occasional small cedar and spruce swamps and patches of muskeg. Along the western boundary rocks and hills predominate, chiefly gneiss to the south, and jasper on the north. This jasper might prove of economic value for ornamental purposes. The part surveyed is well watered, and, except in the north-west part, is well timbered likewise, and the lie of the land is favourable, being southerly and easterly.

The soil on at least seventy-five per cent. of the township is suitable for farming purposes, and the township, as a whole, may be considered as above the average of agricultural lands in this district. The eastern half of the township is more especially adapted for settlement, being heavy clay overlaid with vegetable mould. In the northwestern portion sandy soil predominates. Numerous small streams traverse the township, Brulé Creek on the north, and Cedar Creek on the south-west, being always amply sup-

plied with water.

With the exception of the north-western part of the township, which is covered with a very small growth of poplar and birch, and a small portion swept by fire on the north, the timber, which is chiefly poplar, birch and spruce, is of large growth. An occasional white pine is to be seen, but they are too few and scattered to be worthy of more than passing notice. A saw mill across the Kaministiquia River, at the southeast corner of the township, would supply incoming settlers with building lumber, etc., at a convenient place. At several points on the Kaministiquia River, as well as along the lower part of Brulé Creek, excellent water power for either grist or saw mill purposes can be had.

The only means of access to the surveyed part of the township at present, is by the Oliver road, which terminates at the Kaministiquia River at the southeast corner, and several settlers, availing themselves of the navigable stretch from this point north, have taken up farms and made improvements on lots B, C and D, in the first concession, and lot E in the second concession, and have erected three good log shanties; others will probably follow shortly now that the land is laid out for them. The settlers from the township of Oliver, who were employed on the survey party, considered that the eastern part of Conmee township was superior to the average class of land in their township. The vegetables to be seen at the several clearings were sufficient evidence of the excellence of the soil.

I have the honour to be, Sir, Your obedient servant,

(Signed),

A. L. RUSSELL, Provincial Land Surveyor.

The Honourable T. B. Pardee, Commissioner of Crown Lands, Toronto.

(Appendix No. 33.)

DISTRICT OF THUNDER BAY.

TOWNSHIP OF MARKS.

Napanee, Ontario, October 13th, 1886.

SIR,—In accordance with instructions from your department, dated May 29th, 1886, to proceed to and survey the township of Marks, in the district of Thunder Bay into farm lots of 320 acres each.

I left Napanee on the 24th day of June, taking two chain men, one assistant and a cook, travelling by Grand Trunk Railway to Toronto, thence by Canadian Pacific Railway and steamers to Port Arthur, where I secured axemen, thence by Canadian Pacific Railway to Murillo, where I hired teams and travelled by the new colonization road to the south boundary of the township of O'Connor, from this point all supplies had to be packed, five miles to the south-east angle of the township.

I began operations on the morning of the 7th of July by running the side line between lots numbers two and three, due north about one and a-half miles. I next ran side line four and five north about one mile and three quarters; I then ran side line six and seven north about one and a quarter miles. I next started from the eastern boundary eighty chains north of the south-east angle, and ran the line between concessions one and two due west. I thus continued to carry up the side lines and concessions to the north and west, as far as the north-west angle, thence to the north-east angle of the township, where I finished my work on the evening of the 21st of August, making the concessions eighty chains in depth, and the lots forty chains in width as nearly as practicable.

Observations of Polaris and of the sun were taken as often as was thought necessary to secure accurate work, the details of which will be found in their respective places in the field notes.

Where lines crossed lakes, the distances were obtained by means of Stadia hairs fitted in the telescope of the transit, so adjusted that four inches on the rod just exactly equalled one chain, repeated tests having shown that the Stadia measurement for short distances is more accurate than any other micrometric method or triangulation with ill-assorted triangles.

The south-easterly one-third of the township, comprising about 8,000 acres, is a comparatively level section of country, the land being gently rolling, the soil a rich black clay loam, well adapted for farming purposes. The underlying rock is chert. The northerly and westerly two-thirds is rougher, with high hills of granite and trap rock, over-laid with a light covering of sandy soil and boulders, and is not adapted for farming purposes.

Numerous bands of quartz are found through the granite knolls, but apparently they carry no economic minerals, on side lines six and seven, concession one, is found a ridge where an exposure of a vein carrying small specks of zinc blend, and probably silver may be seen.

From the large variation of the needle amounting to 135° in a number of places, I am inclined to think that vast beds of magnetic iron ore will be found in this township, as it is scarcely probable that such a large variation would be caused by the presence of the small pieces of magnetite usually found associated with trap rock. One peculiarity which I have never seen noted before, was the constant variation; it was quite a common thing to see the needle 15° off the course for a distance of fifteen or twenty chains before any change in the variation would be noticed, when it would veer over suddenly to the opposite side of the pole and record 5° for a distance of ten or fifteen chains.

The township is well watered by numerous small rapid-running creeks, and several large ponds, the water in every case being clear, cold and wholesome, the source of supply being mostly from springs.

Brook or speckled trout were the only fish seen, but of these there was a great abundance. Of fur-bearing animals the only representatives seen were the beaver and fisher.

No signs of the common red deer were seen, plenty of caraboo tracks were run across showing them to be quite numerous.

Bears were also plentiful: of the smaller game partridge were the only variety seen. This whole section of the province was over-run with fire about one hundred and fifty years ago, and is now grown up with almost tropical luxuriance, birch, white and yellow, spruce, poplar, jack-pine, tamarac, balsam, with an occasional white pine, forming the larger growth. Many of the spruce and tamarac are fine, large trees, suitable for lumbermen's purposes.

The poplar, from its whiteness and long, clear growth, is particularly well suited for the paper manufacturers; the undergrowth is composed of hazel, dog-wood, small balsam,

and soft maple, and so very thick that it was most difficult to cut lines through.

In the vicinity of this township there are at present four mines at work, employing quite a number of men, and constantly increasing. The Canadian Pacific Railway station at Murillo, is only twenty-five miles distant. A government colonization road passes within five miles of the south-east angle of the township. The new projected Thunder Bay Colonization Railway passes about four miles to the south. By the construction of about four and one-half miles of road, easy access can be had to the whole of the good land, and as there are also large sections in the adjoining township suitable for settlement there is little doubt that in a few years the whole section will be taken.

> I have the honour to be, Sir, Your obedient servant,

(Signed),

M. J. BUTLER, Provincial Land Surveyor.

The Honourable T. B. PARDEE, Commissioner of Crown Lands, Toronto.

(Appendix No 34.)

DISTRICT OF RAINY RIVER.

EXPLORATION OF LAND LYING NORTH OF RAINY RIVER AND RAINY LAKE.

(Interim Report.)

Belleville, Ontario, December 1st, 1886.

SIR,-I have the honour to report that in accordance with your instructions dated May 29th, 1886, I have explored the lands lying north of the surveyed townships on

Rainy River, and also the country lying north of Rainy Lake.

I proceeded first to Rat Portage, where I procured the necessary supplies and canoes, and hired some men to assist in moving camp, etc., and then went across the Lake of the Woods to the south shore of Sabashkong Bay, pitching my first camp at the mouth of Split Rock River, and from here explored the country south to the forty-ninth parallel, and eastward to the canoe route which leads from the easterly end of Sabashkong Bay to Fort Francis. I then followed the southerly shore of the Lake of the Woods westward to the mouth of Rainy River, stretching inland sufficiently often to obtain a good general idea of the nature of the country and timber. I ascertained in this way that the land lying north of the forty-ninth parallel is generally of a very poor description, with the exception of some good patches in the vicinity of the Indian Reserve on Big Grassy River; while the timber is generally poplar and jack-pine of small growth. I first encountered good land at the point where the forty-ninth parallel or the first base strikes the Lake of the Woods, and following up Little Grassy River, which empties into the lake a couple of miles south of this point. I found, from travelling in every direction, that the block of four townships composed of townships one and two south, ranges twenty-three and twentyfour east, contains a large percentage of the finest land I have ever seen, and the same description applies to the block of land lying westward between these townships and the Lake of the Woods. Little Grassy River is navigable for canoes for a distance of about eight miles from its mouth, and the land on the shore is all good, being composed of a rich calcareous drift formation, equal to any soil in the best agricultural districts of Ontario.

The timber along the river is chiefly large thrifty poplar, mixed with some scattering oak and swamp elm, and some evergreens such as balsam and spruce; inland the timber changes in character somewhat from that along the river shore, as large balm of Gilead, spruce, balsam and tamarac are met with more frequently, and the nice open bush which prevails along the river banks is changed for a tangled brushy undergrowth; but the character of the soil remains the same. Tamarac and spruce swamps occur frequently in this section of the country, as is the case all through this large level area of good land which lies along the banks of Rainy River. These swamps were all perfectly dry this summer, and are nearly all capable of being made into excellent land by drainage, as they lie nearly as high as the surrounding dry lands, and only require proper ditching to take the surface water off in wet seasons. The extreme levelness of the country causes the presence of so much swamp land here, as the surface water has no means of escaping from the low-lying portions, and consequently the growth of moss and swamp timber is engen-I noticed that in most cases the beds of the little streams are deep enough to form outlets for ditches and drains, and these creek beds are usually so numerous that to drain any swamp no very long ditches would be required; in nearly all the swamps through which I passed I observed the soil to be a black vegetable mould, varying in depth from one to three feet, and always underlaid by the same calcareous clay above I seldom met the muskeg proper, that is to say, the wet shaky bog in which water is present at all seasons of the year, and which grows nothing but dwarf spruce and I then paddled up Rainy River, and on both shores I found the same kind of country as I have described as being in the vicinity of Grassy River, and as there are a good number of settlers along the river on the Canadian side I had an opportunity to observe the soil while under cultivation, and to see the kind of crops it is capable of raising.

The soil I found to be most excellent in character, calcareous clay overlaid by a thin streak of whitish fine earth about six inches in thickness, and this again covered with a a coating of vegetable mould, and these three mixed up together in the working of the land form a soil which cannot be excelled in any part of the Dominion. I saw along the river crops of potatoes, turnips, hay, oats, wheat, corn, tomatoes, and cabbage all grown to perfection this season, which shows that the climate, as well as the soil is suitable to successful farming, especially when tomatoes ripen as they certainly did this year as well

as I ever saw them ripen in the vicinity of Lake Ontario.

As I went up the river I frequently travelled inland several miles, and at the easterly side of township three, range twenty-four, I penetrated northward to the section I had explored from Grassy River, and found that the calcareous clay formation extends at this point clear from the Lake of the Woods to Rainy River, a distance of over twenty miles in a straight line; I found a tremendous bush fire raging along the first correction line south, which was destroying everything before it; in fact bush fires were very frequent in this part of the country this season owing to the extremely dry weather. There is an area of pine land in here a little north of the first correction line south, where the soil is inclined to be sandy, but the extent of this tract is not very large.

Along the line dividing ranges twenty-six and twenty-seven the good land extends back some twelve miles from the river, but towards the north-east corner of township three the rough regions begin to appear, and away to the northward the country is broken

and rocky, and the good land disappears.

Township three and the north part of township four, range twenty-seven, have been burnt over some years ago, and are now grown up with small second growth of poplar.

Townships four in ranges twenty-eight, twenty-nine and thirty, are mostly all good land; while townships three in the same ranges are generally broken with rocky ridges, but contain some excellent land in the valleys among the hills: townships two, ranges twenty-seven and twenty-eight, also contain some good land although broken by rocky hills.

A straight line drawn from the south-west corner of the large Indian Reserve on Big Grassy River to Fort Francis would approximately form the north boundary of the good belt of land, while almost all the country lying between this line and the Rainy River and the Lake of the Woods is good agricultural land. This tract of country is over sixty

miles long, and averages over fifteen miles wide, and contains over nine hundred square miles, or something like six hundred thousand acres, and has a water frontage on the Lake of the Woods and Rainy River of over one hundred miles. Of this area perhaps thirty per cent is swamp, most of which can be drained and made tillable land, rocky ridges occur very rarely, and the soil is all a limestone clay such as I have described. No limestone rock in place has been observed, but loose limestones containing fossils are frequently to be met along the rivers, and the settlers along Rainy River pick them up and burn them into excellent lime; in fact this whole district is a glacial drift.

The timber is chiefly poplar which grows to a great size; I have seen trees over eighteen inches across the stump and sixty feet long clear of limbs. Balm of Gilead, too, prevails in some sections, while spruce, tamarae and balsam of thrifty growth are everywhere met with. In some places magnificent cedar abounds large enough for telegraph poles, shingle bolts, or any other use to which cedar is applied; there are some groves of pine through this section but it cannot be called a pine country, that is, on this drift formation.

North of the above imaginary line the country is all rough and broken with valleys of clay land occurring oceasionally among the ridges, especially along the margins of creek beds; east of the line dividing ranges twenty-six and twenty-seven there is a good deal of pine, although in some places the fire has been through and destroyed much valuable timber; all round the north-west bay of Rainy Lake, and round the chain of waters stretching from this bay to the south-east corner of the Lake of the Woods, I saw a considerable quantity of pine, both red and white, and in the country lying between this chain of lakes and the north bay of Rainy Lake pine is present almost everywhere, but not

often in large thick groves.

I explored all the country north of Rainy Lake, nearly as far north as the forty-ninth parallel, and eastward to what is called Sand Island River on the map, and up the Seine River to Sturgeon Falls; I travelled inland through this section of the country sufficiently often to get a good general idea of the land and timber. There is not much good land all through this region, that is, in large blocks, although patches of excellent clay land of from fifty to one hundred acres are met with frequently among the hills, but this clay is never the calcareous clay of the Rainy River drift. The only place I found a large tract of good land is on the bank of Sand Island River, extending from near the mouth of the river up stream for about sixteen miles, with a width of perhaps two miles; this tract is broken in places with rocky ridges, but this soil is a good clay loam and free from stone. This tract of good land has all been burnt over and is now grown over with small poplar, all the rest of this country lying north of Rainy Lake may be described as a rough, rocky region, which in some places is utterly denuded of timber by forest fires. There is a considerable quantity of pine in all this section of country; all along the eastern shores of the north bay of Rainy River scattering pine is met with, and a good deal of lumbering has been done in the vicinity of the lake.

On the chain of water connecting Sand Island River with Rainy Lake, lumber camps have been in operation in former years. Around Sand Island Lake and in the country between this point and the River Seine there are some fine groves of red and white pine, and along the Seine also pine is frequently seen; the other prevailing timber is chiefly

jack-pine, with poplar and tamarac.

Along both sides of the Seine River and inland, both north and south, the country is rough and broken with occasional valleys of good land, and the same may be said of the land on Rat River, Pipestone River and Little Turtle River. From this it will be seen that the tract of country I have described adjoining Rainy River, and including the townships already surveyed, is a locality well adapted for farming, and although there is some good pine within this area it cannot be said to be a pine country.

The remainder of the country explored by me including from Sabashkong Bay to Sturgeon Falls, on the Seine River, and north to the forty-ninth parallel, is comparatively unfit for settlement, but pine is met with all through this region, in some places only scattering, but in others in considerable groves, so that this portion may be classed as a

lumbering district.

Wild rice is very abundant in all this country, and being an exceptionally good year for it the Indians laid in large quantities for winter use. Ducks, partridges and prairie

chickens are very plentiful, and sturgeon, pickerel and white-fish are found in all the Moose and cariboo are very numerous, but the red deer are not found in these

parts. Bears are very plentiful, but wolves are never seen in these woods.

While in the tent I wrote a detailed report of the result of each day's proceedings with the result of my explorations. I will send in a copy of this longer report at an early day, together with a map showing the routes taken by me each day.

> I have the honour to be, Sir, Your obedient servant,

(Signed),

THOMAS O. BOLGER, Provincial Land Surveyor.

The Honourable T. B. PARDEE, Commissioner of Crown Lands, Toronto.

(Appendix No. 35.)

REPORT

 \mathbf{OF}

THE SUPERINTENDENT

of

COLONIZATION ROADS.

To the Honourable T. B. PARDEE, Commissioner of Crown Lands, Ontario.

SIR,—I have the honour to submit the annual Report upon Colonization Roads for

the year 1886, with a statement of the cost of each work.

During the season several exceptionally large bridges have been built, two being of iron and the remainder wooden structures, but all alike good and substantial. These works are fully described in the body of the report, but I may here remark with reference to the iron bridges, that it was found by calculations and estimates furnished, cheaper at the present price of iron, and the facilities possessed by bridge companies for constructing them, to use the metal for spans of more than about one hundred and sixty feet; and for spans of one hundred and thirty feet the cost was not much greater in iron than wood, while the advantages in favor of the former will be acknowledged by everyone as regards strength and durability.

The iron bridges erected are that over the Mississaga River, a 200 feet span, and one over Sturgeon River, the span of which is 130 feet. These were furnished and erected by the Hamilton Bridge and Tool Company, now well and favourably known for their excel-

lent bridges.

The principal wooden bridges are those over the Kaministiquia River at Point De Meuron, and three others near Rat Portage and Keewatin, one of which latter is a float-

ing bridge, and fully described in the report.

The general operations of the season have been on the whole very satisfactory, and a great number of roads have been constructed and repaired, aggregating 192 miles of new roads, $506\frac{1}{2}$ miles of roads repaired and some 31 bridges built of various lengths and value.

As regards the expenditure of about \$14,000 on the actual operations of the year above the Legislative grant, I would explain that nearly \$9,000 of this sum was spent upon six principal works, and was unavoidable; as for instance Manitoulin Island, where the summer fires had so burnt up crossways, culverts and bridges, as to increase the expenditure more than \$1,500 beyond the appropriation.

On the north shore, also, fire and flood rendered necessary an outlay of nearly as much more, to restore many of the roads and bridges to a state of usefulness. The bridge at Point De Meuron which, once begun, it was absolutely necessary to complete, cost very considerably more than the sum voted, as subsequently explained; while the extensive works at Rat Portage and Keewatin, for reasons submitted, required a considerable additional expenditure to complete and make secure the bridges and other works.

I may add, too, that a great deal of damage was done all over the country by bush fires and excessive floods, which caused a general over-expenditure, not anticipated when the estimates were prepared, but which in the interests of the Province was unavoidable.

The works are :-

NORTH DIVISION.

ANSONIA BRIDGE.

Which is on the main road between Bruce Mines and Thessalon, was re-covered at a cost of \$32.40, and was a necessary work, as the old covering had become unsafe and dangerous.

BAR RIVER BRIDGE.

This bridge is over Bar River, on the town line between the townships of Laird and Macdonald, and was built to give settlers access to the Port Finlay Road, to which the inhabitants had themselves opened a road.

The structure is eighty-four feet long, built upon piers filled with stone.

BASSWOOD LAKE ROAD.

This road leaves the Mississaga Road on lot 12 concession 3, of Gladstone, from whence it follows generally the margin of Basswood Lake to the line between concessions 5 and 6, and centre of lot 2 in the township of Day, a length altogether of about four and a-half miles. The continuation of this road northward into Well's township is desirable according to the inspector's report.

BLIND RIVER BRIDGE.

A bridge four hundred and twenty feet long, with approaches in addition at each end,

and spans Blind River near its mouth.

Mr. Murray, of Blind River, gave six thousand feet of lumber and in other ways assisted in furthering the work, thus enabling the Department to finish the bridge for a few dollars more than the appropriation.

COCKBURN ISLAND ROAD.

The roads on this island are in by no means good condition, and the grants heretofore made have not been sufficient to do more than make crossways at intervals over a considerable length of road.

The money this season was spent in further repairing the roads, beginning at Toleman's Dock and extending operations southward half a mile, and westward one and a-half

miles; the last half mile being new work.

Coffin Road.

This road was repaired over a length of twelve miles, namely, from section 4 of Coffin south to Otter-Tail Lake, ten miles; and two miles of the north end of the road which last year was chopped out, was this season made into a good travelable road.

A bridge was also renewed over Thessalon River, having a main span of fifty-two feet, and costing \$275, the former bridge having been swept away by spring freshets and travel stopped.

COYNE'S ROAD,

A road commenced last year, and this season produced northward a further distance of three and a-half miles, and now ending on the line between sections 1 and 12, and a quarter of a mile east of that between sections 1 and 2. While a portion of the road passes through a rough country it will, if produced about three miles further, reach a good district called Dunn's Valley, and be a very useful road.

DAY MILLS AND BRIGHT ROAD.

The chief work in this instance was a bridge 132 feet long built over Pickerel Creek, and the formation of the road between concessions 1 and 2 of Day township, opposite lot seven.

Some slight repairs were made upon the Thessalon Road, also included in this expenditure of \$364.28.

Galbraith (3rd Concession) Road.

This road is locally known as Dunn's Valley Road, and is from lot 5 between concessions 1 and 2, west to the Coffin road, about three miles, which were fairly repaired.

Gosse's Creek Bridge.

A bridge in the township of Kirkwood, which the water had undermined and made impassable.

Two new piers were built and the superstructure raised three feet higher than it was before. Having myself examined this I can testify to the necessity for the work.

GRAND PORTAGE ROAD.

A continuation of a road commenced last year and then described. It is continued north-westerly to "Kelly's store," on the line between lots 8 and 9 of concession 3, township of Wells, from which point it is made northward on the line between lots 8 and 9, two miles, or a length altogether of about four miles of new road. A further extension of this road is desirable.

INDIAN PENINSULA ROAD,

Which is in the County of Bruce, was repaired over four miles; and, on the Government road on the west side of the Peninsula, about nineteen miles were repaired through the Townships of Albermarle, Eastnor and a portion of the Township of Lindsay, thus making twenty-three miles of general repairs.

KAMINISTIQUIA BRIDGE.

Owing to the great width of water and quantity of ice which breaks against the bridge, I deemed it necessary to increase the waterway of the principal channel by introducing an additional opening of sixty feet, as also to strengthen other parts of the structure, so as to insure it against injury, and meet the heavy traffic in machinery now constantly being conveyed over this bridge to the various silver mines.

The bridge now has three 60 feet clear openings resting upon piers 8 feet by 18 feet,

with cut-water fronts and well filled with stone.

The total cost of the bridge, including the expenditure of last year, is \$6,911.93, and for a bridge 714 feet long is by no means excessive.

MANITOULIN ISLAND ROADS.

In consequence of bush fires, which for some time raged on the island, very serious damage was done to some of the roads, in the destruction of bridges, culverts and crossways, necessitating a considerable expenditure beyond that countemplated or provided in the estimates, in order to preserve traffic over some of the roads.

The number of miles of new road built this year was ten and a-half; and of repairs about thirty-three and a-half miles, upon the following roads:—

Bidwell and Green Bay Road was repaired over three and three-quarter miles of its length, beginning between concessions 6 and 7 of Bidwell, and from thence south to the 3rd and 4th concession line, and thence eastward across what is termed the "Dismal Swamp." The expenditure on this work was \$146.93.

On the Bidwell Branch Road, the sum of \$142 was spent in repairing one and one-quarter miles from Little Current and West Bay Road southerly.

About one mile was made of the BILLINGS ROAD, which is on the 12th and 13th concession line, from Mudge Bay Road or Kagawong Lake easterly, the work costing \$370 and was mostly through a swamp.

Barrie Island Road was improved somewhat, and some repairs made upon Barrie Island Bridge, at a cost of about \$100.

CLOVER VALLEY ROAD, described in report of 1884, was this season ditched for one mile upon one side, and several culverts re-built at cost of \$100.35.

CAMPBELL STH CON. ROAD.—This was covering a rocky road-bed over one and a-half miles, making it fairly passable for settlers between Mindemoya Lake and Gore Bay, the cost being only \$65.

GORE AND PROVIDENCE BAY ROAD is one of the most important roads on the island, and was much in need of the repairs which it received and which were extended over four and a-quarter miles, at a cost of \$402.

Long Bay Road was continued in its construction from the road allowance between concessions 10 and 11 southerly, between lots 20 and 21 to that between concession 12 and 13, and from thence easterly between the last named concessions to the road allowance between lots 15 and 16, a length in all of two and a-half miles, and the outlay \$435.

LAKE WOLSLEY ROAD.—Two miles of this road were built, and three repaired for the sum of \$1,125. The work was done in three different sections, to accommodate as far as possible the wants of settlers, and at the same time open the district for development. The road passes through the townships of Gordon, Mills, Burpee and Robinson.

LITTLE CURRENT AND WEST BAY ROAD, which reaches between Little Current and Mindemoya Lake, was repaired over three and a-quarter miles; Sucker Creek bridge being also built. The cost of the bridge was \$60, of which sum the municipality of Howland gave \$30. The Departmental expenditure was, for the road and bridge, \$530.

MINDEMOYA AND SANDFIELD ROAD.—One and a-quarter miles of new road made, and two bridges built; one of which latter after completion was destroyed by fire, and afterwards re-built.

The road is between concessions 4 and 5 of Carnarvon, extending towards Lake Mindemoya; outlay \$380.

Muge and Gore Bay Road.—An expenditure was made of \$25 in re-building a bridge on this road which fire had destroyed.

NORTH OF SCOTLAND ROAD, opened up between concessions 14 and 15 of Allan township, along the bluff which is on the east side of Gore Bay. Distance two and a-half miles, and cost \$180.

Providence Bay Road.—This expenditure of \$350 was almost entirely on account of fire, which destroyed all the principal bridges and culverts on the road. The work extended over seven miles.

SOUTH BAY ROAD.—Three and a-half miles improved on this road, which is upon the road allowance between concessions 8 and 9 of Tehkummah. Fire in this case also did much damage; cost \$420.

TEN MILE POINT ROAD.—Five miles of road repaired, and a bridge built above the rapids on the 4th and 5th concession line of Sheguiandah, 120 feet long, including approaches. The cost for road and bridge being \$409.

Mississaga Bridge.

This structure was built to replace one erected last year, but carried away by the extraordinary spring flooding and ice jams, which occured soon after the bridge was built.

The present one is built about 500 feet up the river from the old site, as it was found after careful examination that it would be better and cheaper to build at this point where the stream was narrower and might be crossed with one span of 200 feet.

Again, from estimates made and received, it was determined that a 200 feet span iron superstructure could be procured and erected for less cost then one of wood, by the Hamilton Bridge and Tool Company. Their offer was therefore accepted, and the bridge put in position by them at a cost of \$5,774 upon the superstructure prepared for it.

The cribs which support the bridge have a general length of 26 feet, with cutwater fronts and wing walls, their width being about 12 feet at the base and slightly battered. The height of the east crib is 18 feet from its rock foundation, to which it is securely bolted, and of the west crib 22 feet from low water, where it rests upon 64 piles firmly driven and to which it is well bolted. Both cribs are filled with stone, and the work in every respect is in my opinion, as it is of the inspector and others, satisfactory and workmanlike.

The approach at the east end necessitated an additional truss of 42 feet, so that the bridge has a length altogether of about 260 feet, exclusive of the earth approaches.

MISSISSAGA RIVER FERRY Scow.—The sum of \$150 was given towards the construction of a scow to enable settlers to cross the river with their teams at the termination of the Thessalon and Bright road, on lot 10 and between conceessions 5 and 6 of Thompson.

The settlers had purchased an iron rope at considerable cost, but found themselves unable to bear the entire cost of the work. The scow is 12 feet by 34 feet, and 2 feet 2 inches deep, and when loaded with ten teams only sank one foot.

OLIVER ROAD.

This road was repaired from Murillo Station, on the C.P.Ry., to the town limit of Port Arthur, some twelve miles or over, and the whole distance is in a good general condition. The municipality of Shuniah gave \$250, which was spent with the Government appropriation.

PARKINSON ROAD.

This road leads towards the township of Parkinson, from the iron bridge built over

the Mississaga River this season.

It begins on lot 3, concession 2 of Gladstone, from whence it is made northward to intersect the line between lots 3 and 4, and thence again north between the last named line, to the line between concessions 5 and 6; the length being about four and a-half miles.

This road should be produced so as to reach the good lands of Parkinson.

POINT DE MEURON BRIDGE.

In 1873 a bridge was partially built upon the site of the present structure, but before completion the piers and abutments became damaged or displaced by ice and freshet, and so remained till this year.

56

The total length of the bridge now completed is 350 feet, comprised of two main

spans of about 90 feet each and four of about 30 feet each, with approaches.

Unforseen difficulties in building upon old foundations, and the high rate of labour and cost of materials in that district, made the cost of the work much above the sum estimated, but an excellent bridge is secured, and considering its great length and the expenditure in road approaches, the outlay is not excessive.

It is built over the Kaministiquia River, about lot 20 in the first concession of Neebing township, some seven or eight miles up the river from Fort William, and will no

doubt assist in developing the farming lands in Blake and other townships.

PORT FINLAY ROAD.

Repairs were made over eight and a-half miles, which included a large amount of ditching. The road is from the Great Northern Road through the townships of Macdonald, Laird and Tarbutt Additional to Port Lock, on the lake shore of Huron, North Channel.

PORT LOCK ROAD.

Three bridges of 51, 53 and 60 feet spans respectively were built on this road besides 70 rods of crossway and some very heavy ditching; and its length between Port Lock and Dessert Lake—six miles—is now in excellent condition.

RABBIT MOUNTAIN AND WHITE FISH LAKE ROAD.

The distance between the Oliver Road, where this road begins, and Silver Mountain Mines, where it now ends, is twenty-two miles. Last year, as then reported, there were seven miles and a-half of the portion cut out to be completed, and which has since been done, and the first twelve miles of the road are now in good order for general traffic.

The remaining ten miles have been chopped out sufficiently to allow winter traffic over it to the mines, and all the necessary bridging has been done, but requiring a consider-

able expenditure yet to make a good road.

The Silver Mountain Mines Company contributed \$1,000 towards the cutting out of this latter portion, with the understanding that next season it be finished as a summer road.

The overseer says this section passes through some good agricultural lands.

RAINY RIVER ROAD.

This road was made last year from Fort Frances thirteen miles. This season twenty-six miles were made, continuing it down the river, and generally upon the road location made by the Dominion Government about eleven years ago.

The road is chopped out 40 feet wide and made as a fair winter road, while the portion built last year was more or less improved throughout, and at the present termination

a narrow road was cut to the river for the use of the inhabitants.

The overseer, in his report, suggests that the work be continued to the mouth of Rainy River, forty miles, or at any rate he says it is important that at least eleven or twelve miles be made, so as to reach about six miles below "Sault Rapids," to what is known as Cameron's farm.

The report concludes as follows: "I may add also that the land along the river as far as I went, is very well adapted for agricultural purposes, and capable of being successfully farmed, and I have every reason to believe that it continues so to the mouth of the river."

RAT PORTAGE AND KEEWATIN BRIDGES AND ROAD.

The object of this work was to connect by road the villages of Rat Portage and Keewatin, and which is now largely accomplished.

The chief undertakings were bridging two outlets of Winnipeg River, and construction of a breakwater of timber at the foot of the Canadian Pacific Railway embankment near Rat Portage, which was the only reasonable point where a road could be made.

The breakwater is 445 feet long, formed of piers having 24 feet centres, and built 6½ feet higher than the general water line. It is planked over its whole length, and finished with a hand railing, while each pier is filled with stone for greater security and stability.

Over the first river outlet a floating bridge is made 360 feet long between piers, which latter are of square timber 12x12, built five feet above the water and filled with stone.

The floating portion is formed of white pine logs averaging 18 inches in diameter, and 16 feet long, placed four feet apart, centre to centre. Above these logs are four stringers bolted to each cross timber, and the whole covered, first with 2-inch plank 16 feet long, and upon this a second 2-inch plank 12 feet long is laid diagonally for the waggon road. It is finished with a hand rail, and the whole structure properly anchored and otherwise made secure.

Hinged aprons lead to and from the bridge at each end, which rise and fall with the water. The whole length, including the approaches, which are also covered with plank, is 408 feet.

The third structure, which spans the second outlet, is a truss bridge, composed of four 50-feet clear spans, and six 22-feet spans, which, with the approaches as planked, make a length of 557 feet.

Owing to the strong current the building was very difficult, but notwithstanding this

a strong and substantial bridge has, I believe, been secured.

A road was also made through Tunnel Island, and between the two last named bridges, and the road formed to Rat Portage, so there is now a road giving access by team or on foot from place to place, which before did not exist.

From my personal knowledge I can report a large amount of work accomplished for

the money spent.

St. Joseph Island Roads.

The appropriation for this island was spent in the construction of portions of three different roads, namely, the sum of \$600 in building a mile and one-quarter on the A concession line from Hilton Road north-westerly; \$820 upon the H and I line from Centre Road, between lots 10 and 11, north-easterly to the middle of lot 20, nearly two miles and a-half; and about \$640 on the Tenby Bay Road in building a mile and a-half, from lot 9, concession 7 to the bay, on lot 2, concession 7; a total of five and a-quarter miles of new road.

Road-building here is usually of a heavy and expensive character, involving a great

deal of ditching, which is done in place of cross-waying, and is of course preferable.

THESSALON AND BRIGHT ROAD.

An expenditure of about \$600 in making general repairs over the road through the townships of Thessalon and Bright, about five miles in all, besides some bridge repairs.

WEST DIVISION.

Alsace Road.

Two portions of this road were made, one east and the other west of the Rosseau and

Nipissing Road.

The easterly portion is from the termination of last year's work easterly one mile and five-eighths, to lot 24, the road being between concessions 10 and 11 of Himsworth; while the westerly part is from the Rosseau and Nipissing Road, between lots 190 and 191, westerly, crossing lot 190 to its west boundary, a length of one and a-quarter miles, or a total of nearly three miles of road.

BAYSVILLE AND HUNTSVILLE ROAD.

Repaired from the sixth concession of the township of Brunel northerly, two and three-quarter miles.

These repairs are of a permanent nature, and puts the road in a very fair condition

throughout.

Beaumaris Bridge.

A bridge connecting Tondern Island with the main land on the Point Kaye Road in the township of Monck.

It is 400 feet long, and cost \$400, of which sum the county contributed one half.

Black River Bridge.

On the line of the Peterson Road, is a structure 88 feet long, comprised of two spans 37 and 27 feet each, resting on three piers, each about 11 feet high.

The centre pier is rock-bolted to secure it against danger as this Black Creek is of a

somewhat hazardous character.

The bridge cost more than anticipated, and is explained in the difficulty in procuring timber.

BRANDY CREEK WORKS.

The blasting of rock in the bed of this creek to lower the water and prevent the flooding of roads in the district.

The work is in the township of Watt, Muskoka district.

BURK'S FALLS ROADS.

This grant was to assist the Council in opening up roads from the Railway Station, on lot 8, concession 9, of Armour, and cutting down a hill between Burk's Falls and the station. The work was under the supervision of the municipality—half a mile of road.

Burpee Road.

Continued from last year's work, lot 12, concession 5, of Ferguson township, to the centre of lot 12, in concession 8, of the same township—two miles of very heavy work.

CARDWELL JUNCTION ROAD.

These repairs were mostly upon culverts and crossways, which were destroyed or damaged by floods, and extended over above five miles of the road, from the Muskoka Road

The road is on the town-line between Perry and Chaffey, and is a most useful and important one to the settlers of McMurrich, leading, as it does, to Novar Station on the railway.

CHAFFEY (20 and 21 Side Line) ROAD.

This expenditure was made under the supervision of the Township Council, and the work is said to be very fairly done.

It is through concessions 12, 13 and 14 to the north boundary of Chaffey, about one and a-quarter miles of construction.

CHRISTIE ROAD.

Five and a-half miles of this road repaired, the improvements now reaching from Parry Sound to lot 27, concession 9, of Christie, or practically to Edgington P. O.

A bridge at the Edgington Narrows was entirely rebuilt at a cost of about \$250,

which is included in the expenditure of \$1,550.17.

This road is an important one, being the main east and west highway from Parry Sound and Georgian Bay to the new railway.

CONGER BRIDGE.

This was a small job given to open a way through lot 1, concession 9, of Conger, to the Port Carling or Lake Joseph Road.

COOPER'S FALLS BRIDGE.

This was a work rendered necessary through the destruction by flood of a culvert and embankment built last year on the Dalton and Washago Road.

DENVILLE SWAMP ROAD,

On the road allowance between concessions 4 and 5 of the Township of Strong, was continued this season from lot 10 to lot 4, and two bridges were built, one having a span of 32 feet and the other 37 feet.

Length of road built a mile and three-quarters.

DISTRESS RIVER ROAD.

An extension two and a half miles easterly from opposite lot 5, and between concessions 10 and 11 Strong township, to lot 14 on the same concession line, or as far east as at present appears necessary for settlement purposes.

DRAPER AND GRAVENHURST ROAD.

A little over three miles of this road has been constructed from Housey's Rapids, in the third concession of Ryde northward, between lots 25 and 26, through the township, and two and a half miles of what is known as the Draper and Ryde town line road was repaired, beginning at lot 8 on the town line and working easterly.

A bridge was also built on the line of this latter road, 165 feet long and 10 feet high,

well finished, with hand railing, etc.

EAGLE LAKE ROAD.

This is four miles of well made road, from the Muskoka road near Upland's easterly to South River on the road allowance, as nearly as practicable, between concessions 2 and 3 of Machar township, and reaches the Callender Junction Railway.

FERGUSON ROAD,

Was begun at Lorimer Lake road on lot 7, between concessions 4 and 5 of Ferguson, and produced easterly one mile, crossing lots 6, 5 and 4 in the fifth concession, there meeting an old lumber road which leads to McKellar, the settlers' market.

FISH BAY ROAD.

An expenditure in repairing the road between Nipissing Village and Fish Bay, the steamboat landing on Lake Nipissing.

GOLDEN VALLEY ROAD.

A road located in 1884, and in my report fully described. Last year two and three-quarter miles were built, and this season four miles were added to its length, beginning at lot 4, between concessions 8 and 9, of the township of Pringle, and ending on lot 13 of the same concession line, in Mills township. This road opens a good section of land, and ought to be continued until it intersects the Mills road.

Himsworth Bridge.

A bridge over East River, in the township of Himsworth, built in 1884, and carried some distance down the river by the freshets. The present expenditure of \$319.48 was for replacing the bridge and repairing the road.

JOLY BRIDGE.

A small expenditure for repairs

JUNCTION (No. 1) ROAD.

Repaired over six miles, from one mile and a-half west of Spence, on the Rosseau and Nipissing Road westerly.

KATRINE BRIDGE,

Which is on the Muskoka Road at Katrine, was raised 8 feet above its former level, to permit the passage of steamboats from Doe Lake to the railway. It involved the formation of heavy approaches at each end containing nearly 1,000 cubic yards of earth filling, and the use of a large amount of timber.

KEARNEY, OR SAND LAKE ROAD.

Repairs made over two and a-half miles, beginning about half a mile form Kearney P. O.

The chief work was rebuilding bridges and raising the road bed above the general flood line, which on portions of the road is a serious difficulty.

LAKE JOSEPH, OR PORT CARLING ROAD.

On the Port Carling road proper, repairs were made from lot 17 concession 12, Monck, to lot 26 concession 13, two and a-half miles, and it was also repaired over about five and three-quarter miles from the Muskoka Road westerly. In addition to this, one and a-half miles repairs were made on the Point Kaye Road from the main road westerly.

LEG LAKE ROAD.

A short road begun last year in the township of Wood, and this season a further sum of \$150 was paid for its production westerly towards the settlement which the road is intended to serve.

MACAULAY ROAD.

The sum of \$1,500 granted by the Legislature was expended in repairing twelve miles of the road, beginning about two miles from Bracebridge and working towards Baysville.

In addition to the above, about \$700 was spent in making a little over a mile and aquarter of new road as a diversion to avoid the necessity for building a new bridge over the Muskoka River, which had become dangerous, and would have cost at least \$2,000 to replace.

The new road was begun on lot 6 concession 3 Macaulay, and constructed through the said lot, and through the same lot in concession 4, intersecting the old road about six chains south of the road allowance between concession 4 and 5, and is said to be a most satisfactory work.

MACAULAY (25 and 26 side line) ROAD.

This expenditure was for about 100 rods of ditching and cross-waying so as to connect with the Port Sidney Road, and thus allow settlers to reach the mills at Mary Lake.

MAGANETAWAN ROAD.

Three miles of new road have been made this season, from lot 8 to lot 18 on the road allowance between the fourth and fifth concessions, as nearly as the country would permit, it being a somewhat rough and broken district.

Four and a half miles of the oldest portion of the road were very well repaired, working from Maganetawan easterly, one half of which being diversions was equal to

new work.

MAPLE ISLAND BRIDGE.

This bridge is over a branch of the Maganetawan River, on the Northern Road, township of McKenzie, and the rebuilding of it an absolute necessity, as the former one was decayed and unsafe. It is now a 60-feet clear span supported by piers 8 feet by 16 feet and 20 feet high. It was built at considerably less cost than of some offers made by tender from parties living in the vicinity, and is doubtless a much better bridge than would be built by contract.

MILLS ROAD AND BRIDGES.

Two small bridges on the road were swept away by the spring floods, entirely stopping traffic over the road. They were rebuilt, and some portions of the road repaired. One bridge is in the township of Ferrie, and the other in the township of Mills.

MONTEITH AND PERRY ROAD.

The chief work this season was a deviation three and a-half miles long, in order to secure a good and almost level location, instead of the former one, which was both hilly and rocky. The diversion is from lot 27 concession 11 McMurrich, southerly through lots 27 and 26 to the road allowance between concessions 10 and 11; thence easterly, encroaching upon the fronts of lots 25 to 22 inclusive, after which it follows as nearly as may be the said concession line to the Stisted Road between lots 15 and 16. The work is not fully completed, the grant being sufficient to make it a good winter road only.

A bridge was also built over Bass Creek, on this same road, in lot 9 of concession

11, 100 feet long; and a small sum, \$92, was spent upon repairs near Kearney.

Muskoka Road.

Extended northward between lots 20 and 21 to the road allowance between concessions 4 and 5, of Machar, one and three-quarter miles. The work was heavy and expensive. An extra outlay of about \$150 was required to repair damages north of Huntsville, caused by a freshet.

NORTHERN ROAD.

Three and a-quarter miles, from the Rosseau and Nipissing Road at Commanda southward, were repaired in a very permanent manner.

NORTH-WEST ROAD.

On this road also, three miles of excellent repairs were made, from one mile northwest of Parry Sound north-westerly. This is a very expensive road to keep in order, being rough and rocky.

OAKLEY BRIDGE.

A job given to cover and make some necessary repairs, as the bridge was in a dangerous state.

OKA ROAD.

The continuation of this road was commenced at lot I of Gibson, and extended westerly five and a-quarter miles. The work is of a somewhat cheap character, but the centre of the road has been well grubbed, and the road chopped out 30 feet wide.

PARRY SOUND ROAD.

The work here was chiefly raising a long flat near Ashdown, which each year was submerged, making travel dangerous. The length was 1,200 feet; some repairs were also made on the town line of Watt.

PENINSULA LAKE ROAD.

On this road the work was begun at the east boundary of Brunel, in the thirteenth concession, and produced southerly along the said boundary to the old Peninsula Lake Road at the tenth concession, one and a-half miles. In addition, half a-mile of the old road was repaired through lots 28 and 29 in the eleventh concession of Franklin.

PORTAGE ROAD,

Which may also be called the Peninsula Road, was repaired for three and a-half miles from "Cane's Corner's," lots 15 and 16 concession 12, Franklin, on the Muskoka and Bobcaygeon Road, south-westerly to the line between lots 24 and 25 in the tenth concession; and from thence north over the portage from Lake of Bays to Peninsula Lake.

Peterson Road.

This road was in bad condition, and the overseer who built Black Creek Bridge, was allowed to repair the worst places, over about four miles, near Uttington.

RESTOUL LAKE ROAD,

Begins at lot 14 concession 8, township of Nipissing, and has been produced westerly on the road allowance between concession 8 and 9, two and a-half miles, terminating on lot 21. The work was heavy and expensive, but the road is well constructed.

Rosseau and Nipissing Road.

Repaired from North Seguin River, southerly over ten miles, and being chiefly the repairing of broken crossways and culverts.

RYERSON CENTRE ROAD.

This appropriation of \$500 was for the purpose of improving and completing the road to its intersection with the Maganetawan Road, on the line between lots 10 and 11, and north boundary of the township of Ryerson. The work was effected, and was chiefly grubbing and ditching, extending over one and three-quarter miles.

RYDE CENTRE ROAD.

This was a road begun in 1882. This year the work was produced southerly, continuing on the road allowance between lots 5 and 6 to the fourth and fifth concession line two miles. A lot of crosswaying and ditching was done.

SEGUIN RIVER BRIDGE.

Begun last year and now finished. Its entire length is 330 feet, and said to be a fine structure. The river is a most treacherous one and required expensive additions to guard against the floods.

SINCLAIR AND BOBCAYGEON ROAD.

This is a new road and was located last year. It commences at lot 5, concession 5 of Sinclair, and thence north-easterly, through lots 5, 4, 3, 2, 1 and lot 14 of concession B of Bobeaygeon Road survey, to intersect the Bobeaygeon Road; thence northerly on the old road half a-mile, and again the location is continued easterly, towards the township of Finlayson, to meet the requirements of settlers in that township. This year's work is two and three-quarter miles of construction, and three-quarter miles of repair.

SOUTH ARMOUR ROAD,

By error designated in the estimates the East Armour Road, was produced from the end of last year's work, lot 28, between concessions 4 and 5, Armour, easterly, on or near the concesion line, to lot 3 on the same line in Proudfoot, when it was diverted northerly a little to avoid some rocky ranges. The length constructed is nearly three and a-half miles. From said point of ending, a winter road one mile long was chopped out so as to

connect with Kearney No. 1 Road, on lot 7, between concessions 5 and 6 of Proudfoot.

STEPHENSON TOWN LINE ROAD.

Repaired from lot 17, concession 1, Brunel, about four miles.

Fire in this instance had destroyed many of the crossways and culverts, which are renewed or repaired.

STEPHENSON (12 and 13 Con.) ROAD.

This work was across lots 28 and 29, and between concessions 12 and 13 of Stephenson, and through a large and heavy marsh, which made it impossible for the settlers without assistance to form it into a road. The work had been asked for repeatedly.

STISTED SOUTH TOWN LINE ROAD.

This is an important connection between the Stisted and the Muskoka Road, in length altogether about six miles. There was a short distance uncompleted at the end of last season, which is now done, and the road opened throughout in a very satisfactory manner. It was about three-fourths of a mile of work, chiefly crosswaying and ditching.

STISTED SWAMP ROAD.

Nearly three-quarters of a mile of heavy swamp and crosswaying, opposite lots 7, 8 and 9, between concessions 4 and 5 of Stisted.

Westphalia Road.

Three and a-half miles have been added to the length of this road, as a production easterly towards South River on its original line, between the 2nd and 3rd concessions of Gurd, and is now therefore extended as far as lot 21.

It leads to Trout Creek Station on the railway, and is in consequence an important highway for the public.

WHITESTONE VALLEY ROAD.

A road from the Northern Road, westerly, through the township of McKenzie and begun in 1881.

64

This season the appropriation was required for two bridges on the line, which could not be built last season for want of funds. They are substantially made, and portions of the road graded and improved on the parts built previously.

WOOD ROAD.

A short new road beginning on lot 32, concession 12 of Morrison, and from thence west half a-mile, and from thence again north and west to Morrison Lake, near the 17th and 18th concession line of Wood. Three miles were built this year. The County Council of Simcoe contributed \$100 towards the work.

EAST DIVISION.

Addington Road.

Seventeen miles repaired from three miles south of the Canadian Pacific Railway crossing northward to the village of Cloyne.

For many years changes have been made in the location of the southern part of this road, and while yet uneven in many places, it is now thought to be upon the best selection possible.

Anstruther Bridge and Road.

The chief work here was the bridging of Eel Creek, with a structure 100 feet long and main opening of 31 feet, the main abutments being 13 and 14 feet high respectively.

With the balance of the appropriation the road was completed and opened for traffic. The work has been reported from time to time in earlier reports, beginning in the year 1881 when the first expenditure was made.

ALGONA AND HAGARTY ROAD,

Is between lots 25 and 26 of South Algona, and was made through concessions 6, 7, and 8 this year, one and a half miles.

ALICE ROAD.

About one mile very permanently repaired and being on the road allowance between concessions 12 and 13 of Alice, from lot 26 to lot 29.

ALICE AND FRASER ROAD.

This road is between the 13th and 14th concessions of Alice, and was opened from the town line between Alice and Fraser easterly three miles.

It had been partially defined before but was not travelable.

BAGOT AND RENFREW ROAD,

Is from lot 29, concession 10, to lot 30, concession 5 of the township of Bagot, ending at the boundary between Bagot and Admaston. Its length of four miles was repaired thoughout. Previous to this work it was little more than a trail.

BARRIE ROAD.

The work in this instance was renewing a bridge near Perry's Mill. Its length is 156 feet without the approaches, and composed of openings of 41 feet, 43 feet, 25 feet and 23 feet, supported by cribs 8 feet by 16 feet, and 14 feet high at the centre. It is represented as an excellent structure and a credit to the overseer.

Bedford Bridges.

A grant of \$300 was made to assist the municipality of Bedford, in building and repairing bridges in their township. One-half of the amount has been paid over upon their representations that the work was in progress. The balance was held awaiting the report of completion of the work, which has not yet been received.

Bells Rapids and Carlow Roads.

On the first-named road repairs were made from a point about a mile and a-half north of the Peterson road, two miles northward; while on the Carlow Road the repairs were from Combernere southerly, three miles.

BLAIRHAMPTON ROAD.

This work was begun between concessions 4 and 5 of Minden, at lot 12, and continued from thence north-easterly, through lot 12 in concession 5, and lots 13, 14 and part of 15 in the 6th concession; thence easterly across lot 16 and part of 17, and thence north-easterly through the balance of 17 and whole of lot 18 in the 7th concession, in all a length of a mile and a-quarter, which was graded and otherwise improved.

BOBCAYGEON ROAD.

Three miles of repairs in the township of Harvey, southerly from one mile south of its north boundary.

Bonnechere Road.

A work consisting of four and a half miles of repairs, and being from lot 10 in concession 17, to lot 20 in concession 21, of the township of Grattan.

BRUDENEL (16th Con.) ROAD.

This was an existing road, but in a very dilapidated condition. It is now

repaired for two and a-half miles, upon the following location:

Commencing at the Opeongo Road, on the line between Free Grant lots 270 and 271, and from thence north on the said line, to that between lots 20 and 21 in the 15th concession; and again north on the line between lots 20 and 21 to the north boundary of Brudenel.

BUCKHORN ROAD.

Repaired from the Monck Road, northerly, to the north boundary of Glamorgan and

again westerly half a mile.

Again it was repaired from lot 18, concession 12 of Cavendish, southward into the township of Harvey, eleven miles, making eighteen miles of repairs altogether.

BURLEIGH ROAD.

Improved between Apsley and Burleigh Falls—twenty miles; and the road reported as in a good state of repair over this distance.

BURNT RIVER BRIDGE.

A bridge on the Snowdon Road, between Minden Station and Monck Road, and which during last year's freshets moved from its place. In re-building it the whole structure was raised three feet higher than formerly, thus making it secure against further danger. 66

CALLENDER STATION ROAD.

A continuation of last year's work, and is constructed on the road allowance, between concessions 8 and 9 of Bonfield, to the road allowance between lots 30 and 31, and from thence northward on the last named road allowance, to that between concessions 6 and 75: two and a-half miles of new road.

CHANDOS ROAD.

Repairs upon a bridge over Deer River in the township of Lake; the expenditure was only \$67.

CLEAR LAKE ROAD.

This road is about the edge of Clear Lake, in the township of Sebastopol, and was repaired to the Eganville and Foy Road, about three and a-half miles.

DISTRICT LINE ROAD.

One and a half miles of repairs, from Shaw's Mill southerly towards Eganville, the work dating from lot 11 Wilberforce.

Douglas and Scotch Bush Road.

Repairs in the township of Bromley, from lot 52 Bonnechere Range eastlerly, along the south side of Bonnechere River, two miles and a-quarter, well graded throughout.

Douglas and Renfrew Road.

Two miles repaired from Douglas, southerly.

DUMMER ROAD.

Repaired from lot 19 to lot 31 in the 9th concession of the township of Dummer, four and a-half miles.

DUNGANNON ROAD.

Two years ago, as then reported, this road was chopped out as a winter road Last year about \$200 was spent upon it, and this season a similar amount, which has finished the work, leaving it in good condition throughout its length of three miles.

EGANVILLE AND FOY ROAD.

One mile of repairs in the township of Grattan, from the 21st concession southerly.

FRONTENAC ROAD.

Work was commenced upon this road at "Soule's Corners," in the Township of Olden, and extended ten miles and a half northward, to within about one mile of Gull Creek.

The road was very much out of repair and greatly in need of this expenditure, \$1,008.43.

GOLDEN LAKE ROAD.

This is an easterly portion of the Pembroke and Barry Bay Road, and is from lot 20, between concessions 10 and 11 of the township of Alice westward. The distance improved this season is seven miles.

GRANT SETTLEMENT ROAD.

This road is on the road allowance between lots 5 and 6 of the township of Ross, and was this year built from the west end of the 7th concession eastward, to the 10th concession, a length of three a-half miles of almost new road.

GRATTAN (20th Con.) ROAD.

This also is new work from the town line, between Grattan and South Algona, through concessions 21 and 22 of Grattan—one and a half miles.

GRATTAN (14th Con.) ROAD.

A road from the Perrault Settlement Road, and beginning between the 14th and 15th concessions, and proof line between lots 20 and 21, from whence it is made one mile easterly, crossing lots 20 to 18, both inclusive.

GRATTAN AND CLONTARF ROAD,

Is through lot 23, from concession 15 to concession 17. Two miles of excellent repairs in Grattan township.

HAGARTY AND BRUDENEL T. LINE ROAD.

This road begins between concessions 14 and 15 of Brudenel, and extends northward between lots 3 and 4 to the north boundary of the township, and thence easterly to the east boundary of the same. It is then made north-easterly through lot 1, concession 1, of South Algona, to the point of division between lots 1 and 2, and from thence northward between lots 1 and 2 to the third concession—two and three-quarter miles.

HASTINGS ROAD.

These are repairs from Rathbun Station, on the Central Ontario Railway, northward over ten miles.

The traffic over this section of the road is very heavy, and it was found that the settlers were unable to put it in proper repair.

HINCHINBROOKE ROAD.

Work commenced on the boundary between Camden and Portland at the eighth concession of Camden, and repairs made from thence north along the said boundary half a mile; thence across the north-west corner of Portland through lots 25 and 26, in the fourteenth concession, to the boundary between Portland and Hinchinbrooke at the tenth concession, and from thence north on the last named concession to lot 6—four miles of repairs.

HYDE'S CHUTE AND SANSON ROAD.

Repaired sixteen miles from the Madawaska River to Sanson's, on the Opeongo Road, and the work well reported of.

INGOLDSBY STATION ROAD.

A road from Ingoldsby Station, on the Victoria Railway, northward on the line between lots 26 and 27, through the fourteenth concession of Snowdon, and first two concessions of Minden.

This distance is two miles, which was well repaired throughout.

JONES' FALLS AND BATTERSEA ROAD.

Two and a-half miles very thoroughly repaired, from the boundary line between South Crosby and Storrington, southerly, towards Battersea, with some slight repairs near Jones' Falls, in South Crosby, County of Leeds.

LAVANT ROAD.

Repairs upon this road were commenced on the town-line between Darling and Lanark, at the second and third concession line, and continued to that between concessions 8 and 9 of Darling—four miles.

Repairs were also made over eight miles of the older portions of the road from about two miles west of the boundary between Darling and Lanark, westerly—twelve miles of

repairs altogether.

LONSDALE AND BRIDGEWATER ROAD.

The work upon this road was begun in the township of Tyendenaga, between the sixth and seventh concessions, and produced northward between lots 30 and 31, to the eighth and ninth concession line, from which point it was continued eastward on the line between lots 30 and 31 to the point of division between lots 33 and 34. From this it was made north-easterly, diagonally through lot 34 to the ninth and tenth concession line; thence again castward on the last named concession line to the line between lots 35 and 36, and from thence northward between the last named lots to the boundary between Tyendenaga and Hungerford, a distance altogether of five and a-quarter miles.

One mile of the north portion of the road is new work, and the balance repairs and

improvements of the portions previously built.

The County of Hastings contributed \$300 towards this road, which will appear as a refund into the Treasury.

MADAWASKA BRIDGE.

An expenditure of about \$85, made in securing iron and material from a bridge destroyed by fire last year.

McClintock Road.

A new road in the township of McClintock, begun on the line between lots 4 and 5 in the fourteenth concession of the township of Sherbourne, and produced north-easterly to the line between lots 10 and 11 in the third concession of McClintock, a distance of four miles made anew.

The inspector says there are a number of settlers in McClintock who will be greatly benefited by this road, and a continuation of it is very desirable.

McCool's Road.

Last year eight miles of this road were opened as a cheap winter passage, and this season eight and a-half miles additional have been opened in a similar manner, commencing at lot number 7, between concessions 4 and 5 of Calvin, and from thence westerly on the concession line to that between lots 20 and 21; thence south on the line between lots 20 and 21 to concessions 3 and 4; thence on this concession line to lots 30 and 31; thence again north between lots 30 and 31 to the fourth and fifth concession line; thence north-westerly, meeting the sixth and seventh concessions at the point or stake between lots 33 and 34; then following the concession line last named to the boundary between Calvin and Bonfield.

McKenzie Lake Bridge.

Is built over McKenzie Lake Creek, twelve miles north of Maynooth. It is 180 feet long, well and solidly constructed, and the approaches made of compact stone work.

MATTAWA AND TEMISCAMINGUE ROAD.

A production two miles farther along the Ontario side of the Ottawa River.

A substantial bridge 75 feet long, and main span of 35 feet, was built over a stream which crosses the road.

MINER'S BAY ROAD.

The whole length—nine miles—of this road was repaired from the Bobeaygeon Road to Mirer's Bayon the Cameron Road, and now reported in a good state of repair.

MISSISSIPPI ROAD.

Repaired from the Frontenac Road for seventeen miles, and from the Carlow Road westerly to the township of Mayo three miles, making twenty miles of repairs.

MONCK ROAD.

These are repairs from the west end of the Monck Road easterly over some four miles, consisting chiefly in graveling and grading, as this section of the road was low, and required elevating.

Monmouth Road.

In 1881 the construction of this road was first begun, and was continued for the two following years, till nine miles were made. These nine miles were repaired this season, and in addition it was built from lot 20, concession 14, of Monmouth, easterly to lot 30, crossing the outlet of Otter Lake on lot 25, which was bridged with a structure 230 feet long, and average height above water of about seven feet. The length of this second portion is three miles, of which two were entirely new, the third mile having previously been chopped by the settlers.

A third section was also made, three miles long, from the Burleigh Road on the town-line between Monmouth and Cardiff easterly, on or near the line between concessions 21 and 22, to lot number 10. On this portion a high crossway was built over the outlet of Burnt River 175 feet long, constructed mostly of cedar. The expenditure, therefore,

of \$1,100, has constructed three miles of road and repaired twelve.

Monteagle and Bartlett Roads.

The Monteagle Road has been repaired and otherwise improved over seven miles of its length, that is, from about a mile and a-half east of the Hastings Road northerly. Of this distance three miles had been cut out by the settlers and four by the Department as a winter road, and the expenditure this season has completed the work.

There is yet one mile to be made to connect with the Peterson Road.

The Bartlett Road, which is a branch from the first named road, was repaired for three miles.

MUD LAKE ROAD,

Commences on the town-line, between Grattan and South Algona, at the intersection with the fourth and fifth concession. It is repaired from this point southerly, on the town-line, to the road between concessions 22 and 23, and then on the last named road across lots 36 to 33 inclusive—about two miles of repairs.

NORTH BAY AND TEMISCAMINGUE ROAD.

This season the road was constructed from about the centre of concession A of Widdifield northward on the line between lots 16 and 17, through concessions A and I; thence east between concessions 1 and 2 to lot 14; and thence again north between 14 and 15 through concessions 2, 3 and 4—six miles, of which length the first four miles are completed in all respects, and the last two chopped out 60 feet wide, and made as a winter road.

There are settlers now living at, and near the north boundary of the township who

are yet without a road, so that its extension northward is desirable.

With regard to the quality of the land, the overseer says that though not first-class, its favourable situation, and the railway facilities make it a desirable locality for settlement.

OPEONGO ROAD.

Through the township of Sherwood, this road was originally built over what are known as the "Prussian Hills," but which were so rugged and steep as to make the road at that part almost impracticable for general teaming.

A diversion of six and a-half miles has this season been made to avoid the hills,

with, I believe, very satisfactory results.

It begins at Free Grant lot 214, and is upon the north side of the road, and constructed westerly.

Six miles of the old road were repaired between Foy's and Plant's hotels.

OPEONGO AND ROCKINGHAM ROAD.

This is a road from the Opeongo Road to the village of Rockingham, beginning at a point about six miles west of the village of Brudenel.

About six miles of repairs were made.

PALMER RAPIDS BRIDGE AND ROAD.

Chiefly the completion of a bridge partly built a few years ago, and left unfinished for want of money. The length of bridge with approaches is 412 feet, and is over the York branch of the Madawaska River, on the line of the Palmer Rapids Road.

The road was also made to intersect the Carlow Road, in the county of Hastings, and is constructed on the seventh and eighth concession line of Carlow, and the original road was repaired between the Peterson Road and Madawaska River, six and a-half miles.

PAPINEAU (Concession B) ROAD.

A continuation of work begun last year, and is produced easterly along the west end of concession B, one mile, The work is understood to be very heavy, accounting for the short distance completed.

PAUDASH LAKE ROAD.

A road beginning at the Monck Road about two miles west of the village of Bancroft, and in the township of Faraday. It is made from thence in a south-westerly direction to lot 13 in the eleventh concession; thence west to lot 23 in the same concession, and again south-westerly to lot 33 in the eighth concession, a length of six and a-half miles. It had been cut out by the settlers but was not in a condition for general traffic as it now is.

PEMBROKE AND BARRY BAY ROAD.

Repaired from lot 20 between concessions 10 and 11 of Alice, eastward five miles.

PEMBROKE AND MATTAWA ROAD.

The building of a bridge over McKay's Creek, which was destroyed last year, was the principal work in this case, while some three and a-half miles of the road from the bridge easterly were more or less repaired.

The bridge built is 98 feet long, with opening of 38 feet and piers about 10 feet high.

A good deal of work appears to have been done for this outlay of \$598.

PERRAULT SETTLEMENT AND OPEONGO ROAD,

This is in reality that portion of the old Perrault Settlement Road which is from the Opeongo Road north-easterly. It is one and a quarter miles of repairs.

PERRAULT SETTLEMENT AND SANSON ROAD.

Commences on the road allowance between concessions 8 and 9, and is on the line between lots 20 and 21 of Grattan, to the Opeongo Road.

The work this season was through the seventh and eighth concessions, a mile and a-quarter of construction.

PERTH ROAD.

On the portion of this road which lies between Buck Lake and Bedford Mills, three different points were, by reason of the waters of Rideau Canal, annually flooded. These points have all been improved by raising the road bed above the water line, and the road was also generally repaired for nine miles, from a point about four miles north of "Stone's Corners" north-easterly, and the work reported as highly satisfactory.

POINT ALEXANDER AND BASS LAKE ROAD.

A further production of the road from the end of last year's work along the line between lots 10 and 11 concession B, township of Rolph, westerly towards the Canadian Pacific Railway, one and a-half miles of new road.

ROCHE FONDEAU ROAD,

Begins on the south boundary of Westmeath, on the road allowance between the eighth and ninth concessions, and was continued northward two miles. It also is new work.

Ross Road.

This road is between the fourth and fifth concessions, and from lot 16 to lot 21, in the township of Ross, and is two miles of repairs.

Ross and Bromley Town Line Road.

Three miles of a cheap winter road, built from lot 5 to lot 13 of Ross, on the town line between Ross and Bromley.

Ross and Bromley Boundary Road.

Another portion of the last-named road, from lot 26 concession 1, northward. Two miles of very permanent work.

SCOTT ROAD AND BRIDGE.

The bridging of Paudash Creek was the chief work. It is about 100 feet long, with main opening of 50 feet, and is about 13 feet high above the water.

Some improvements were made on the road near its intersection with the Burleigh Road, in grading the hills and in other ways guarding against accidents.

SHARBOT LAKE ROAD.

This road has been very thoroughly repaired over the two miles which were roughly opened last season and the previous one.

SHAMROCK AND CALABOGIE ROAD.

This begins at Shamrock, on the Opeongo Road, and is from thence south on the line between the tenth and eleventh concessions, of the township of Admaston. The repairs extended two miles and a-half, and are said to have been very well made.

SHAMROCK AND DOUGLAS ROAD.

This road was repaired over its whole length of ten miles, beginning at the intersection of the eighth and ninth concession line of Admaston, with the boundary line between Admaston and Bromley, and extending to the Opeongo Road.

SILVER LAKE ROAD.

A new road opened on the fourth and fifth concession line of South Algona, through lots 22 to 25. It was three quarters of a-mile of low-lying land, requiring a large amount of cross-waying.

Snowdon (10th and 11th Side Line) Road.

The position of this road is as follows:—Commencing at the Monck Road and south boundary of Snowdon; thence northerly between lots 10 and 11, to the line between concessions 1 and 2; thence easterly on the last-named line to the line between lots 11 and 12; thence north on the last-named line to the fourth concession; and thence north-westerly again to the line between lots 10 and 11, a distance altogether of three miles, of which the first half was repairs and improvements, and the remainder new work.

STANHOPE (15 and 16th Side Line) ROAD,

Begins at the Peterson road, and runs north between lots 15 and 16 of Stanhope to Beech Lake. It is two miles long and had been opened some years ago, but was so much grown up as to make these improvements necessary.

STAFFORD ROAD.

This is between lots 3 and 4 of the township of Stafford, and through the fourth and fifth concessions a mile and a-quarter. The work was general repairs and completion of the road.

STURGEON FALLS BRIDGE.

Built over Sturgeon River, immediately above the falls and now within the limits of the village after which the bridge is named. It is an iron bridge and spans the river with one span of 130 feet. It rests upon timber piers about 12 feet high, built upon a rock foundation, to which the piers are firmly rock-bolted and filled with stone.

The superstructure was furnished by the Hamilton Bridge & Tool Company, and erected by the company for the sum of \$3,280, the balance of the expenditure being for the cribs and approaches. The whole work is very satisfactory.

TROUT LAKE AND FOLGER ROAD.

This is a new section on the road allowance between concessions 2 and 3 of South Canonto, between lots 30 and 35. Its length is one and a-quarter miles.

VENNACHAR ROAD.

Improved from Vennachar five miles, and put in very good condition.

WOLLASTON AND FARADAY TOWN LINE ROAD.

It was the intention to construct this road on the town line, but it was found to be impracticable, and the following line was adopted:—Commencing on the town line at lot 34, and from thence north-westerly across lots 24, 25 and 26, to the second and third concession line of Faraday; thence on the last-named line to lot 32, three miles of new road.

WAUGH ROAD.

The Waugh Road is on the north side of Gull Lake, and mostly in the township of Lutterworth, extending from Minden village to Moore's Falls P. O., where it unites with the Cameron Road. Two miles of a very rough portion of it were repaired, from the boundary between Anson and Lutterworth to lot 11 in the fourteenth concession of the last-named township, and a bridge was built over Bob Lake Creek on lot 13, concession 14, 125 feet long, height 11 feet and main span 30 feet.

WILBERFORCE (12th and 13th Concession) ROAD.

This work is really on the line between lots 5 and 6 in the eleventh and twelfth concessions for nearly a mile, and the balance of the work on the last-named concession. About a mile and a-half of repairs.

WILBERFORCE (20th Concession) ROAD.

This road is on the concession road allowance between 20 and 21 from lot 34, westerly to the line between Wilberforce and South Algona; thence north-westerly into the township of Algona, again to intersect the town line about one-third of a mile north of the nineteenth and twentieth concession, and thence again to the boundary line. It is about a mile and a-half of new work, and includes the erection of two small bridges, having spans of 20 and 30 feet respectively.

REPORT

OF THE

COMMISSIONER OF IMMIGRATION

FOR THE

YEAR ENDING 31st DECEMBER.

1886.

To the Honourable John Beverley Robinson, Lieutenant-Governor of the Province of Ontario.

MAY IT PLEASE YOUR HONOUR:

The undersigned has the honour to submit the following Report on the operations of the Immigration Department, for the twelve months ending 31st December, 1886.

In 1886, as compared with 1885, there was an increase of 7,938 in the number of passengers landed at Halifax, Quebec and Montreal; and of 1,315 in the number of immigrants who remained in the Province of Ontario. Owing to the rise in the rate of railway fares between New York and Chicago, a larger number of immigrants than in 1885 passed through Canadian ports and over Canadian railways to the Western States. The immigrants were exceptionally free from disease; most of them had sufficient means to pay their way to their respective destinations, and with the exception of persons who came with the expectation of obtaining light and easy work, there was no trouble experienced, from the middle of March till to the end of October, in procuring employment for them.

FARM PRODUCTS.

The past year was remarkable for the extremely low prices of farm products in England and other countries. As compared with the average prices for the forty years immediately preceding, wheat, in England in 1886, declined thirty-eight and one-half per cent.; batter, twenty-nine per cent.; beef, twelve per cent.; pork, seventeen and one-half per cent.; potatoes,

twenty-five per cent.; and wool forty-three per cent. This extraordinary decline in prices, has been very disastrous to the farming interests of Great Britain and Ireland, and, remotely, injurious to those of other countries, our own especially, which are dependent on British markets for the sale of surplus products.

FARM LABOURERS.

In view of the general fall in the price of farm products, a like decline might have been expected in the rate of wages paid to farm labourers. This, however, was not the case, owing, principally, to the demand for general labour. Wages during the past twelve months were kept up to the standard of the previous year. Experienced farm labourers, newly arrived, commanded from \$150 to \$175 per annum, and persons having previous experience of Canadian farming \$170 to \$200, with board and lodging in both The demand commenced early in April and continued till the end of October, all the farm labourers arriving during that period being engaged almost immediately on their arrival, and settled at little expense to the Government. It has been ascertained that the average outlay for farm labour in Great Britain is \$5 per acre; but when farming is carried on scientifically, with the use of artificial manures and with the most improved machinery, the cost of manual labour has increased to about \$15 per acre. High class farming, such as this, can be made profitable only when farm products command In the Lothians, Scotland, where farming has been, for many years, carried on with great skill and success, it is believed that, on many farms, fewer men will be employed than formerly, and that those thrown out of employment will either emigrate or go to the large cities. Should these men decide to come to this Province, they may rest assured that their skill and energy will here command fair remuneration, with prospects of advancement, which their native land cannot afford. It would be well for township municipalities to ascertain, through the assessors, the cost per acre, in this Province, for labour, for machinery, and for artificial manures.

FEMALE DOMESTIC SERVANTS.

During the last two years few domestic servants have reached this Province. This is mainly due to the fact that they are offered free passages to the Australian colonies, while they must pay \$21.75 from Liverpool to Toronto. General servants, steady, industrious, with good health, may here obtain constant employment at \$10 per month, with maintenance.

THE COLONIAL EXHIBITION.

The great success of Canadian exhibitors has done much to make known the resources of this Province, not only in Great Britain but also in Continental Europe. The magnificent display of cereals, fruit and honey, must have been a convincing testimony to the fertility of our soil and the excellence of our climate. With a view to making this Province still better known in connection with the exhibition, I caused a pamphlet to be prepared specially for the information of tenant farmers and capitalists, of which many thousand copies were distributed. I have reason to believe that the

information thus disseminated at a time and place at which the more important statements could be verified, by reference to the products of Canadian soil, mine, and forest, as well as to the results of mechanical and artistic skill, will lead many valuable emigrants to transfer their capital and skill to this Province.

In adjusting the machinery of the Department to the existing requirements of the Province I have been enabled to dispense with the agency at Quebec, and also with the local agent at the Immigration Sheds, Toronto.

The arrivals at Quebec in 1885 and 1886, respectively, were as follows:-

1885—Steerage passengers, 14,220; Cabin, 2,508	16,728 22,384
Increase in 1886	5,656
Total arrivals at Halifax in 1886	5,656 22,384 2,701
Total arrivals at Halifax, Quebec and Montreal, in 1886 Total arrivals at Halifax, Quebec and Montreal, in 1885	30,741 22,803
Increase in 1886	7,938

The following is a statement of the number of immigrants settled in the Province of Ontario, through the Ottawa, Kingston, Toronto, Hamilton, and London Agencies, with their nationalities, during the years 1877, 1878, 1879, 1880, 1881, 1882, 1883, 1884, 1885, and 1886, respectively:—

Year.	English.	Scotch.	Irish.	German.	Other Countries.	Total.
1877.	4,891	1,362	1,310	756	3,335	11,654
1878.	6,124	1,785	1,551	620	2,975	13,055
1879.	12,169	2,894	3,993	1,450	3,901	24,407
1880.	7,980	3,027	4,518	1,197	2.569	19,291
1881.	7,704	3,070	4,521	1,274	1,664	18,233
1882.	10,873	3,173	6,322	1,033	1,290	22,691
1883.	11,954	2,658	8,993	1,384	2,130	27,119
1884.	11,020	2,623	3,783	1,716	3,136	22,277
1885.	7,261	2,131	2,105	1,098	1,378	13,973
1886.	8,344	2,268	2,497	936	1,243	15,288

The above table shews an increase of 1,315 in 1886, as compared with 1885.

The total arrivals in and departures from Ontario, in 1884, 1885, and 1886 respectively, were as follows:—

ervery, were as rome			Passed	Remained in
Via St. Lawrence.	United States.	Total Arrivals.	through the Province.	
1885—13,127	28,726	41,853	25,139	13,973
1886—16,553	52,986	$69,\!539$	54,251	15,288
Increase	in 1886			1,315

The immigrants settled in this Province during the years 1877, 1878, 1879, 1880, 1881, 1882, 1883, 1884, 1885, and 1886, were distributed through its respective Agencies as follows:—

Year.	Ottawa.	Kingston.	Toronto.	Hamilton.	London.	Total.
1877.	431	743	2,534	6,590	1,356	11,654
1878.	416	746	4,602	6,348	943	13,055
1879.	608	1,134	9,509	10,639	2,517	24,407
1880.	767	1,363	7,094	8,241	1,826	19,291
1881.	977	2,187	7,779	6,227	1,063	18,233
1882.	2,248	5,473	8,404	5,365	1,201	22,691
1883.	2,670	3,984	11,233	7,535	1,697	27,119
1884.	3,033	3,196	7,229	7,176	1,643	22,277
1885.	1,398	1,877	5,166	4,698	834	13,973
1886.	1,072	2,173	6,045	4,705	1,293	15,288

In addition to the above immigrants, the following numbers were reported through the Customs as having arrived and settled in Ontario:—

^{*}The Immigrants settled through Agencies, and those reported through Customs, are included in the totals up to the year 1874.—D. S.

Further details will be found in the various appendices to this Report. All of which is respectfully submitted.

ARTHUR S. HARDY, Commissioner.

TORONTO, January, 1887.

APPENDICES.

No. 1.

ANNUAL REPORT OF PETER BYRNE, Esq., ONTARIO IMMIGRATION AGENT, LIVERPOOL, ENGLAND.

Ontario Government Agency,
Nottingham Buildings, 19 Brunswick Street,
Liverpool, December 31st, 1886.

The Hon. Arthur S. Hardy,

Provincial Secretary, etc., Toronto.

Sir,—I have the honour to report that the work of this Agency for the past year has mainly consisted in directing the attention of the most desirable portions of the emigrating public, and especially tenant farmers, to the advantages offered by Ontario as a place of settlement to persons of moderate capital and practical knowledge of agriculture; and in imparting information by correspondence, and otherwise, to all enquirers.

I have advertised, to a greater or less extent, in upwards of 250 newspapers, several of them having a very large circulation; also in all the principal agricultural journals

published in the United Kingdom.

I have also distributed, through many different channels, a large number of

pamphlets, maps, leaflets and official reports in all parts of the country.

Every letter of inquiry addressed to the office receives a careful answer, accompanied

by one or more publications.

During the past year I have had recourse, more than formerly, to the plan of distributing our pamphlet, etc., direct to farmers and others on market days in the country towns. A considerable number has been disposed of in this way during the past year in the counties of Lincoln, York, Norfolk, Suffolk, Essex and Kent; and I am arranging to follow the same plan, as far as practicable, in Ireland and Scotland.

In accordance with your instructions, I had a large quantity of printed matter, including the bulk of the consignment of the illustrated pamphlet, "Pictorial Ontario," distributed at the Colonial Exhibition. The Royal Commissioners provided an emigration inquiry office within the Exhibition grounds, where supplies of pamphlets, etc., relating to each colony were kept and freely given to all persons who applied for them. I ought to mention that Dr. May and Prof. Robertson, in charge of the Dairy Exhibit, kindly lent their assistance in distributing Ontario pamphlets, at their respective offices in the Exhibition.

It may reasonably be expected that the Exhibition has done much to raise the world's opinion of Canada, and especially of her chief Province. The immense variety and general excellence of our exhibits excited astonishment and admiration on every hand. To close observers of the crowded courts from day to day, it was obvious that not one in a thousand of the visitors had ever before even faintly realized that Canada was capable of sending forth so magnificent a display of natural and manufactured products. But

it remains to be seen what influence the Exhibition will have on the future course of emigration. If it has any marked bearing upon it, Ontario ought to feel the benefit of

its influence during the incoming year.

Of the natural products of Canada at the Exhibition, perhaps the most popular and attractive were the grand shows of Fruit and Honey. A noteworthy incident in connection with these exhibits was the publication in that well-known and universally read paper, the Pall Mall Gazette, of two interview articles by the Editor, entitled, "The Bee King of Canada," and "The Fruit King of Canada." These articles consisted of many facts of the most interesting nature, elicited from Mr. D. A. Jones, President of the Ontario Beekeepers' Association, and Mr. O. McDonald Allan, President of the Ontario Fruit Growers' Association, regarding the important industries which they respectively represented at the Exhibition. Being struck with the value of these articles as a contribution to our Emigration literature, I thought it well to have them reprinted in leaflet form for distribution throughout the agricultural districts. I have had, accordingly, 100,000 copies struck off for this purpose, of which a considerable number has already been disposed of. Both bee culture and fruit growing possess attractions for many persons outside the agricultural profession; and the accounts given of the successful way in which they can be carried on in Ontario, are well calculated to arrest the attention of intending emigrants of moderate means who prefer such pursuits to general farming as a means of living. It was in the hope of attracting settlers of this desirable class, that I decided on circulating the leaflets in question, and I trust my action in the matter may meet with your approval.

I cannot forbear alluding to another prominent feature of the Exhibition which reflected infinite credit on our Province, namely, the Ontario Educational Exhibit. Admirably arranged by Dr. May, and occupying a most favourable position, it attested, in the clearest manner, the great importance which popular education holds in the estimation of the Government and people of Ontario. It demonstrated what I never fail to emphasise when speaking or writing on the subject of Emigration, that the educational advantages enjoyed by Ontario are among its chief recommendations as a home for families

of limited means, and with children to educate and start in life.

During the year I have sent to nearly all the Free Libraries in the country, copies of the new pamphlets (in some cases several copies) for reference and for use in their reading rooms.

I have also supplied a considerable number of pamphlets, leaflets, etc., to the steam-ship companies for distribution to their agents and clients, and on board their steamers,

and have still in stock an ample supply for the present season.

The correspondence of the office during the year has been, as usual, with nearly all classes of people, and from all parts of the three kingdoms; also from the Continent of

Europe, and even from Australia and India.

I continue to have many enquiries regarding the Guelph Agricultural College, showing a widespread confidence here in the valuable course of instruction and training to be obtained by young men in that institution. Some misconceptions, however, seem to prevail with regard to it, and these I endeavoured to correct in a communication which I recently addressed to the Canadian Gazette.

The reports of the Ontario Bureau of Statistics are in much and increasing demand in this country. I shall, therefore, be glad to receive a larger supply of them than here-

tofore for distribution.

I may add, in conclusion, that in all my efforts to make our Province and its resources and capabilities better known in the Old Country, I keep steadily in view the only classes who are required and are welcome as emigrants at the present time, and give encouragement to no others.

I have the honour to be, Your obedient servant,

> P. BYRNE, Agent for Ontario.

No. 2.

REPORT OF R. M. PERSSE, Esq., ONTARIO IMMIGRATION AGENT, QUEBEC.

DEPARTMENT OF IMMIGRATION, ONTARIO, TORONTO, January 5th, 1887.

The Hon. A. S. Hardy, M.P.P., Commissioner of Immigration, etc., Toronto.

Sir,—I have the honour to submit the following annual report, shewing the total arrivals of cabin and steerage passengers at the port of Quebec during the navigation season of 1886, to which I have appended statistical tables, shewing the nationalities of the immigrants, and the general destinations of the steerage passengers.

The total arrival of immigrants at Quebec during the navigation season of 1886. which opened on the 29th April and closed on the 13th November, were:—

Cabin Steerage	
Total	22,384
The corresponding figures for the previous year were:—	
Cabin Steerage	2,508 14,220

The arrivals compared with those of 1885, show an increase of 5,656 souls.

The nationalities of the cabin and steerage passengers of 1886, compared with those of 1885, were as follows:—

	1885.	1886.	1886.	1886.	
Nationalities.	Cabin and Steerage.	Cabin and Steerage.	Increase in	 Decrease in 1886	
English	10,338	13,098	2,760		
Irish	1,897	2,197	300		
Scotch	2,234	2,590	356		
Total from British Isles	14,469	17,885	3,416		
Total from other countries	2,259	4,499	2,240		
Grand total	16,728	22,384	5,656		

The steamers of the Canada Shipping Co, from Liverpool and Queenstown, disembarked their passengers, during the navigation season, as in the previous year, at the port of Montreal, and are not included in the general returns in this report.

The number of passengers were:—

Cabin	427
Intermediate	103
Steerage	2,171
Total souls	2.701

The general destinations of the steerage passengers for the years 1885 and 1886, respectively, were as follows:—

GENERAL DESTINATIONS OF THE STATUTORY ADULT STEERAGE PASSENGERS.	1885.	1886.
Maritime Provinces	$42\frac{1}{2}$	$59\frac{1}{2}$
Eastern Townships	337	460
Montreal City	$1,829\frac{1}{2}$	$2,295\frac{1}{2}$
British Columbia	25	270^{1}_{2}
Manitoba	$1,386\frac{1}{2}$	$2,149\frac{1}{2}$
United States	$1,464\frac{1}{2}$	$3,259\frac{1}{2}$
Ontario	5,607	6,909
Total adults	10,692	1,5403½
Add for children and infants	3,528	$4,277\tfrac{1}{2}$
Total steerage passengers	14,220	19,681

The following shews the location in Ontario of the 6,909 adult steerage passengers who settled in the Province in 1886:—

Ottawa City	$692\frac{1}{3}$
Ottawa District	_
Kingston City	
Kingston District	
Toronto City	_
West and North of Toronto, in Ontario	_
m . 1	<u> </u>
West and North of Toronto, in Ontario	

The following statement shews the number of children assisted by various parties to emigrate and settle in the Province of Ontario, during the year 1886:—

		SEX	ŒS.	er	
Date.	By Whom Assisted.	Males.	Females.	Total number of souls.	Homes in Ontario.
June 8th June 7th	~ 1 11 15 ~ 1	4 112 159 59 33 382 92 69 31 95 68	106 103 115 32 233 37 33	110 215 274 91 33 615 129 102 31 95 68	"Our Western Home," Niagara. "Boys' Home." Stratford. NEW IMMIGRATION BUILDING.

The temporary offices at Point Levis, occupied since the fire of 1882 by the agents of the respective Governments, were pulled down last season, and on the site the Grand Trunk Railway Company erected thereon a two-story Immigration Building. On the ground floor is a large waiting, or reception room for women and children, located in the west end. The eastern end is divided into small, yet comfortable, offices for the agents of the respective Governments, as also the officers of the G.T.R. The Dominion and Ontario offices, occupying the best positions, as they front on the wharf facing the immigrants on disembarking from each steamship.

On the top floor are to be found dressing-rooms, fully furnished with wash basins, towels, etc., where the immigrants can thoroughly cleanse both their persons and clothing before proceeding on their railway journey. There are also compartments furnished as sleeping-rooms for women and children, who may be too weak to travel after a long and weary sea voyage, where they can wait a day or two to recuperate. This part of the building is in charge of Mr. Albert Marquette, Government caterer, a gentleman well suited for the position, who treats the newly arrived immigrants with courtesy and politeness,

and carefully looks to their interest and comfort while in his charge.

The steerage passengers of the season were of a fair average. They were composed of the usual classes: mechanics, farmers, farm labourers, navvies and general workingmen, with a few female domestic servants; the arrivals of the latter class was the smallest for many years.

I have the honour to be, Your obedient servant,

R. M. PERSSE.

No 3.

ANNUAL REPORT OF EDWIN McC. CLAY, Esq., DOMINION IMMIGRATION AGENT, HALIFAX.

Dominion Immigration Office, Halifax, Nova Scotia, February 1st, 1887.

SIR,—Enclosed please find a statement of Immigration at this port for the year ending the 31st December, 1886.

The total number you will see is 5,656, an increase over last year of 1,229.

The class of people arriving has been about the same as last year.

The different lots of children, I must say, were the finest I ever saw.

Yours obediently,

EDWIN McC. CLAY.

DAVID SPENCE, Esq.,

Secretary Ontario Immigration Department, Toronto.

No. 4.

ANNUAL REPORT OF RICHARD MACPHERSON, Esq., DOMINION IMMI GRATION AGENT, KINGSTON, ONTARIO.

GOVERNMENT IMMIGRATION OFFICE,

Kingston, 3rd January, 1887.

Sir,—I have the honour to submit, for the information of the Honourable the Commissioner of Immigration, my annual statement for the year ended 31st December, 1886.

The number of immigrants remaining in this Agency during 1886 exceeded that of the previous year by a little over fifteen per cent.; they were generally of a good class, and all were satisfactorily placed at fair wages. The capital and value of effects brought by immigrants to my district during the past year, so far as I have been able to ascertain, amounts to \$53,260.

Applications made at this office for farm labourers have not been so numerous the past year as they were in 1885; still the demand far exceeded the supply, and very many more good farm men than came to me could have been placed at good wages, also female servants. I anticipate a large demand for female domestic servants and farm labourers the coming season, and trust that very many of both these classes may arrive within this district during the present year.

The immigration of children into this Agency is largely on the increase, and from my knowledge of the general satisfaction they are giving to the parties with whom they have been placed, and the care generally exercised in looking after their welfare, I am satisfied this class of immigration is beneficial to this Province and of great advantage to the children. Of course there are exceptional cases where some have turned out badly, and also a few cases where children have been placed in homes, in my opinion not altogether suitable; but when the numbers of such are taken into consideration, they will be found but a very small proportion to the whole.

There was but little sickness among the immigrants arriving in this district, not any

of a serious nature, their health being generally very good.

The farmers in my district are paying more attention to stock raising than in former years, both as to quality and quantity, which is most desirable; and the increase in the

export of cheese from this Agency is very great.

No complaints whatever have been made of inattention or neglect while travelling, and many of the immigrants have spoken to me of the kind treatment they had received on the different lines of railway from all classes of employés, without exception.

All of which is most respectfully submitted.

I have the honour to be, Sir, Your obedient servant,

R. MACPHERSON,
Government Immigration Agent.

DAVID SPENCE, Esq.,
Secretary Department of Immigration,
Toronto.

R. MACPHERSON,

(Signed)

No. 5.

ANNUAL REPORT OF JOHN A. DONALDSON, Esq., DOMINION IMMIGRATION AGENT, TORONTO.

IMMIGRATION OFFICE,

Toronto, December 31st, 1886.

SIR,—I have the honour to submit this, my twenty-sixth annual report, showing the

workings of this Agency during the year ending 31st December, 1886.

The total number of arrivals during the year were 11,641 souls, an increase of 3,337 over last year. Of these 10,615 came by way of Halifax and Quebec, and 1,026 by the various ports of the United States. Their destinations were as follows:—

Remained in Ontario	6,045
Passed through to the North-West	1,976
Passed through to the United States	3,620

The apparent smallness of the numbers passing through to the North-West is accounted for by the fact that the majority of those going there now take the all rail route from Quebec, north of Lake Superior, consequently they do not pass through this Agency as in former years.

The Immigrants arriving here during the year have been, generally speaking, of a very superior class, many of them having considerable capital, and but very few requir-

ing assistance.

The health of those arriving has been above the average, only a few cases of sick-

ness being reported, and those principally children.

There has been a brisk demand for good farm labourers and domestic servants, and especially for the latter, the applications numbering several hundreds, which could not

possibly be filled.

The completion of the Ontario and Pacific Junction Railway this year, opens up a large section of country in the Muskoka and Nipissing districts for subtlement. Quite a number of immigrants and others have gone in during the past year, and the additional railway facilities will be the means of settling up a vast extent of country hitherto very difficult of access, and providing a route from this section of Ontario to the North-West some two hundred miles shorter than heretofore.

The Canadian Pacific Railway now completed from ocean to ocean, will undoubtedly be the means of inducing many valuable settlers to make their homes in our immense

North-West Territories.

The Colonial Exhibition, held in London this year, has also brought this colony well before the people of England, and as a result we have had many enquiries, by letter, from persons there, who are desirous of learning something further about this country, and the advantages it holds out to men with a little capital.

The cattle trade between Canada and Europe has now grown into vast importance, while the visit of the British army officers to this country for the purchase of horses for army purposes, will also open a new field for enterprise among our farmers and horse

breeders.

The great gathering of the Knights of Pythias in our city this summer will be the means of disseminating a knowledge of this country throughout the United States; one and all expressed their delight and surprise at the resources and prosperity of our country, and our City of Toronto called for their especial praise. The population of this city now numbers some 130,000 inhabitants, with nearly 20,000 public and private buildings, 107 churches, and 170 miles of streets, together with a very large number of manufacturing establishments.

Too much cannot be said in favour of the various railway companies carrying immigrants over their lines. Not a single complaint of inattention or incivility has reached this Agency, but on the contrary, many acts of kindness have been performed by conductors, trainmen and other railway employés, to immigrants while *en route*.

All of which is most respectfully submitted.

I have the honour to be, Sir, Your obedient servant,

> J. A. DONALDSON, Government Immigration Agent.

No. 6.

ANNUAL REPORT OF JOHN SMITH, ESQ., DOMINION IMMIGRATION AGENT, HAMILTON, ONTARIO.

Immigration Office, Hamilton, Ontario, December 31st, 1886.

SIR,—I have the honour to submit the following Annual Report, with tabular statements, showing the arrivals and departures of immigrants at this Agency for the year ending 31st December, 1886.

The past year shows a slight decrease of 67 in the immigrants settled in Ontario, as

compared with the corresponding period of 1885.

There is an increase of 1,072 passing through to Manitoba and the North-West Territories from the Ports of New York, Boston and Philadelphia, the States of New York, Pennsylvania and the States of New England.

There is also an increase of 22,780 immigrants reported as passing through this Agency, to the Western States. This large increase has been caused by the withdrawal of all cut rates, the former basis having been restored by the Pool Managers, each road receiving its allotted per centage of the business.

Statement A shows the arrivals and departures of immigrants at this Agency.

Statement B shows the arrivals and departures, the number of free meals, lodgings, and free passes by railways.

Statement C shows the monthly arrivals and departures, the general destination, the capital brought into Canada and the value of immigrants' effects.

Statement 1) shows the monthly arrivals of immigrants via the St. Lawrence and settling in Ontario.

Statement E shows the monthly arrivals of immigrants via the United States settling in the Dominion and those passing through to the Western States.

Statement F shows the arrivals and general destination of the immigrants.

Statement G shows the number of children brought into and settled in Canada by the Philanthropic Societies.

Statement H shows the number of immigrants to whom assistance has been rendered by the Agency.

Statement I shows the amount of capital reported as brought into Canada.

Statement J shows the number of passes granted and destination of the immigrants. Statement K shows the number of immigrants settled in Canada, and their destination.

Statements L, M, N and O, show the number of immigrants and the value of their effects, as reported at the respective Ports of Entry.

Statement P shows the total number of immigrants and the value of effects, reported at the customs Ports of Entry.

Statement Q shows the number of immigrants settling in Canada and those passing through to the Western States.

Statement R shows the rate of wages paid in the district of the Hamilton Agency. Statement S shows the prices of the different articles of food entering into general consumption by the working classes.

The immigrants arriving at this Agency and settling in the Dominion during the past season, have been a good class and most of them have required little or no assistance being self-reliant and capable of providing for themselves.

The number of mechanics who arrived and reported themselves at this Agency during

the year only numbered fifteen, all of which found ready employment.

The great majority of immigrants that arrived here consisted of agricultural and general laborers with their wives and families, who readily found employment being well adapted to the wants of the country.

During the year a number of young men arrived for the purpose of acquiring a knowledge of Canadian farming with the view of taking up homesteads for themselves in the North-West; or purchasing improved farms in Ontario after they have acquired the practical experience so as to enable them to invest their capital to advantage.

There has been an active demand for all kinds of agricultural and general latorers and female domestic servants, also for all classes of operatives, artizans and skilled

mechanics in the building trades.

There is a steady and growing demand for immigrants at this Agency, all of which have been easily located until the winter set in and since then we have had very few arrivals.

Agricultural Labour has been in great demand during the past year, the applications being largely in excess of the supply, as the Agency has not been able to supply twenty per cent. of the number applied for, which caused a good deal of disappointment to the farming community. Wages have been well maintained, \$150 to \$175 being paid by the year for all first class hands, and \$12 to \$15 by the month for the year; and from \$15 to \$20 per month for the summer season, including May and September, and from \$20 to \$30 per month for the harvest season. The above rates include board and lodging.

Female servants have been eagerly sought after during the year, the applications being out of all proportion to the supply. There is a steady, increasing demand for all classes of female domestics, both for town and country, with a tendency to advancing wages. This class of immigrants can readily find employment at any season of the year.

Mechanics.—There has been a decided improvement in the demand for all classes of mechanics during the past season, with the exception of vice and lathe hands, fitters, millwrights and pattern makers, and with this class there should be no encouragement offered to them to emigrate.

Juvenile Immigration.—During the past year I have inspected a large number of the children brought out by the different Philanthropic Societies, and placed in the district of the Hamilton Agency, which extends to the Niagara–River and Lake Erie on the south and to the Georgian Bay and Lake Huron on the north; and I was agreeably surprised to find such a large number doing well and giving good satisfaction in the homes of their adoption. Many of the orphans have been well provided for, their foster parents having made ample provision for them by settling their property upon them after their demise.

Most of the children attend day school during the winter and the majority attend all the year round, whilst all attend Sunday School and church with very few exceptions. I found a small per centage of undesirable and bad boys, that had been taken out of the Industrial Schools previous to being sent out here.

With only two exceptions I found the children well provided for in good respectable homes, and in the cases alluded to I have adopted measures to have the children removed to more suitable homes.

In the past there has been an earnest desire on the part of the farming community to secure these children, and up to the present time the supply has not been equal to the demand.

As the general tendency on the part of the Societies and individuals engaged in this class of emigration is to extend the work, thereby increasing the numbers brought out, it will be necessary to exercise a keen supervision over the work and the class of children, and the source from which they are taken.

I should strongly recommend that no child should be allowed to be brought out that was not perfectly healthy and possessed of a fair average intellect; and under no circumstances should any children be allowed to be taken from any of the Reformatories or Industrial Schools to which criminals are admitted, or in other words when the Industrial School is a prison under another name.

Mill Operatives.—The arrivals during the past year have been very light. Those having arrived have been eagerly sought after as the demand has been largely in excess of the supply. A number of the mills having been kept back with their work for the

want of weavers, and in a number of instances the mills have heen advertising for operatives, whilst others have had to go outside of the Dominion to obtain the necessary hands required.

Manufacturers' Operatives.—There has been a good demand during the year, especially in the ready-made clothing departments, some of the establishments having had to advertise

for hands.

Common and Skilled Labourers.—There has been a good demand for all skilled labourers during the past year, and there has been great difficulty in obtaining stone masons, stone cutters, quarry men and bricklayers, and for this class of men I have not been able to supply ten per cent. of the demand made upon the agency.

Agriculture.—The crops during the past year have been deficient in fall wheat, hay and clover, with light pasturage. Barley and oats have done well, with over an average crop. Roots have also been a good crop. Owing to the low prices of cereals, farmers are still further directing their attention to mixed farming and rotation cropping, with beneficial results, as more stock is required, thereby increasing the supply of manures so much required for the wornout wheat lands which have been impoverished by continual grain cropping.

Stock Raising.—This branch of agriculture is in a very healthy condition, an improved development taking place in all the leading herds and the general stock of the country.

During the year there has been an increase of young stock, for which there has been a good demand for all desirable lots, especially for high breed grades for feeding purposes.

There has been a good export demand for all prime and extra lots, with a downward tendency in prices.

Transport Companies, both by rail and ocean, have demanded full rates, which has been discouraging to some of the shippers that have been eaught with a falling market.

The losses ensuing from casualties and shrinkage have been light during the shipping season, and the cattle, as a rule, have been landed in a capital condition, at the ports of debarkation.

By the strict quarantine regulations adopted and enforced by the Government, Canadian herds have been kept free of all contagious diseases, which still enables all Canadian cattle to be landed at any port in the United Kingdom; also securing to shippers the advantage of transhipping to any of the interior towns or local markets where sales can be most advantageously effected, either for slaughtering or grazing purposes.

Herds.—During the year there has been a steady increase in the number, and a marked improvement in the leading breeding establishments of the Province; there is also a marked and steady improvement in the development of the stock held by the farm-

ing community.

Owing to the breaking out of Pleuro-Pneumonia at the Point Levis quarantine grounds, and the prevalency which the disease has attained in England and Scotland, importations of pure bred stock have been curtailed and restricted. A number of animals having been purchased previous to the breaking out of the disease in the quarantine grounds, have been held over in the United Kingdom until such time as the owners can conveniently ship them.

As the disease was strictly confined to the quarantine grounds and effectually stamped

out, shipments may be expected to be resumed in the spring of next year.

During the year there has been a fair demand for all choice shorthorn offerings, which still take the lead, with the Polled Angus and Herefords closely following them.

At the Provincial, Central, Toronto, and County Shows, there was a fine display of pure bred stock of all the different tribes, being selected from all the leading and favourite families, with the Booth blood strongly in the ascendant amongst the shorthorns. The Stoke Pogis, Victor Hugo and St. Helier, taking the lead amongst the Jerseys.

At the Counties' Christmas fat stock shows, the animals exhibited gave evidence of high class breeding, and for form and quality could not be excelled in any country in the world. There was a keen competition for all offerings, some of the purchases being for export. The great majority of the sales being for home consumption, the purchasing

power of the people having largely increased during the past decade.

There has been an active demand during the year for milkers for dairy purposes, all offerings meeting with ready sales at fair prices.

The Jerseys are still pushing to the front as the coming butter cows of Canada. During the year there has been a keen and competitive demand for all offerings from the favourite families, the selections commanding high prices, which have been taken by the leading American breeders for the enriching of their herds.

The Holstein tribe were well represented at the principal gatherings, some of the families being possessed of great merit. This breed is gaining favour, being possessed of good milking qualities, with a large frame and good constitution, and well adapted for grazing purposes.

Horses.—During the past year there has been a good demand for all sound and useful animals for contractor's work and street car purposes, and for heavy draught horses, carriage and saddle horses and roadsters. The principal market continues to be the United States.

During the season a commission arrived out from the British Government for the purpose of purchasing young horses for remounts for the army. The commission purchased a limited number as an experiment, which were shipped and arrived in good condition in Britain, and which have been highly approved of by the army authorities, who are about to establish agencies for the purpose of extending their purchases.

The imports during the year are represented by the Clydesdales, Shires, Cleveland Bays, Percherons, and a sprinkling of thoroughbreds from Britain; in addition a number of thoroughbreds have been imported from the United States.

A large number of imported Sires have met with ready sale for exportation to the United States.

Sheep.—In the commencement of the year, the prices of wool continued low, but as the season advanced an increase in value took place of fully twenty to twenty-five per cent. on the coarser grades, and from forty to fifty per cent. on the fine staples.

Owing to the depressed state of the wool market for several years past, the farmers have been gradually going out of sheep raising, and during this year the flocks have been materially reduced by the increased demand for exportation.

Large additions have been made to the flocks of the ranching district of the North-West Territories, which is admirably adapted for grazing, but at present there is a serious drawback connected with the profitable realizing of the clip owing to the high rates charged for transportation—amounting to three and one-half cents per pound from Calgary to Hamilton, the principal wool market of Canada, the rate being higher than the rates from Australia and the Cape. The shippers having the advantage of the British, Canadian and the United States markets, whilst the ranchers are confined to the Ontario markets, being shut out from the States by the high rate of duty, and being cut off from Quebec by the low rates of freight upon foreign wools shipped from Liverpool to Montreal.

Another drawback to the profitable shipping of wool from Calgary is caused by the staple being shipped without the sheep being washed previous to clipping, the loss in scouring amounting to fifty per cent., making the actual cost of the freight seven cents per pound to be deducted from the gross sales, thereby reducing the net amount to that extent.

If the present policy is persisted in by the farmers, the Province of Ontario will suffer materially not only from the loss arising from the wool sales, but also from the depletion of the flocks, and the consequent injurious effect which must necessarily follow by the withdrawal of such a valuable portion of the stock which is so essential to the success of Canadian farming.

Hogs.—There has been a good demand during the year both for summer and winter curing, with an advance in price upon all grades; all of which has been taken for home consumption, illustrating the largely increased purchasing power of the manufacturing districts, as formerly the great bulk of the hog crop had to be exported, and which is now entirely cut off, higher prices being realized for the home consumption.

In my last year's report I had occasion to allude to the hog cholera, or more strictly speaking hog fever, having been developed in several of the Western Ontario Counties. The measures adopted by the Dominion Minister of Agriculture, and the cordon established and enforced in the infected districts has proved effectual, in not only controlling, but stamping out the disease.

Dairy Produce.—During the past year, owing to the cold, wet weather in the spring, and the summer drought, the pastures were below the average, which has caused a falling off in the make of cheese. Whilst the quality has been good, and although prices ruled low in the early part of the season, values commenced to rapidly advance, which were

maintained to the close at outside figures.

The butter industry is still in a very unsatisfactory state, although from the measures adopted, both by the Dominion and Provincial Governments, there has been a marked improvement in this branch of dairy industry. The creameries have made considerable progress during the past year, and have established a first-class British reputation for all creamery lots, Canadian shipments now ranking equally with Danish and commanding the highest rates in all the leading and local markets.

At the Colonial and Indian Exhibition, special attention was called to the excellent and extensive exhibit, and the methods adopted by the creameries in the collection of the

cream and the mode of manufacture.

Honey.—There was also a large display of honey at the Exhibition, which met with ready sale owing to its superior quality, and dealers have been anxious to secure further shipments to meet the growing demand, thereby establishing a safe and reliable market for this article of Canadian produce.

Fruit.—The crop during the past year was an average one, with the exception of

peaches, which was an entire failure.

During the latter part of the Colonial and Indian Exhibition, held at Kensington, the Department collected and forwarded a large quantity of fruit from the Hamilton district to the Exhibition, comprising over eighty varieties of apples, thirty of pears, and forty of grapes in addition to other varieties, which arrived in good condition. The exhibit was highly commented upon by the British press, and created a perfect surprise upon the minds of the visiting public.

In addition to the fruit, the Department also shipped large samples of field roots and garden vegetables, also a large collection of cereals, which created a great interest amongst the farming community of Great Britain, causing a large number of the tenant farmers to

turn their attention to Canada.

Lumber.—During the past year there has been a large local demand for the building trade and for general purposes, the supply being obtained from the Georgian Bay and Muskoka districts, being conveyed over the lines of the Northern and North Western Railway, and distributed east and west from Hamilton, by the Grand Trunk line of railway.

Manufacturing Industries.—There has been a marked improvement during the past year in all branches of this important industry, more especially in the textile fabric manufactories, giving increased employment and swelling the importation of raw materials to be converted into manufactured goods, thereby giving increased employment to the labouring classes, and increasing the purchasing power of the Dominion, and an increased demand for all lines of goods of Canadian manufacture, and extending the local markets for the products of the farming community.

The improvement has extended to the iron trade; the foundries have been running

on full time.

The machine shops have been running on full time, some of them having worked

over-time owing to increased orders.

The rolling mills have also been kept busy, running on double shifts to fill their orders for round and square bars. The nail factory has also been kept on full time; also the iron pipe foundry and the bridge works have had difficulty in keeping up with their contracts. All the other factories have participated in the general improvement.

Building Trade has been very active during the year, and the contractors have had

great difficulty in obtaining hands to complete their contracts.

Flour Mills.—During the past year the mills have not been actively engaged, the

millers having experienced difficulty in securing markets and marginal profits.

Railways.—În no department of business has there been more activity than that accruing to the railways, both the tonnage and the gross receipts showing a very large increase over the corresponding period of the previous year. Rates, both on passengers and freight, have been restored to a paying basis, whilst the working expenses show a reduction, thereby indicating a large and favourable increase to the net revenue.

The rolling stock and motive power have been fully employed, and the traffic of most of the roads is now limited owing to the want of cars, especially is this the case in regard to the coal traffic, which is causing serious inconvenience in some of the large

centres.

The improvement in the traffic has effected the local, as well as the through business, conclusively showing that there has been an improvement in business and a large increase in the general prosperity of the country.

Railway supplies have continued to rule low, and the contracts for steam and other coal were secured at very low rates, enabling managers to operate their lines to advantage,

and to reduce their working expenses below the charge of previous years.

Commerce.—During the past year the business has been handled with a good deal of caution, both by the wholesale and retail houses—the retail houses buying for immediate consumption, most of the old stock having been worked off so that the product of the mills and manufactories are being bought for present use.

Caution is still largely exercised in granting or extending credits; and renewals meet with very little favour when applied for. Engagements have been fairly met, and

remittances, as a rule, have been of a satisfactory character.

Free Grant Lands.—The Northern and Pacific Junction Railway having been opened for traffic, settlers have availed themselves of the facilities for taking up land in the free grant districts of Muskoka, Parry Sound and Nipissing, some of the townships being well

adapted for settlement.

At present no special arrangements have been effected between the Government and the Railway Companies, for the granting of commutation as to actual and intending settlers on the free grant lands of Ontario. Such an arrangement would be of great advantage to the settler, and would be conducive to the best interests of the Government and the railway proprietors, as any benefit conferred upon the one must necessarily be shared in by the others.

A portion of the Ontario free grant district, is well adapted for stock raising and grazing purposes, but in order to make the lands available it would be necessary to regulate the land regulations so as to enable the Government to make grants for the

purpose upon such terms as might be deemed most advisable.

The district of Temiscamingue is well adapted for settlement, the land being of superior quality, offering great inducements to intending settlers. This district offers great attractions and will ultimately become the centre of a large and prosperous population, so soon as the surveys are completed and colonization roads opened up, and the necessary railway accommodation has been provided.

The number of people leaving for British Columbia from Ontario, is in excess of last

year, whilst those leaving for Manitoba and the North-West has decreased.

The past year also shows a falling off of Canadians, leaving for the North-West States and Dakota, although at present efforts are being made by the land agents of the railway companies and land companies by offering free transportation to intending settlers to take up land in the States, but without any success, as the inducements offered by the Dominion Government being more favourable owing to the superior quality of the lands, the land regulations being more liberal and the lower rates of transportation with the privilege of erecting elevators at the stations along the line of railways free from the control of millers' syndicates or railway monopolies, as is the case in Dakota, farmers and commission men being debarred from shipping except through the elevators of the Minneapolis millers. The farmers, therefore, being placed at their mercy are compelled to accept such prices as the syndicate may see fit to offer; on the boundary line

it is no unfrequent occurrence for the farmers to team their grain across the line and pay the Canadian duty rather than submit to the extortion of the Elevator and Railway Syndicate.

The enquiries from Sweden, Germany and other European Countries, respecting Manitoba and the North-West Territories, still continue, and during the year numbers of emigrants have been received from there, the movement having commenced, a large influx

may fairly be expected during the coming year

The emigration from these countries will naturally seek the National Lines of Steamships sailing for New York, avoiding delays, and obviating the inconvenience of transhipping at Hull and taking the overland route to Liverpool, there to embark on the line of steamers for Quebec. In view of this important emigration it will be necessary in the interest of the Dominion that means should be adopted for the purpose of securing, aiding and facilitating the business from New York to Winnipeg and points west in the territories.

In the Eastern and Middle States of the American Union a deep interest is being taken in the lands of Manitoba and the North-West Territories, as the available and desirable lands in the Western and North Western States of the Union are now held by the railway companies and land speculators. In the interest of the Dominion it will be desirable to supply and circulate the necessary information in regard to the character of the lands, their location, and the terms of settlement, including the land regulations, with this branch of emigration. All the through railway lines will co-operate so as to secure a share of the emigrant traffic to the North-West and British Columbia.

During the year I have made repeated visits to the stock yards at East Buffalo, Black Rock, the International Bridge, Fort Erie and Niagara Falls, for the purpose of securing a full compliance on the part of the railway companies in carrying out the regulations of the Department in reference to the transit of live stock through Canada, and the return of empty stock cars into and through Canada to the west, after being cleaned and disinfected according to the regulations issued under the powers granted by the Cattle Contagious Disease Act of the Dominion.

In my inspections, I have to report that the railway officials have been anxious to comply with the regulations, and every assistance has been rendered me by Mr. Stiff, Superintendent of the Grand Trunk, and his staff; also by Mr. John Crampton, the eastern general freight agent of the Michigan Central, also by all the officials of the road.

During the past year, Pleuro-Pneumonia has continued to spread to an alarming extent in most of the Western and Middle States, including Pennsylvania and New York State. To such an extent has the disease been developed that the separate States have been unable to grapple with the plague under the present or inter-state laws, as cattle can be transferred from one State into another or neighbouring State.

Several of the States have memorialized the United States Congress to pass a federal bill so that the disease can be dealt with by the Federal Government instead of each State acting upon its own laws, which have been found to be altogether inadequate to meet the ravages of this insidious disease, and unless such legislation is effected, it is only a question of time when every State and every herd in the Union will become infected. At the present time it is estimated that it will cost from ten to fifteen million dollars to stamp out the disease of Pleuro-Pneumonia and Splenic Fever.

Hog Cholera, or hog Fever, is also spreading in the Western and South-western States, and similar measures will have to be adopted to stamp out the infection.

It will only be by the vigorous carrying out of the Dominion Contagious Disease Act, the quarantine laws and rules regulating the cattle and hog traffic, that this country may continue to enjoy immunity from these diseases that are now ravaging and decimating the herds and droves in the United States to the south and west of the boundary line of Canada.

At the present time all traffic in cattle and hogs is prohibited from entering the Dominion on the eastern boundary, and under no circumstances should this regulation be relaxed until the disease has been stamped out. On the western boundary effective measures have been adopted for quarantining importations into Canada; measures are also in force for a thorough inspection of all shipments previous to entering Canada at the

western frontier for transit to the Eastern States, special cars being provided and retained for the through traffic, and under no circumstances are the cars allowed to be used for local shipments from Canada.

Ocean immigrant rates for the year 1886, were established by the conference lines, on the basis of twenty dollars from British ports to Quebec and New York, and the rates from German and Scandinavian ports were fixed at twenty-five and twenty-three dollars, respectively. These rates were maintained during the early part of the season, until they were cut by the New York lines to thirteen dollars and fifty cents from London to New York, seventeen dollars from Germany, and fifteen dollars from Scandinavian ports to New York; and by the Quebec lines the rates were reduced from Glasgow, Liverpool and Bristol, and all inland railway stations in Ireland, to fifteen dollars.

The low rates offered by the New York lines have been the means of attracting a

share of the Canadian business.

The return to established rates by the New York railway lines to the Western States, has been the means of restoring to the Canadian railways a share of the through emigrant business based upon the pool percentages.

By reference to statement H, it will be noticed that the immigrants have been mainly self-reliant, the number assisted forming a small proportion of the aggregate arrivals.

The work at this Agency shows a steady increase, as will be noticed by the comparative statement of the correspondence herewith submitted.

Communications inwards and outwards for the year 18869960 Communications inwards and outwards for the year 1885	$9960 \\ 6958$
Communications inwards and outwards for the year 18751217	0000
Increase 8743	3002

The increase in the correspondence has been caused by the opening up of Manitoba, the North-West Territories and British Columbia, maps, folders, posters, and pamphlets being circulated from this office, in the United States and along the leading lines of railways; and from the increased enquiries respecting the public lands of the Dominion, routes, ocean and railway rates, the necessary capital required, the expense of settling, employment and other matters pertaining to emigration.

All of which is respectfully submitted.

I have the honour to be, Sir,
Your obedient servant,

JOHN SMITH,

Dominion Government Immigration Agent.

The Honourable,

The Commissioner of Immigration, Toronto.

Immigration Agent.

No. 7.

ANNUAL REPORT OF A. G. SMYTH, Esq., DOMINION IMMIGRATION AGENT, LONDON, ONTARIO.

Immigration Office,

London, 5th January, 1887.

S_{IR},—I have the honour to submit, for the information of the Honourable the Minister of Immigration, my annual report of the London Agency for the year ending 31st December, 1886.

Statement A (1).—The number of immigrants arriving at the London Agency via the St. Lawrence or Halifax, and also via the United States. The number who remained in Ontario, and those who went to Manitoba and British Columbia and the Western States.

Statement B.—The arrivals via St. Lawrence and United States, destination, also

number furnished with employment in the locality of this Agency.

Statement A (2).—The arrivals via the St. Lawrence and the United States, monthly, for the full year, shewing destination and nationalities of those remaining in Ontario, etc.

The demand for farm and general labourers was much in excess of the supply, and

at fair wages.

Domestic servants of all classes were, as usual, much in demand, and scarcely any reached so far west, which was a source of disappointment to many who had situations open.

The demand for good agricultural and ordinary farm-labourers will be as good as

usual the coming season.

We can also place a good number of domestic servants, both in the city and locality, for country work.

I have the honour to be, Sir,

Your obedient servant,

A. G. SMYTH,

Government Immigrant Agent.

DAVID SPENCE, Esq.,

Secretary Department of Immigration, Toronto, Ontario. STATEMENT A.—Shewing the number of Immigrants arrived at the London Agency for the twelve months ending December 31st, 1886, and their nationality, the number assisted with provisions, and with free passes by railways, or other conveyances, from this Agency to their respective places of destination.

Country From.	Arrivals via the St. Lawrence.	Arrivals via the United States.	Total.	Remained in the Pro- vince of Ontario.	Went to the United States.	Number assisted with Provisions.	Number assisted with Free Passes.

SEVENTEENTH

ANNUAL REPORT

OF THE

Inspector of Prisons and Public Charities

FOR THE

PROVINCE OF ONTARIO.

Office of the
Inspector of Prisons and Public Charities,
Parliament Buildings,
Toronto, December, 1886.

To the Honourable John Beverley Robinson, Lieutenant-Governor of the Province of Ontario.

MAY IT PLEASE YOUR HONOUR:

I beg to submit herewith the Seventeenth Annual Report upon the Hospitals of Ontario, being for the official year ending 30th September, 1886.

I have the honour to be,

Your Honour's most obedient servant,

W. T. O'REILLY,
Inspector.

Just at the time when the Inspector should have been writing his annual reports, he was attacked by an illness from which he has not yet recovered. He has not, therefore, been able to write such a report as he would have wished upon the Hospitals aided by the Province, but has simply presented the usual statistical tables.

HOSPITALS.

An addition has now been made to the number of public Hospitals in the Province, for on the 20th July last the Belleville Hospital, established through the efforts of the Women's Christian Association of that place, was opened for the reception of patients. An Order in Council has been passed adding the name of this hospital to the list of those aided by the Province.

The opening of an hospital at this point will meet a long felt want, as until July last, there was no hospital in any place between Toronto and Kingston. I have no doubt it will be the means of relieving much suffering. This is the only change made, and the number of hospitals receiving Government grants is now sixteen.

During the past year there was an increase of 418 in the number of patients treated in the hospitals of the Province, as compared with the preceding year. The largest increase is at the Toronto Hospital, where it numbers 252. The General Hospital, Guelph, and the Hospitals in Pembroke, Mattawa and Port Arthur, treated a less number of patients than in 1885. Table No. 1 shews the operations of each hospital, and at the foot of it will be found the totals of the similar table included with last year's report.

The following comparative statement shows the numbers treated in all the hospitals in each of the past eleven years, with the increase or decrease in each successive year as the case may be:—

		Increase.	Decrease.
1876	3,893		22
1877	4,077	184	
1878	4,372	295	
1879	4,612	240	
1880	$5,\!302$	690	
1881	5,257		45
1882	6,032	775	
1883	6,238	206	
1884	6,369	131	
1885	6,617	2 4 8	
1886	.7,035	418	

Notwithstanding the increased number of patients treated in the Hospitals, the Government grant earned by them is slightly smaller than in 1885, as the average stay per patient was shorter and a larger deduction than usual had to be made in respect of improper cases for hospital treatment. The grant earned in 1885 was \$58,225.73, and in 1886 \$57,939.66.

The tables which follow, numbered from 1 to 10, shew the workings of all the Hospitals; and following them will be found the separate reports upon each of the Hospitals:—

TABLE I.—Shewing general movements of Patients in each Hospital separately.

HOSPITALS,	Zumber remaining under treatment on 1st Oct., 1885.	Zumber admitted during the year ending 30th Sept., 1886,	Zumber of births in Hospitals during the year. INSPECTION.

Copies of the reports made to the Government by Mr. Christic upon this

Hospital are annexed:—

"The first inspection of the Toronto General Hospital for the official year was made by me on the 5th March. On that day there were 203 patients in the different branches of the institution, distributed as follows:—

							120 :	males.	83 fe	emales.	
	Infants		-	-	-	-	4		3		
22	General	ward	s -	-	-		103	"	60	"	
٤,	Eye and	l Ear	$\overline{\mathrm{Infir}}$	mary	-	-	13:	$_{ m males},$	4	"	
In the	-Burnsid	e Lyi	ng-in	ı-Hosp	oital	-	-	-	16 f	${ m emales}.$,

"This shows a slight decrease of population, as compared with the corresponding period of the previous year. The difference is so small, however, as not to attract observation, except on the ground that in consequence of the extreme cold and sudden changes during the winter an increased number of patients might have been expected. The new arrangements by which the west wing and the Lying-in Hospital are now heated with steam and hot water, instead of hot-air, have given good satisfaction. The charts in the several wards, in which the temperature is regularly recorded, shew that it has been maintained at a very even degree.

"The requisition system in the distribution of supplies required in the different departments has lately been adopted, and the approval of the Medical Superintendent is now required for the supply of anything going into consumption. This will, no doubt, act as check in many ways and prove to be a measure

of economy in the ordinary routine and working of the institution.

"A few small wards for isolated cases have been provided since the date of my last visit, and a store-room properly arranged for the patients' clothes, which

saves much trouble and inconvenience.

"I visited all the store-rooms and found them clean and neatly kept, and the food supplies appeared to be of excellent quality. The different diet rolls for officers, nurses, servants and patients have lately been revised and arranged in a more simple and practical form for all concerned. Many of the wards have been renovated, and hardwood is rapidly replacing the old pine floors in all the halls and corridors.

"The number of medical students in attendance is largely increased of late, and the seating room in the operating theatre is scarcely sufficient for their accommodation. The management are, therefore, considering the question of enlarging it, so that the educational advantages of the Hospital in practical

teaching and clinical work may be fully realized.

"The training school for nurses continues to work successfully and there are thirty-five now in the school. The frequent visits of the Chairman and Trustees shew the continued personal interest taken by them in the management and working of the Hospital in all its departments."

"I made a second inspection of the General Hospital, Toronto, on the 2nd September.

"On that day there were 195 persons in residence, 130 males and 65 females. In the General Wards there were 114 males and 48 females. In the Eye and Ear Infirmary there were 11 males and 1 female. In the Burnside Lying-in

department there were 5 males, 13 females, and 3 female infants.

"Of the total number under treatment in the Hospital, 2 were admitted in January last, 4 in February, 2 in March, 4 in April, 18 in May, and the remainder within the past three months. The total number treated during the past eleven months was 1682, exclusive of out door patients, which in the course of the year number about 7000. The patients at present under charge appear to be receiving the best of treatment, to be well kept and carefully nursed, and their general surroundings were such as to afford them relief and comfort.

"The Eye and Ear Infirmary appears to be doing satisfactory work. Patients from many distant parts of the Province have been receiving treatment for ail-

ments pertaining to the special work of this department.

"The Burnside Lying-in branch also appears to answer all the requirements so far, and the apartments were all found to be in a good state of order and cleanliness. The re-arrangement of the heating apparatus in the eastern half of this building has answered well, and the extension of the same system to the

west half would, no doubt, prove to be of equal advantage.

"Various improvements have been made in the institution since the date of my last visit. One of the most important is the enlargement of the operating theatre. This has been effected by adding another storey to it, and it now has seating accommodation for five hundred, and one hundred more can find standing-room with a full view of the operating table. The theatre is also used for the purpose of holding religious services on Sundays, and it is given to any denomination requiring it for the accommodation of patients resident in the Hospital."

"At the east-end of the upper part of the main building a large double door has been made connecting with a verandah built on the same level. The opening admits a free current of air in warm weather, and the verandah is used exclusively

by the male patients in Wards Nos. 13, 14 and 15, for air and exercise.

"The sanitary condition of the Hospital appears to be well looked after. All the old closets have recently been removed and those of modern and improved pattern substituted for them. Isolated rooms have been made for special cases in the upper flat, and a new disinfecting-room for bedding and patients' clothes has been added to the laundry, also a high-pressure steam disinfecting tub for cleaning and washing infected articles.

"The Superintendents informs me that the training school for nurses is in a satisfactory condition. Thirty-five young women are now under training in the school, receiving instruction daily. The course extends over two years, and if after examination as to their acquirements they are found competent, certificates are granted them.

"Contracts are about to be awarded for the erection of a "Nurses' Home," on the Hospital premises, which will not only provide accommodation for the staff of nurses when off duty, but will admit of the rooms at present occupied by them being used for Hospital purposes for isolated cases. This will, no doubt, prove to be one of the most desirable improvements made in the Hospital arrangements lately, as it will provide for the proper isolation and required rest of the nurses when off duty.

"I found the stores in excellent order, supplied with good and wholesome food; and the Hospital clean and neatly kept.

"From the records I note the regular attendance of the Chairman, Mr. Justice Patterson, and the members of the Board of Trustees, and it is gratifying to see such good results from the efforts of the management of the institution."

Inspection.

. A copy of the Report made to the Government by me upon this hospital is annexed.

- "I made an inspection of the City Hospital, Hamilton, on the 9th November.
- "The patients then under treatment numbered 48, viz., 27 adult males, 17 adult females and 4 children. These patients were all seen and they appeared to be receiving proper care and attention on the part of the Hospital staff.
- "The building was in a satisfactory condition of order and cleanliness. A fire escape is needed from the top storey of the centre building, and I would recommend the authorities to supply this deficiency and thus improve the general condition of the building and add to the safety of the inmates.
 - "The books were examined and found to be properly kept."

Inspections.

Copies of the reports made to the government upon this Hospital by Mr Christie are annexed:—

"An inspection of the General Hospital, Kingston, was made by me on the 19th April. The patients numbered on that day 23 males, 25 females and 6 infants. Two of the males could not properly be considered patients as owing to their convalescent condition, they did not require active treatment. Twelve of the patients had undergone surgical operations; each case was making satisfactory progress.

"I learned that an effort was being made to establish a training school for nurses, but owing to the stringent nature of the conditions no suitable applications had been made. It would be a benefit to the Institution to have an efficient school of this kind, and it is to be hoped that if the reason assigned be correct, a relaxation of the conditions may be made in order to secure the establishment of

the school."

421

"Another inspection of the General Hospital, Kingston, was made by me on the 9th September.

"On that date there were 28 patients under treatment, namely, 17 males and 11 females. In the lying-in ward there were 5 patients, 2 of whom were lying-in cases; the rest were under treatment for other diseases. The arrangements in regard to this ward are very objectionable, as no provision is made for the isolation of such patients as may be afflicted with contagious diseases, or who may be of objectionable character, from those who are awaiting their confinement. I am glad to know, however, that it is determined to remedy this defect by making a division so that distinct and separate accommodation can be provided in such cases. This matter should be attended to at once, for moral as well as physical reasons.

"Since the date of my last visit the painting and thorough renovation of some of the wards and halls have been accomplished, and I was informed that the whole building internally was to be similarly treated as soon as the work could be done. A bath has been placed on the same floor as the wards for the benefit of the patients.

"I was informed that the school for training nurses had been successfully opened, and that there were more persons applying for positions than could be provided with practical employment in the Hospital at present."

Inspections.

Copies of the reports made to the Government upon this Hospital by Mr Christie are annexed:—

"The Hotel Dieu, Kingston, was inspected by me on the 1st April. There were then 24 patients, 8 males and 16 females, under treatment. The wards, clothing, bedding, etc., were in excellent order and scrupulously clean.

"The books were found to be properly kept."

"I made a second inspection of the Hotel Dieu Hospital, Kingston, on the 9th September.

"There were 23 patients under treatment, 8 males and 15 females, all of

whom appeared to be receiving the usual attention and care.

"The larger wards, and the private wards, and the apartments of the Hos-

pital generally, were in their usual good order.

"No change of importance in the routine work and condition of the Institution has taken place since the date of my last visit."

Inspections.

Copies of the reports made to the Government upon this Hospital by Mr. Christie are annexed:—

"An inspection of the General Protestant Hospital, was made by me on the 6th May. The total number of patients was fifty-three, thirty-two adult males, twenty adult females, and one child. Four of the males, and two of the females, after receiving specific treatment, had been transferred to the building detatched from the Hospital and there maintained, as they were old and infirm and without resources. These cannot properly be counted as Hospital patients.

"During the past four months seven cases of smallpox have been located in the isolated building. One patient is still being cared for therein. Every precaution

appears to have been taken to prevent the spread of the contagion.

"I found the wards to be neatly kept and well ventilated, and the general

condition of the patients gave evidence of proper care and treatment.

"A sewer of ample capacity is now being extended along Rideau street, and a perfect system of drainage from the hospital buildings will be effected."

"I made a second inspection of the General Hospital, Ottawa, on the 21st

September.

"There were then fifty-one patients, viz., twenty-eight males and twentythree females. Five old and infirm people of this number were being cared for in the old original hospital building (two males and three females) and were not

reckoned as hospital patients.

"Since the date of my last visit nothing of importance has occurred to interfere with the general routine work of the Institution. An examination of the records shewed that about the same number of patients have been treated during the present as during former years; a few severe cases have been under treatments, but none were of an epidemic character.

"Since the date of my last visit two closets have been placed in the old

building and one in the basement of the new hospital.

"The sewage from the entire building is now conveyed to the new drain which has been laid down on Rideau street, and the branch pipe has, I understand, been properly trapped and ventilated. This places the Institution in a much more satisfactory condition in this respect. The books I found to be in good order."

Inspections.

Copies of the reports made to the Government upon this Hospital by Mr.

Christie, are annexed:—

"I visited the Roman Catholic General Hospital, Ottawa, on the 6th May. The patients on that day numbered 46, namely, 18 adult males, 21 adult females, and 7 youths.

"The Institution was in good order and the books neatly kept"

"I made a second inspection of the Roman Catholic Hospital, Ottawa, on the 21st Sept., when there were 35 patients under treatment, 17 males and 18 females,

all of whom appeared to be receiving due care and consideration.

"The interior of the Hospital was in a state of excellent order and cleanliness. The books also were neatly kept, and from the records I found that the Institution had, during the past year, been doing its usual work without material change from that of former years. The building operations referred to in my last minutes of inspection were well advanced. The laundry, in rear of the main building, is nearly completed, and has been placed at a sufficient distance to be entirely isolated. The internal fittings were being introduced and it will be ready for use in a short time."

HOUSE OF MERCY LYING-IN HOSPITAL, OTTAWA.

Inspection.

Copies of the reports made to the Government upon this hospital by Mr.

Christie are annexed:

"An inspection of the House of Mercy Lying-in Hospital, Ottawa, was made by me on the 7th May. There were 29 adult inmates therein, 8 of whom had been confined, and the remaining 21 were waiting accouchment. There were also 8 infants being cared for who had been born on the premises.

"During the month of February four cases of small-pox appeared amongst the inmates, but by prompt action in isolating the patients further spread of the

disease was fortunately prevented.

"The Hospital was neat and clean and in proper order."

"I made another official visit to the House of Mercy Lying-in Hospital, Ottawa, on the $21\mathrm{st}$ September.

"There were 21 adult patients and 4 infants in residence on that date, 17 of the patients were recorded as awaiting their confinment.

"The Hospital was in good order in all respects."

Inspections.

Copies of the reports made by me to the Government upon this Hospital are annexed:—

"I made an inspection of the General Hospital, London, on the 12th May, when it contained 63 patients, viz.:—36 men, 26 women and 1 child. I found considerable laxity in the manner in which the cards attached to the beds of the patients were kept. In a large number of instances the year in which the patient was admitted was not entered upon the admission card, rendering it necessary to inquire for such information.

"It seems to me from what I gathered at the inspection of this Hospital, that it does not receive that supervision from the committee or members of the City Council in charge of it that it should. I assume this to be the result of having such an institution in the hands of a committee of the Council liable to very frequent changes, and consequently unlikely to be composed of members who have that experience and abiding interest in the institution which a board of independent trustees would have, who would be appointed for a considerable length of time, and under an arrangement by which an entirely new board could at no time have charge.

"While in London I learned that the question of placing the Hospital in the hands of a commission had been mooted, and I cannot too strongly express my belief that if put in the charge of a small board of ladies and gentlemen, the greatest benefit would result therefrom, and a great deal better value would be received for the money expended.

"The Hospital building is not well adapted for the purpose intended. A much smaller sum of money than this building cost, if judiciously expended upon a proper structure, would give infinitely better results, both as to economy in its working and success in the treatment of the patients. It is to be hoped that the day is not far distant when the city of London will see its way to the erection of a first-class hospital and devote the present building to supplying a want which is very much felt, namely, a place of refuge for the poor of the city."

"The General Hospital, London, was again inspected by me on 30th September. I found it to be in a very unsatisfactory condition; a want of cleanliness was very noticeable, especially in the long ward.

"The patients numbered 56. Of these 33 were adult males, 17 adult females and 6 children.

"Dr. Belton has been reinstated in the position held by him."

Inspections.

A copy of my report to the Government upon this Hospital is annexed:—

"The first inspection of the General and Marine Hospital, St. Catharines, during the official year, was made by me on the 4th May. There were then 26 patients in residence; 14 males, 6 females and 6 children. Two of the latter

were born in the Hospital.

'The thorough system of training to which all the employes of this Hospital are subjected ensures management and the Institution is always well kept. The floors, however, have been used too long and are wearing out, and in addition to the foulness which must unavoidably attach to old and dilapidated pine floors, there is a constantly increasing difficulty in keeping them clean. A large amount of new hard wood flooring is a necessity in this building, and I have urged upon the managers the importance of replacing the old floors as rapidly as possible."

I instructed Mr. Hayes to make the second inspection. He reported to me as under:—

"The General and Marine Hospital, St. Catharines, was inspected by me on the 23rd September. The number of patients then on the Hospital books was 19, 15 males and 4 females.

"The Hospital was in extremely good order throughout. I found that a new floor had been laid in the kitchen, much improving that part of the building.

"I also went over the nurses' training school. The names of 12 nurses are on the books, 9 of whom are out nursing. It is stated that the demand for nurses from this school is far greater than the supply."

Inspections.

A copy of the report made by me to the Government upon this Hospital is appended:—

"I made my first inspection of the General Hospital, Guelph, on the 3rd

June.

"There were 15 patients, 8 male and 7 female, under treatment on that day.

"The Hospital was clean, neat and in good order throughout."

I instructed Mr. Hayes to make the second inspection. A copy of his report to me is appended:—

"I beg to report that as instructed by you, I made an inspection of the

General Hospital, Guelph, on the 8th inst.

"There were then 8 male and 5 female patients under treatment. The majority had been admitted but quite recently.

"The books were examined and a suggestion made as to the manner of

closing up each years' record.

"The building was in good order. The ventilation seems good, as the air throughout was fresh and sweet. The balcony in front of the Hospital has been completed. The Board have just bought nearly one hundred dollars worth of new instruments for use in the Hospital."

Inspections.

A copy of the report made by me to the government upon this Hospital is annexed:—

"My first visit to the St. Joseph's Hopital, Guelph, during the year, was made on the 3rd June. Fourteen patients were then under treatment, namely, 7 males, 5 females and 2 children.

"The Hospital was in its usual clean and tidy condition, and well conducted

in all departments."

I instructed Mr. Hayes to make the second inspection of this Hospital. A copy of his report to me is appended:—

"I have the honour to report that, as instructed by you, I made an inspection

of the St. Joseph's Hospital, Guelph, on the 8th October.

"The portion of the building used for Hospital purposes was in a very neat and clean condition. A house, isolated from the main structure, had recently been erected. It is designed to be used as a small-pox Hospital, should the occasion for such be needed.

"The books were examined and found to be correctly kept.

"The patients in residence numbered 14, 6 men, 7 women and 1 child. These were all seen by me."

Inspection.

Copies of the report made to the Government upon this Hospital by Mr.

Christie are annexed:—

"An inspection of the General Hospital, Pembroke, was made by me on the 5th May. On that day there were 6 patients under treatment, 2 males and 4 females, all of whom appeared to be proper subjects for active treatment in such an institution.

"Sixty-four patients in all have been received and treated since the beginning of the current official year. The books were properly kept, and the Hospital was thoroughly clean and in good order."

"I made a second visit of inspection to the General Hospital, Pembroke, on the 22nd September, and found four patients under treatment, namely: one adult male, one youth under twelve years, and two females.

"The Hospital was in its usual state of good order and cleanliness, and its

general condition was satisfactory."

INSPECTIONS.

A copy of the report made to the government upon this Hospital by Mr. Christie is annexed:—

"I made an inspection of the General Hospital, Mattawa, on the 22nd September.

"There were 4 males and 1 female under treatment on that date. They were in the new building, which has been erected since the date of my last visit. In October last the old building, originally used for hospital purposes, was destroyed by fire. Fortunately the new building was sufficiently advanced at that time to admit of its completion being hastened, and therefore no great interference with the ordinary routine of the Institution resulted from the loss of the old building.

"The site of the present building is an excellent one, having a good elevation and exposure. It is well ventilated and affords ample accommodation. The larger wards are bright and cheerful in appearance, and the smaller or private wards are equally well adapted to the purposes they are designed to serve.

"The building is heated throughout with steam, and the water supply is obtained by a force pump from the river. The plumbing work has been constructed on sanitary principles.

"The patients were provided with comfortable surroundings and appeared to be well treated."

Inspections.

A copy of the report made by me to the Government upon this Hospital is annexed:—

"I inspected the John H. Stratford Hospital, Brantford, on the 5th May. There were 18 patients in residence on that day, 6 males, 11 females and 1 child. The Hospital was found to be in an exceptionally satisfactory condition, considering the somewhat disorganized state the staff has been in for some time, owing to the illness of the lady who was appointed matron when the late Miss Goldie resigned. The care of the Hospital consequently devolved entirely upon Miss Graham, the head nurse, giving her much more work to do than she could fairly be expected to undertake satisfactorily. The matron, finding her illness to be protracted, resigned her position, and Miss Graham has been appointed matron in her stead. Everything is now working in a satisfactory manner.

"The lively interest which is taken in this Hospital by many of the ladies and gentlemen of Brantford insures for it a very successful career in the future."

Mr. Hayes made the second inspection and reported to me as follows:—

"As instructed by you, I visited the John H. Stratford Hospital, Brantford, on the 25th September. There were then 20 patients under treatment, viz.:—12 adult males, 6 adult females, and 2 children. Twelve of these patients were suffering from typhoid fever.

46

"Every part of the Hospital was visited by me, and all was in excellent order.

"The registers kept are not of the proper form, and owing to this, extra trouble is given to the Secretary of the Hospital Board. When those in use are filled, it would be well for him to apply to you for a pattern of the approved register."

ST. JOSEPH'S HOSPITAL, PORT ARTHUR.

Inspection.

A copy of the report made to the government by me upon this Hospital is annexed:—

"The St. Joseph's Hospital, Port Arthur, was inspected by me on the 23rd

August. There were then 4 male patients under treatment.

"The bedsteads in se are of a very bad style and should be replaced by those of a proper pattern with wire mattress combined. I hope the authorities of the Hospital will be able to make this improvement at an early day. The closet arrangements, too, are not at all good. In other respects the building was in good order, being clean and neat."

BELLEVILLE HOSPITAL.

This hospital was ready for the reception of patients on the 20th July last, and on the 23rd July the Women's Christian Association of Belleville, under whose management the Hospital is, petitioned the government for aid under the provisions of the Charity Aid Act. The petition was referred to Mr. Christie, with a request that he would inspect the Hospital and report upon it. A copy of the report made by him to the Provincial Secretary is annexed:—

- "I beg to return herewith the petition of the Women's Christian Association of Belleville, praying that the Hospital, under the charge of the Association in that city, may receive aid under the provisions of the Charity Aid Act.
- "The petitioners append a copy of the Act, under which the Association controls the property and has built the Hospital and Home for the Friendless; also a copy of the constitution of the society, together with the rules adopted for the management of both Institutions.
- "In compliance with instructions, I made an inspection of the Hospital on the 14th September last, and found that the building had been neatly and substantially constructed according to the plans which had been submitted for approval previous to the commencement of the work.
- "The heating apparatus, which is a combined system of steam and hot water, was being fitted up at the time of my visit, and when finished the whole structural condition of the Hospital will be very complete.
- "The outlay for site and building has been about \$20,000, all of which has been provided for, and the expenditure for the future will therefore be limited to what may be necessary for the supply of any furnishings yet required, and the maintenance of the Institution from year to year.
- "The Hospital was formally opened on the 20th July last and in a few days afterwards patients were received for treatment. On the day of my visit there were 6 being cared for, and from a return furnished me since the 30th September, I find that during the past official year 9 patients have been under treatment. Their stay aggregated 290 days, the grant for which, at the statutory allowance for hospital work, would amount to \$87.
- "I would therefore recommend that the prayer of the petition be granted, and an Order in Council be passed authorizing that the Belleville Hospital be taken as named in Schedule A of the Charity Aid Act, and that it be granted aid under the provisions of that Act from the first day of October, 1886; and that the sum of \$87 be paid to the Hospital in respect of work done by it from the date of opening to the 30th September, 1886."

The recommendation contained in the report was approved of and an Order in Council passed, granting aid to the Hospital, subject, of course, to the ratification of the order by the Legislature at its next session.

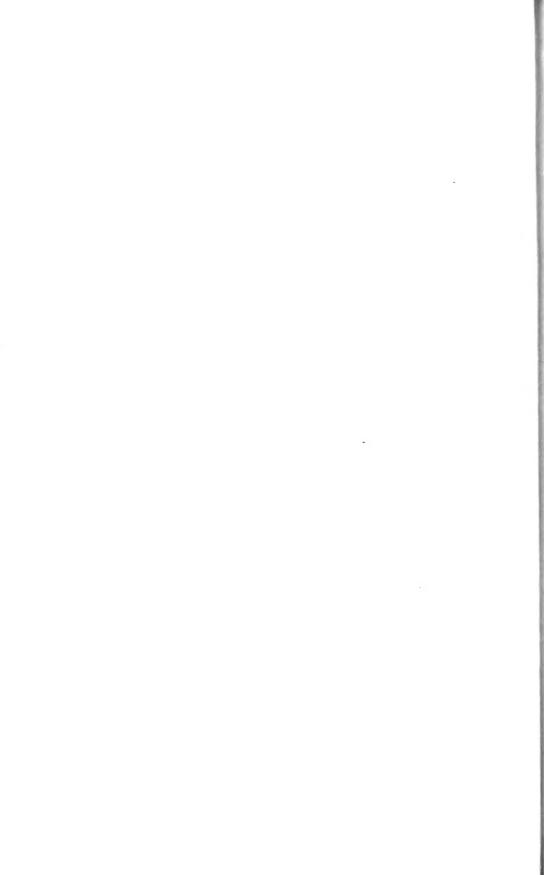

During the short period between the opening of the Hospital and the close of the official year on the 30th September, 9 patients were admitted, of whom 3 were discharged, leaving 6 under treatment at the class of the year.
